Expansion of Hospital Network into the Eastern Region

STRATEGIC NETWORK EXPANSION: LEVERAGING THE EEC

Economic & Industry Hub

Industry

Growing Market Demand

SSO

Strategic Incentives

EEC

Next-Gen S-Curve Hub

Robotics, Aviation, Biotechnology, Digital and Clean Energy.

Massive industrial influx

Driven by massive industrial influx in the EEC.

High Expansion Potential

EEC: 3.0 beds/1k vs. Bangkok: 5.7 beds/1k.

(Significant Unmet Demand & Opportunity)

High-Potential SC Target

Located in the #2 largest SSO province after Bangkok, within a national pool of 13.7M insured members.

Diverse Workforce Influx

Serving both general labor and high-tech specialists.

Demand in EEC for Special Targeted Industries

2025-2029 in 5 Clusters total of 156,879 positions

Targeted Industry Integration

Comprehensive Healthcare & Medical Hub.

Tax Benefits

Up to **15 years** of CIT exemption.

Operational Ease

EEC Visas and **Work Permits** for specialists.

Sources:

•National Health Security Office (NHSO), Region 6 (Rayong),

•Approximately 20% of insured persons are located in the Eastern region.

Source: National Statistical Office and Official statistics registration systems.

as of 2024

Expansion of Hospital Network into the Eastern Region

Goal: Expand Healthcare Footprint to Serve **Thai & International** Patients across Strategic Economic Zones: **Samut Prakan, Chonburi and Rayong.**

Strategic Infrastructure

- Three-Airport High-Speed Rail Project
- Laem Chabang & Map Ta Phut Port Development Projects
- U-Tapao International Airport Development

STRATEGIC CONNECTIVITY

Integrate into EEC via Kasemrad Hospital Suvarnabhumi Gateway.

NETWORK PROLIFERATION

Expanding Kasemrad Hospital Rayong & World Medical Pattaya to dominate high-potential zones.

Project Construction Schedule

2026

Construction & Foundation

- Kasemrad Hospital Rayong
- Kasemrad Hospital Suvarnabhumi

270 Beds

270 Beds

2027

- World Medical Hospital Pattaya

150-200 Beds

Expansion of Hospital Network into the Eastern Region

Opening Timeline

2027

Kasemrad Hospital Rayong

Scheduled to open in Q4/2027

Location: Mueang Rayong District, Rayong Province (30-rai)

Target Patients: Both Cash and SS

Licensed Bed: 270 beds

2028

Kasemrad Hospital Suvarnabhumi

Scheduled to open in Q1/2028

Location: Bang Sao Thong District, Samut Prakan Province (25-rai)

Target Patients: Both Cash and SS

Licensed Bed: 270 beds

2029

World Medical Hospital Pattaya

Scheduled to open in 2029

Location: Bang Lamung District, Chon Buri Province (15-rai)

Target Patients: Local and International patients

Licensed Bed: 150-200 beds

Enhancing the capacity of existing hospitals

Goal : Elevate service quality to support growth and expand the Self-pay consumer base.

2026 & 2027

Growth & Construction

2026: Completion of Kasemrad Hospital Prachachuen, KH Bangkae, and KH Pathumthani Building
Upgrading facilities and Specialized Medical Centers

