Part 1 Business Operations and Performance

1. Organizational structure and operation of the group of companies

1.1 Policy and business overview

1.1.1 Overview of the vision, objectives, goals and business strategies

Message from the chairman

In 2024, there is a growing trend among the public toward taking better care of health management and focusing on preventive healthcare particularly through comprehensive annual health check-ups and adopting lifestyle changes that promote longevity. Additionally, the continuous development of new medical technologies will significantly assist doctors and healthcare professionals in diagnosing and planning patient treatments with greater precision. This will also enhance the effectiveness of medical care. In line with this, BCH has commenced operations at Kasemrad Ari Radiation Oncology Clinic, which has been certified with the ISO 9001:2015 standard for radiation therapy services. The clinic is equipped with state-of-the-art equipment designed to improve treatment outcomes together with minimize side effects for cancer patients. Initially, BCH will provide services to patients under the social security scheme to reduce the cost of referring patients to hospitals outside the network, with plans to expand services to other patient groups in the near future. Furthermore, BCH has partnered with various companies and government sectors to launch mobile annual health check-up units. These units aim to detect early-stage health risks or abnormalities, allowing for timely interventions that can prevent the progression of diseases and enable prompt treatments. To complement the mobile health check-up services, BCH has also launched mobile dental units that will serve in five provinces: Bangkok, Nonthaburi, Pathum Thani, Nakhon Ratchasima and Rayong. This initiative is designed to expand proactive dental services to patients at all levels.

For the hospitals under Kasemrad network, Kasemrad International network, World Medical Hospital and Karunvej Hospital, across its 15 branches and 2 polyclinics, we are dedicated to continuously enhancing the quality and standards of our services. This is achieved through the expansion of specialized medical centers such as WMC New Frontier Cancer Center providing alternative cancer treatment, comprehensive heart center offering services for referral patients in Chachoengsao and surrounding provinces and Kasemrad Plastic Surgery (KPS) for aesthetic surgeries. Additionally, we have made significant improvements to hospital facilities to optimize service areas and attract new patient groups, particularly at Kasemrad Hospital Prachachuen, Kasemrad Hospital Pathumthani and Kasemrad Hospital Bangkai. In 2024, BCH provides 684 examination rooms, an increase of 12.9 percent as well as 2,323 licensed beds, an increase of 3.1 percent compared to the previous year.

Despite the adverse impact on revenue from international patients, particularly from Kuwaiti patients who have deferred seeking treatment in other countries, as well as the reduction in revenue from complex treatments (RW>2) under social security scheme. BCH has reported total revenue of 11,832.4 million Baht, which is similar to the previous year. The increase in revenue mainly comes from outpatient services for both Thai and foreign patients, particularly from CLMV¹ patients, which rose by 9.9 percent. This growth is partially attributed to newly opened hospitals, including Kasemrad International Hospital Aranyaprathet, Kasemrad International Hospital Vientiane, Kasemrad Hospital Sriburi, and Kasemrad Hospital Maesai, which is strategically located near the Maesai and Tachileik area, adjacent to the Thai-Myanmar border. The company reported earnings before interest, taxes, depreciation and amortization (EBITDA) of 2,708.7 million Baht, a decrease of 6.7 percent compared to the previous year, with an EBITDA margin of 22.9 percent. The net profit attributable to the company amounted to 1,282.4 million Baht, reflecting an 8.8 percent decline from the previous year. The company achieved a net profit margin of 10.8 percent. Excluding the non-recurring items, the company's normal operations would have reported a net profit of 1,411.3 million Baht, with a net profit margin of 11.7 percent, which is similar to the previous year's performance.

In addition to conducting business, the Company be aware of the importance of sustainability activities aiming to create positive impacts on the community, society and the environment. This includes employee engagement and collaboration with business partners in the supply chain. BCH is dedicated to strengthening in all aspects such as promoting the use of renewable energy, effective waste management, community healthcare and the enhancement of medical personnel and staff to strengthen the organization internally. The company has been recognized by several leading organizations for its sustainability measure and corporate governance, receiving an "AA" in SET ESG Rating from the Stock Exchange of Thailand. BCH is also a member of the Thai Private Sector Collective Action Coalition Against Corruption (Thai CAC), has been certified with an "Excellent" corporate governance rating from the Thai Institute of Directors (IOD) and has achieved a 100 percent rating for six consecutive years in the shareholder meeting quality assessment program. The company has also been ranked for its outstanding ESG performance by the

Thaipat Institute. Furthermore, BCH has been assigned an "A" credit rating with a "Stable" outlook by TRIS Rating, reflecting the company's strong financial statement.