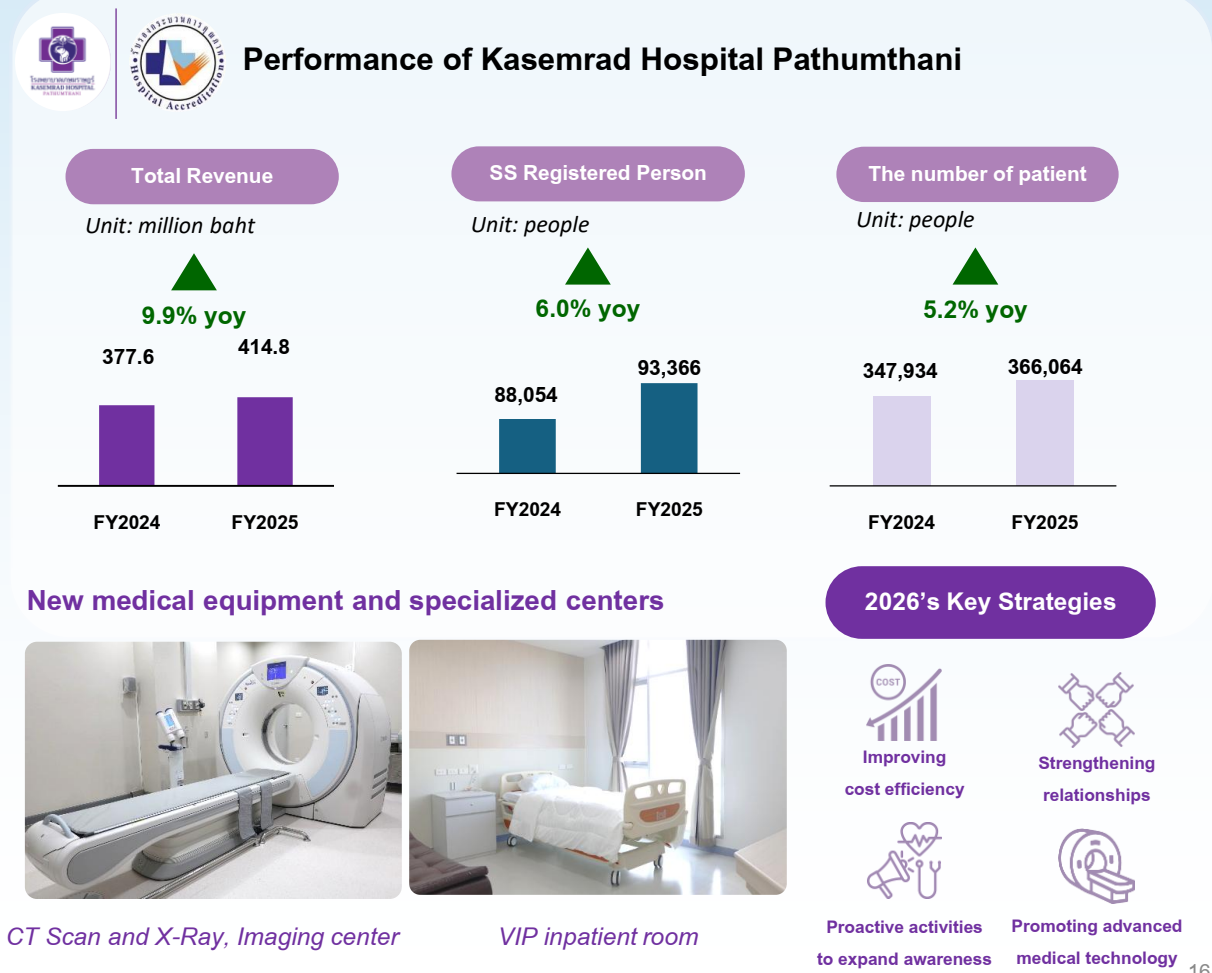

2026 : Opening of Kasemrad Hospital Mae Sai New Building
Expanding Healthcare Accessibility

2027 : Construction of Kasemrad Hospital Ramkhamhaeng Additional Building
Strategic Readiness for Future Demand

+120 Beds
(Capacity Enhancement)

Following the Successful Rebranding of Kasemrad Hospital Pathumthani

Enhancing the capacity of existing hospitals

Goal : Elevate service quality to support growth and expand the Self-pay consumer base.

2028

Strategic Expansion & Future Focus

What we will do?

Renovate & Expand KH RTB

Upgrading facilities and specialized medical centers

High-Margin Acquisition

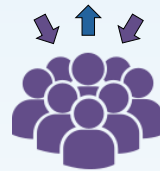

Securing SSO base while attracting Self-pay patients

Capacity Scalability

Preparing for long-term market growth

Why Expand?

Service Excellence

Optimized capacity & reduced overcrowding

Profitability Drive

High-margin Self-pay & Insurance integration

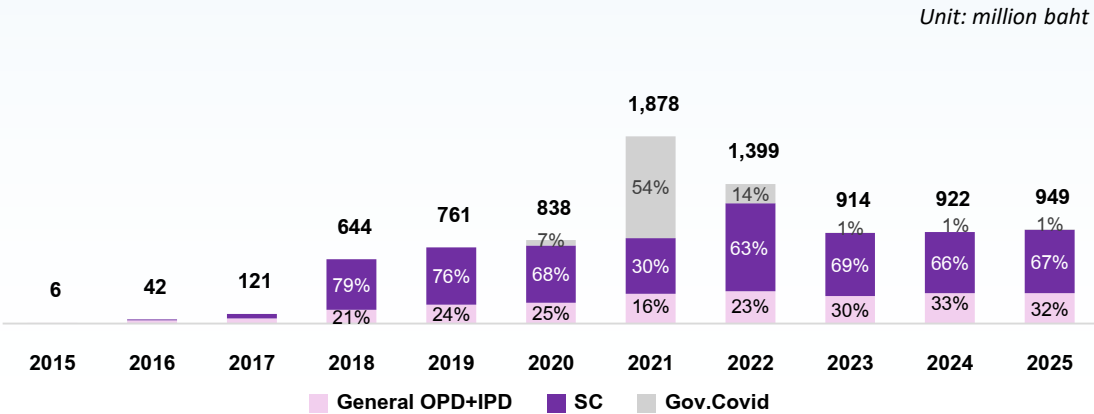

Volume Guarantee

Leveraging existing dense SSO network

Kasemrad Hospital Rattanatibeth

Revenue Performance: 157x Growth (CAGR ~75%) over the past 10 years

Smart Hospital Transformation through Digital Technologies

Goal: Enhancing Quality of Care, Operational Efficiency, and Sustainable Cost Optimization.

Smart Service

2026

Patient Experience Advance

Integrated Patient App

Develop the Kasemrad Application to enhance patient access and utilization.

Telemedicine

Real-time consultations & remote monitoring.

Online Services

Digital registration, payment, & pharmacy.

2027

Smart Management

Data-Driven Excellence

E-Refer

Fast, error-free patient transfer between network sites.

Real-time Data Integration

Unified data view for all hospitals.

Advanced Analytics (e.g., Tableau)

Optimize patient data & waiting times, enhance financial efficiency and reduce operational costs.

2028

Smart Infrastructure

Secured & Agile Foundation

Hybrid Cloud Data Center

Secure, scalable infrastructure for massive healthcare data.

Unified HIS / ERP Integration

Fully connected hospital & business systems.

Biometric Security System

Secure patient identification & staff access control.

Continuous Development of Medical Professionals and Workforce

Goal: Elevate capabilities, enhance care quality, and drive sustainable growth.

Healthcare Executive Leadership Program

Driven by Digital Era Adaptation

Strategic Academic Collaboration

Hospital Executive Program: BCH-TU Business Concept Development.

Future-Proof Readiness

Empowering leaders via strategic planning, cost control, and digital leadership.

Core Leadership Capabilities

Strengthening strategic management and digital leadership for senior executives.

Quality & Patient Safety

Aligned with Global Standards

Safety First Culture

Embed quality and safety into daily operations.

Clinical Excellence

Continually elevate medical and service standards.

Accreditation Excellence

National & Global Accreditation for all 5 hospitals (2 existing & 3 new hospital).

Strategic Research & Innovation Collaboration

Continuous Innovation Focus

Strategic R&D Partnerships

Collaborate with universities on at least 2 R&D projects/year.

Commercial Innovation

Launch at least 1 commercial innovation project annually.

Operational Efficiency:

Improving operational efficiency to maximize output and cost-efficiency.

Risk Management

Competitive Risk in the Healthcare Industry

Risk Characteristic & Impact

Landscape: Competitive industry with emphasis on medical service quality, advanced technologies, and specialization.

Impact: Pressure on pricing and costs (Tech & Personnel) and risk of market share loss, directly affecting revenue, margins, and overall performance.

Strategic Management Measures

Specialized Medical Excellence: Scaling high-value centers for distinct service differentiation.