In conclusion, on behalf of Bangkok Chain Hospital Public Company Limited, the Board of Director would like to share my gratitude to shareholders, customers, financial institutions, government and private agencies, including all business partners for your trust and support as always. The Company will be dedicated to conducting business based on building long-term value with fairness under the principles of good corporate governance.

Note: ¹ CLMV patients is the patients from Cambodia, Laos, Myanmar, and Vietnam.

Image Message from the chairman

Vision

To be one of the leaders in healthcare industry, both domestically and in the Southeast Asian region.

Objectives

The Company operated its business as a group of hospitals which consists of fifteen hospitals, two polyclinics, and one Kasemrad ARI Radiation Oncology Clinic in Bangkok ,upcountry and Laos to provide medical services in the level of primary-tertiary care under four hospital groups; 1.World Medical Hospital Group 2.Kasemrad International Hospital Group 3.Kasemrad Hospital Group 4.Karunvej Hospital Group, to provide medical service for general patients both Thai and International patient and Social Security Patients.

Goals

The company operates its business with ethics, transparency, reliability and fair treatment of all stakeholders as well as adhere to a good audit system by taking into account the surrounding society in order to create a concrete standard in business operations.

Business strategies

The company and its affiliated hospitals are committed to continuously improving the quality and standards of service to cover all areas. This aims to enhance the quality of life of people in nearby areas, as well as elevate the technological service standards in the affiliated hospitals. with the following strategies:

1. Operating as a Hospital Group and Building Partnerships for Enhanced Service Efficiency, the Company operates in the form of a hospital group with a total of 15 hospitals 2 polyclinics and 1 Kasemrad ARI Radiation Oncology Clinic, catering to a diverse customer base. Furthermore, the Company has established specialized medical centers providing diagnostic services not only to its network hospitals but also to patients from over 40 partner hospitals nationwide.
2. Revenue from Diverse Customer Base and Consistent Revenue from the Social Security Fund Program, the Company's strategy of offering medical services to a wide array of customer groups, including general clients and those under government programs, results in a robust and stable revenue structure.
3. Administration and Management, the Company adopts a group-based hospital management policy, utilizing a unified approach from the corporate level to ensure consistent management across all hospital branches. Beyond this group-wide policy,

the Company has also embraced a knowledge-sharing strategy in management. This approach allows each hospital within the network to benefit from the effective management practices of others, leading to optimal outcomes.

4. Medical Specialists and Support Team, all 15 hospitals are well-equipped with specialized medical professionals across various fields. The hospitals are staffed with nurses and assistant nurses trained in relevant specialties, and operational and medical support staff.

5. Doctor and Personnel Training, the Company consistently organizes training sessions for doctors and nurses, both internally within its hospital network and through external educational institutions.

6. Advanced Medical Equipment and Tools, the Company is committed to equipping its facilities with high-tech and efficient medical tools and equipment, enhancing the accuracy and precision in disease treatment.

7. Service Quality Standards Recognizing the importance of service quality, the Company continually strives for improvement. It adheres to the Hospital Accreditation standard in Thailand, and meets the international standards set by the Joint Commission International (JCI).

Mission

- We are committed to providing trusted health services, aiming to make our hospital the first choice for patients.
- We focus on nurturing our personnel to be capable and responsible in their roles and towards patients.
- In collaboration with business partners, we strive to enhance various aspects of efficiency for shared success.
- Our management practices are anchored in professionalism and good governance, fostering positive relationships within society and communities.

1.2.2 Information on products and services

1.2.2.1 Product/service information and business innovation development

Operating private hospitals under the names

World Medical Hospital (“WMC”); Kasemrad International Hospital (“KIH”); Kasemrad Hospital (“KH”); and Karunvej Hospital (“KV”)

1. Forms of Products and Services

The Company categorizes its products and services in the following manner:

1.1 World Medical Hospital Group (WMC)

- This group caters to general patients, including both Thai and international patients.
- It offers tertiary medical services, which involve highly complex medical procedures. Additionally, the group operates specialized medical centers utilizing modern technologies, such as centers for sleep apnea treatment, infertility treatment, diabetic wound center, and WMC New frontier cancer center. These services cater to patients referred from within the network hospitals and other partner hospitals nationwide.

1.2 Kasemrad International Hospital Group (KIH)

- This group caters to general patients, including both Thai and international patients.
- It provides secondary medical services and certain tertiary services. Examples include neurology and stroke centers, as well as orthopedic and joint surgery centers, Heart Center, and Diagnostic Radiology Center

1.3 Kasemrad Hospital Group (KH)

- The group serves both general patients and those under Social Security Scheme.
- It offers secondary medical services and some tertiary services, such as Heart Center and Imaging Center.

Kasemrad Medical Center (KHMC) operates as a specialized center for tertiary care, offering highly complex medical services. It caters to patients referred from the Kasemrad Hospital Group, Karunvej Hospital Group, and other partner hospitals nationwide.

The center includes specialized medical units like:

- Heart Center
- Cath Lab Center
- Lasik and Eye Center
- Imaging Center
- Cancer Center
- Diabetic Wound Center

Kasemrad Community Clinic (KCC) represents the Company's community clinic division. It includes polyclinics offering primary and secondary medical services (out-patient services) in Chiang Saen District, Chiang Rai Province, and the Kasemrad Medical and Dental Clinic Saraburi in Hin Kong Subdistrict, Nong Khae District, Saraburi Province. Additionally, the Company provides primary care clinic services in Nichada Thani Village, Nonthaburi Province, and at the National Science and Technology Development Agency (NSTDA) in Pathumthani Province.

Kasemrad Better Life (KH Better Life) is a center dedicated to health enhancement and alternative medical services, including:

- Aesthetics Center
- Dental Center
- Cosmetic Surgery Center (Kasemrad Plastic Surgery: KPS)
- Wellness Center
- Traditional Thai Medicine Center
- Traditional Chinese Medicine Center
- Regenerative Medicine Center

1.4 Karunvej Hospital Group (KV)

- This group caters to general patients as well as those under Social Security Scheme, offering secondary medical services.

2. Scope of Medical Services

The hospital group employs full-time and consultant physicians for the examination and treatment of various diseases in both general and specialized fields, as follows:

2.1 General and Specialized Medical Treatment Centers

Internal Medicine Clinic: It offers a range of specialties in addition to general internal medicine. The Company has also established a comprehensive medical service center to provide integrated services and convenience for patients.

- Internal Medicine for Respiratory Diseases
- Internal Medicine for Neurology
- Internal Medicine for Arthritis & Rheumatology
- Internal Medicine for Infectious Diseases
- Internal Medicine for Hematology
- Internal Medicine for Gastrointestinal Diseases
- Internal Medicine for Pulmonary Diseases
- Diabetes Center
- Wellness Center
- Hemodialysis Center
- Rehabilitation Center of COVID-19 Patients

Surgical Department: The Company has established specialized surgical centers equipped with advanced medical technologies, such as laparoscopic surgery.

- General Surgery
- Neurosurgery
- Gastrointestinal Surgery
- Spine Surgery Center
- Plastic (Cosmetic) Surgery
- Pediatric Surgery
- Cardiovascular Surgery

Obstetrics and Gynecology Department: In addition to providing antenatal care and childbirth services, the Company has established a Women's Health Center. This center specializes in health care services for women, including menopause clinic, infertility clinic, women's oncology and cancer clinic, and gynecological laparoscopic surgery clinic.

Pediatrics Department: The Company provides specialized pediatric care with pediatricians in various sub-specialties, including:

- Newborn Pediatrics
- Pediatric Respiratory Diseases
- Pediatric Infectious Diseases
- Pediatric Psychology
- Pediatric Development

2.2 Other Specialized Medical Centers

Orthopedic Department: It offers care for muscles, ligaments, bones, and joints. It provides various bone and joint surgeries, including procedures using an arthroscope for hip and knee replacement surgeries.