Smart Hospital Transformation: Leveraging digital technologies for superior patient experience.

Brand & Network Strength: Strengthening brand identity and expanding reach to all segments.

Medical Personnel & Quality: Continuous development to elevate clinical standards.

Risk from Changes in Government Healthcare Reimbursement Policies

Risk Characteristic & Impact

Landscape: High Revenue Exposure (34.8%) from government schemes (SSO & UC). Vulnerable to policy shifts and reimbursement rate adjustments.

Impact: Direct pressure on revenue and profit margins. Requires proactive adaptation and effective cost-per-case management.

Strategic Management Measures

Proactive Policy Engagement: Monitor shifts and provide active feedback to authorities.

Revenue Mix Diversification: Expand Self-pay & International segments to de-risk.

High-Margin Specialized Care: Scale medical hubs to boost revenue quality & margins.

Strategic Cost Efficiency: Optimize cost-per-case and resource utilization.

Agenda

- BCH Snapshot
- Jump+ : Business Plan
- **Jump+ : Governance Plan**
- Jump+ : Climate Action Plan

1. Enhancing anti-corruption and fraud prevention efforts

Topic	Current Status	Targets		
		2026	2027	2028
The company has established an anti-corruption policy and practices.				
An anti-corruption and anti-bribery policy has been developed to comprehensively cover the organization’s business operations, formally approved by the Board of Directors, and supported by clear and practical implementation guidelines				
The company conducts regular monitoring and evaluation of compliance with its anti-corruption and anti-bribery policy and procedures. Audit results are reported by internal auditors to the Board of Directors at least annually. In the event of any violations, corrective actions and preventive measures are clearly defined to prevent recurrence				
The company conducts an annual review of its anticorruption and anti-bribery policy and practices with the Board of Directors				
Achieve CAC certification from the Thai Institute of Directors (Thai IOD)				
Implement and verify that all critical Tier 1 business partners have anti-corruption policies, and ensure that the company actively monitors and assesses business partners’ adherence to these policies				

1. Enhancing anti-corruption and fraud prevention efforts

Strategic Initiative

The Company has renewed its **CAC (Thai IOD) certification** and continues to enhance its anti-corruption practices in alignment with established standards.

Certification Date : 31 December 2023
Expiry Date : 31 December 2026

2026

The Company has successfully renewed its CAC certification for the third consecutive time, with a certification validity of 3 years. The next renewal is scheduled for 2029.

Risk Management

“Risk related to compliance with anti-corruption standards and CAC (Thai IOD) recertification”

Risk Characteristic

- Internal controls and practices may not be aligned with CAC requirements.
- Lack of continuous improvement may lead to the risk of failing the assessment.
- Employees’ and suppliers’ understanding may be inconsistent.

Risk Impact

- Risk of failing the CAC assessment or not renewing certification within the required timeframe.
- Negative impact on corporate governance credibility and stakeholder confidence.
- Increased risk of corruption, affecting reputation and business operations.

Risk Management Measures

- Regularly review and update policies to ensure alignment with CAC requirements.
- Establish internal controls for high-risk activities.
- Communicate and provide training to employees, and set standards for suppliers.
- Provide whistleblowing channels and ensure a transparent audit system.

Governance Plan

2. Enhancing prevention of conflicts of interest

Topic	Current Status	Targets		
		2026	2027	2028
1. The company has established a policy and procedures to prevent conflicts of interest.				
2. The company has developed a comprehensive, written policy and guidelines to prevent conflicts of interest, which have been approved by the Board of Directors.				
3. Compliance with the conflict of interest policy is monitored through a formal process at least annually.				
4. Conflicts of interest are reported to the Board of Directors at least annually. If any violations are detected, corrective actions and preventive measures are clearly outlined to prevent recurrence.				
5. All conflicts of interest are fully disclosed in accordance with the established procedures and are verifiable.				

2. Enhancing prevention of conflicts of interest

Strategic Initiative

Conflict of Interest Prevention and Management Program for At Risk Employees

2026

- 100% of employees in high-risk groups have received training and fully understand conflicts of interest.