Ear, Nose and Throat Department: It provides both medical and general surgical treatments, such as tonsillectomies, specialized treatments for snoring, and laser treatments for vocal cord adjustment to modify voice pitch.

Lasik and Eye Center: It offers laser treatments for diabetic retinopathy, retinal tears, and glaucoma. Services include computerized eyesight measurement, intraocular lens replacement surgeries for glaucoma, and LASIK surgeries for correcting nearsightedness, farsightedness, and astigmatism. The center also functions as a referral hub, similar to the Heart Center.

Infertility Treatment Center: This is a comprehensive center equipped with modern assisted reproductive technologies, high-standard laboratories, and a team of medical experts specializing in infertility treatment.

Heart Center and Cardiac Catheterization Center: These centers offer a full range of diagnostic and treatment services for heart diseases, including cardiac catheterization and open-heart surgery. Services are provided at several locations, including Kasemrad Hospital Prachachuen, Kasemrad Hospital Bangkai, Kasemrad Hospital Sriburi, World Medical Hospital, Kasemrad International Hospital Rattanaibeth, Kasemrad Hospital Ramkhamhaeng, Kasemrad Hospital Chachoengsao, Kasemrad International Hospital Vientiane, and Kasemrad International Hospital Aranyaprathet.

Diabetic Wound Care Center: Professional care is provided by a highly experienced team of medical specialists for diabetic wounds, infected wounds, and chronic wounds. The center utilizes modern treatment technologies like Versajet debridement for hydrosurgery, Hyperbaric Oxygen Therapy, and Ultra Sonic tissue debridement. It is equipped with facilities specifically designed for the effective and appropriate treatment of individual diabetic patients.

Cancer Center: The center offers comprehensive services from screening and diagnosis to chemotherapy, managed by specialists and a medical support team. This includes the Kasemrad Ari Radiotherapy Cancer Center Clinic in Nonthaburi Province, providing cancer treatment with radiotherapy, and serving as a referral center for general patients and those under Social Security Scheme.

HIFU (High-Intensity Focused Ultrasound) Treatment Center: This center offers treatment for malignant tumors, uterine fibroids, and provides services for liver and pancreatic cancer, as well as other solid cancers.

2.3 Health and Beauty Rehabilitation Medical Centers

Alternative Medical Center: This center offers alternative treatments for health restoration, including Regenerative Medicine Center, Traditional Thai Medicine Center, and Traditional Chinese Medicine Center.

Aesthetics Center: Led by a team of expert medical professionals, this center uses laser technology for treating various skin abnormalities such as acne, melasma, freckles, skin tightening, under-eye bag removal, and laser-assisted double eyelid surgery.

Comprehensive Wellness Center: It offers a variety of health check-up packages tailored to different lifestyles and age groups, including packages that do not require fasting.

Cosmetic Surgery Center: The center is staffed by a team of highly skilled and experienced plastic surgeons.

Comprehensive Dental Center: It provides a full range of dental services with a team of specialized experts.

- Pediatric Dentistry

- Prosthetic Dentistry (Dentures)

- Root Canal Treatment

- Dental Implants

- Aesthetic Dentistry: It offers various services to meet customer needs, including Veneers, White Smile Laser teeth whitening, Orthodontics, Crystal Implants, and Fang Creation.

Kasemrad Plastic Surgery Center: It features a team of specialized and experienced doctors in surgery and medical procedures, such as breast surgery, rhinoplasty, and bariatric surgery for weight loss. This service is a collaboration between Kasemrad Hospital and the medical team, available at Kasemrad International Hospital Rattanaibeth and Kasemrad Hospital Ramkhamhaeng.

2.4 Other Medical Departments and Support Services

Psychiatry Department: It offers consultations and treatment for psychiatric illnesses, stress, behavioral control issues, and emotional and mental problems for both children and adults.

Forensic Department: It conducts autopsies to determine causes of death.

Intensive Care Unit (ICU): This dedicated area is staffed by experienced doctors and nurses and equipped with modern tools and regular checks for accuracy in treatments and diagnoses. Isolation rooms for infectious patients are also included.

Cardiac Care Unit (CCU): It is equipped with modern medical facilities and technologies.

Emergency Department: It provides 24-hour services for emergency accident patients, staffed by doctors and medical personnel.

Central Sterile Supply Department: It ensures medical tools and equipment are sterile.

Medical Record Department: The Company maintains patient data in a computerized system for convenient access by patients and doctors, aiding in future diagnosis and treatment. It utilizes an air duct document delivery system for efficiency.

Laboratory Department: This department conducts analyses of blood, urine, feces, tissue samples, pathology, anatomical pathology, and cytopathology to aid in diagnosis and treatment follow-up. Utilizing high-tech, internationally-standardized equipment and tools, the department also functions as a blood bank, providing reserves for emergency treatments, supported by the Thai Red Cross Society.

Radiology Department: It specializes in disease diagnosis using radiological and sonographic technologies. This includes general X-rays, digital fluoroscopy X-rays, ultrasound mammograms, and CT scans. The high-tech equipment enhances diagnostic precision and treatment monitoring. Additionally, the department has established an MRI service center and X-Ray Single Plane/ Bi Plane machines for 3D diagnostics and treatment of neurological and cerebrovascular conditions.

Physical Therapy Center: It comprises a team of medical professionals and physical therapists, equipped with modern rehabilitation tools. They focus on restoring patients' abilities to their optimal level with minimal disability. Technologies such as rehabilitation robots are employed alongside health promotion programs like hydrotherapy, suitable for children, pregnant women, and the elderly.

Nutrition and Dietetics Department: This department is responsible for preparing patient meals in line with medical treatments, maintaining quality, cleanliness, and hygiene standards. Additionally, nutritionists are available to provide dietary consultations to patients and their families, tailoring advice to align with medical treatments.

Ambulance: The Company maintains a fleet of well-equipped ambulances, staffed by trained personnel ready to provide patient care during transit. These ambulances are available around the clock for emergency medical services.

Mobile Check-up: The service is operated by Kasemrad International Hospital Rattanaibeth, Kasemrad Hospital Bangkai, Kasemrad Hospital Saraburi, Kasemrad Hospital Sriburi, Kasemrad Hospital Prachinburi, Kasemrad Hospital Ramkhamhaeng, Kasemrad Hospital Chachoengsao, and Kasemrad International Hospital Vientiane. Mobile Check-up is equipped with medical tools for health screenings, including blood analysis, chest x-rays, ultrasound, E.K.G., hearing tests, vision tests, and automated corneal curvature measurements. It provides a convenient alternative for workplace health screenings, eliminating the need for employees to visit the hospital for these services.

3. Dedicated Training Center for Doctors and Medical Personnel

The hospital groups under the Company offer training programs to doctors and medical personnel both within its network and externally. These programs help broaden the Company's recognition and contribute to the development of its own personnel.

3.1 Aesthetics Center: It offers training in laser treatment techniques for doctors both within and outside the hospital network.

3.2 Heart Center: It provides various training courses for medical personnel both within and outside the hospital network, including:

- Critical Cardiac Care Training (CCCT) for nurses
- Advanced Cardiac Life Support (ACLS) and Pediatric Advanced Life Support (PALS Provider Course)
- Pediatric Critical Cardiac Care Training (PCCT) for nurses
- Concise Cardiology

3.3 X-ray and Diagnostic Imaging Center: It conducts training courses for medical personnel both within and outside the hospital network, such as Comprehensive CTA Coronary Artery course.

3.4 Practical Training Courses: These include Advanced Cardiovascular Life Support (ACLS) for nurses, Basic Life Support (BLS) for staff, and the Pediatric Advanced Life Support (PALS Provider Course).

3.5 Other Training Programs: These cover various topics, such as drug management in the workplace, caring for patients with suicidal tendencies and self-harm prevention in hospitals, the Personal Data Protection Act (PDPA) course to ensure compliance with personal data protection laws, and the Excellent Service Behavior (ESB) training to improve service quality and patient satisfaction.