2027

- Employees are able to apply their knowledge and make appropriate decisions in real-life situations.

2028

- The organization has an effective management system that supports transparent and auditable risk disclosure and management.

Risk Management

“Risk related to the effectiveness of identifying, disclosing, and managing conflicts of interest among high-risk employees.”

Risk Characteristic

- Compliance with policies may be inconsistent among high-risk employee groups.
- Understanding of conflicts of interest and disclosure requirements may vary.
- In some cases, issues may not be properly disclosed or appropriately managed.

Risk Impact

- Risk of non-transparent or non-independent decision-making.
- Negative impact on credibility and stakeholder confidence.
- Increased legal and regulatory risks.

Risk Management Measures

- Provide targeted training for high-risk employee groups, using case studies.
- Establish clear disclosure procedures and promote reporting.
- Implement regular monitoring, auditing, and review processes.
- Foster a strong corporate governance culture within the organization.

Topic	Current Status	Targets		
		2026	2027	2028
1. The company has established policies and guidelines for information security governance.				
2. The company has developed a clear, documented IT security policy and guidelines, which have been approved by the Board of Directors.				
3. Information cybersecurity undergoes evaluation by an independent external auditor, accompanied by clear and actionable improvement and development strategies	Not Started			
4. All employees undergo training, communication, and understanding assessments to enhance awareness of IT security.				
5. Information Security Governance Enhancement Project				

3. Enhancing governance of information security

Strategic Initiative

1. The information security policy and procedures have been established and approved by the Board of Directors.

2026

- Information security policies are aligned with identified risks.
- Employees have a clear understanding and are able to comply correctly.
- Governance is clearly defined and aligned with good corporate governance principles.
- Security risks are effectively reduced.

2. Enhance the effectiveness of the Company's information security protection systems.

2026

- Employees have **awareness and readiness** in information security.
- The organization is able to clearly identify risks and system gaps.
- Policies and practices are appropriate and aligned with identified risks.

2027

- The **Data Center system** is secure and operates efficiently.
- Data is protected, with backup systems in place and ready for use.
- Information technology risks are reduced.

2028

- Achieves internationally recognized **information security certification**.
- Data management and risk control are further enhanced.
- Strengthens stakeholder confidence and supports sustainable business operations.

Risk Management

“Risk related to the effectiveness of information security systems and cybersecurity threat management”

Risk Characteristic

- The system is complex and highly interconnected.
- Cyber threats evolve rapidly.
- Implementation of measures may be inconsistent, leading to potential vulnerabilities.

Risk Impact

- Risk of unauthorized access, data breaches, or system disruptions.
- Impact on operations, service continuity, regulatory compliance, and stakeholder confidence.

Risk Management Measures

- Enhance threat protection systems, access controls, and vulnerability management.
- Provide staff training and conduct threat simulation exercises.
- Monitor, audit, and continuously improve security measures.

Agenda

- BCH Snapshot
- Jump+ : Business Plan
- Jump+ : Governance Plan
- **Jump+ : Climate Action Plan**

Climate Action Plan

1. Greenhouse gas inventory (GHG) plan

- Prepare a greenhouse gas (GHG) inventory through the SET Carbon system to ensure data accuracy and auditability.
- In 2025, the Company achieved a reduction of **30,700 tCO₂e**.
(Data is under consolidation and verification and may be subject to change upon completion of the verification process.)
- Expand coverage to 11 affiliated companies and continue reporting Scope 1 and Scope 2 emissions.
- Currently preparing data for verification.
- Plan to expand to Scope 3 to cover the entire value chain.
- Support target setting and the achievement of Net Zero by 2050.

Topic	Targets		
	2026	2027	2028
GHG inventory report, GHG verification and disclosure (specific to Scope 1 and Scope 2 emissions)	✓	✓	✓

The verification of greenhouse gas (GHG) emissions (Scope 1 and Scope 2) covers only significant operational boundaries of the Company. The Company is currently preparing data to support the verification process in 2026 (base year 2025).