1.2.2.2 Marketing policies of the major products or services during the preceding year

Last Year's Marketing Policies for Key Products and Services

The company remains committed to maintaining high service quality standards by continuously improving medical service quality and enhancing the capabilities of medical personnel. This includes acquiring high-tech and efficient medical equipment to ensure accurate diagnoses, opening new medical centers within affiliated hospitals, launching the Kasemrad ARI Radiation Oncology Clinic, and providing mobile dental services. These initiatives aim to enhance service capabilities and expand the patient base to cover all healthcare entitlements. Additionally, the company is improving hospital environments to create a positive experience and ensure patient satisfaction at all levels.

The company and its network hospitals have continuously revised their operational strategies to provide efficient and timely medical services. By aligning with the guidelines of the Social Security Office, which cover the treatment of general diseases as well as highly complex specialized conditions, the company has maintained strong and consistent performance. This has also helped build awareness and trust in the company and its affiliated hospitals, making them more widely recognized among customers.

This year, Kasemrad Hospital Prachachuen received the "Most Preferred Hospital Award 2024" from the Social Security Office. Additionally, the company focuses on expanding hospitals and specialty medical centers into areas with high potential, catering to the diverse needs of both local and international patients. Moreover, the Company and its network hospitals have developed competitive strategies as follows:

- Competitive Strategies

1. Operating as a Hospital Group and Building Partnerships for Enhanced Service Efficiency

The Company operates in the form of a hospital group with a total of 15 hospitals 2 polyclinics and 1 Kasemrad ARI Radiation Oncology Clinic, catering to a diverse customer base. Furthermore, the Company has established specialized medical centers providing diagnostic services not only to its network hospitals but also to patients from over 40 partner hospitals nationwide. These centers provide tertiary medical services for referred patients like Heart Center and Cardiac Catheterization Center, Lasik and Eye Center, Imaging Center, Cancer Center, Diabetic Wound Care Center, and Kasemrad ARI Radiation Oncology Clinic

The Company charges reasonable fees for services provided to patients referred from partner hospitals, ensuring prompt treatment and surgeries. This not only increases the Company's revenue but also ensures efficient utilization of various medical tools and equipment.

2. Revenue from Diverse Customer Base and Consistent Revenue from the Social Security Fund Program

The Company's strategy of offering medical services to a wide array of customer groups, including general clients and those under government programs, results in a robust and stable revenue structure. A significant portion of the revenue comes from services provided to the Social Security Fund Program. The Social Security Office covers patient costs as per legal and governmental policies. This approach allows the Company to effectively utilize its medical resources, including medical and nursing staff, medical equipment, and patient beds.

3. Administration and Management

The Company adopts a group-based hospital management policy, utilizing a unified approach from the corporate level to ensure consistent management across all hospital branches. Beyond this group-wide policy, the Company has also embraced a knowledge-sharing strategy in management. This approach allows each hospital within the network to benefit from the effective management practices of others, leading to optimal outcomes. Additionally, the Company's top executives play a significant role in national healthcare administration, including holding the position of President of the Private Hospital Association. This involvement provides them with extensive experience in hospital administration.

The Company employs a flexible organizational management style. This adaptability enables the Company to efficiently respond to shifts in economic and social conditions. Examples of this approach include joining as a healthcare provider under the Social Security Act in 1992, establishing specialized medical centers to reduce patient referral costs to other hospitals, and expanding revenue streams by serving as a high-level medical facility (Supra Contractor). The Company's timely collaboration with the government in providing COVID-19 related medical services and the continual improvement of service efficiency across its hospital network through flexible management has contributed to the Company's sustained growth and responsiveness to changing circumstances.

4. Medical Specialists and Support Team

As of December 31, 2023, the Company's network of 15 hospitals is well-equipped with specialized medical professionals across various fields, including 1,858 doctors. The hospitals are staffed with 3,118 nurses and assistant nurses trained in relevant specialties, and 3,936 operational and medical support staff.

5. Doctor and Personnel Training

The Company consistently organizes training sessions for doctors and nurses, both internally within its hospital network and through external educational institutions.

6. Advanced Medical Equipment and