Strategic Initiative

2026

- Establish a systematic GHG inventory.
- Cover significant Scope 1 and Scope 2 activities.
- Initiate Limited Assurance verification.
- Disclose information through appropriate channels.

2027

- Expand data collection and reporting coverage.
- Include more activities and organizational units.
- Begin collecting and assessing significant Scope 3 data.

2028

- Enhance data completeness and reliability.
- Report significant Scope 1–3 emissions.
- Obtain appropriate assurance.
- Use data to set targets and track reductions.

2. Decarbonization plan

Topic	GHG emissions in the base year	GHG emissions compared to the base year		
	2025	2026	2027	2028
Greenhouse gas (GHG) emissions reduction (tCO ₂ e)	30,700	3%	5%	7%

Note: Data as of 31 March 2026. GHG emissions for the 2025 base year are under consolidation and verification and may be subject to change upon completion of verification.

Strategic Initiative

Implementation of the e-Refer System for Patient Referrals within the Hospital Network

2026

- Develop and implement the e-Refer system across the network.
- Increase users by 10% compared to 2025.
- Reduce paper use in referrals.
- Support Scope 3 emission reduction.

2027

- Enhance and expand the e-Refer system across the network.
- Increase users by 15% compared to 2025.
- Continuously reduce paper use in referrals.
- Support Scope 3 emission reduction.

2028

- Expand the e-Refer system to all hospitals in the network.
- Increase users by 20% compared to 2025.
- Reduce paper use in referrals.
- Support Scope 3 emission reduction.

Risk Management

“User adoption and continuity of patient data risk”

Risk Characteristic

- Challenges in transitioning to digital systems.
- User adaptation and differences across departments.
- Incomplete integration of patient data.

Risk Impact

- Disconnected patient data affects quality of care.
- Reduced efficiency in resource management.
- Inability to achieve targets for reducing paper usage and redundant travel.

Risk Management Measures

- Design the system to be user-friendly and aligned with workflows.
- Provide continuous training and capacity building for staff.
- Implement access controls and ensure data protection.
- Establish data backup systems and a BCP to ensure business continuity.

2. Decarbonization plan

Strategic Initiative

Solar Cell Installation Project across the Hospital Network

2026

- Install additional solar systems across the network.
- Increase solar generation by $\geq 5\%$ vs. 2025 baseline.
- Reduce reliance on grid electricity.
- Support GHG reduction from energy use.

2027

- Expand solar installations across the network.
- Increase solar generation by $\geq 7\%$ vs. 2025 baseline.
- Increase the share of renewable energy use.
- Continuously reduce energy costs and GHG emissions.

2028

- Expand solar cell installations across the network.
- Increase solar generation by $\geq 10\%$ vs. 2025 baseline.
- Strengthen clean energy adoption.
- Support long-term GHG reduction targets.

Risk Management

Uncertainty in solar power generation performance and investment returns

Risk Characteristic

- Uncertainty from external factors such as solar irradiance.
- Equipment efficiency degrades over time.
- Technical and financial assumptions may be inaccurate.

Risk Impact

- Lower-than-expected electricity generation impacts Scope 2 emissions.
- Reduced financial returns affect project expansion.
- Impacts future investment and expansion decisions.

Risk Management Measures

- Conduct comprehensive feasibility studies for the project.
- Select standard technologies/equipment and experienced service providers.
- Install monitoring systems to track performance.
- Implement preventive maintenance plans.
- Regularly review financial assumptions.

2. Decarbonization plan

Strategic Initiative

Solar Cell Installation Project across the Hospital Network

2026

- Install additional solar systems across the network.
- Increase solar generation by $\geq 5\%$ vs. 2025 baseline.
- Reduce reliance on grid electricity.
- Support GHG reduction from energy use.

2027

- Expand solar installations across the network.
- Increase solar generation by $\geq 7\%$ vs. 2025 baseline.
- Increase the share of renewable energy use.
- Continuously reduce energy costs and GHG emissions.

2028

- Expand solar cell installations across the network.
- Increase solar generation by $\geq 10\%$ vs. 2025 baseline.
- Strengthen clean energy adoption.
- Support long-term GHG reduction targets.

Risk Management
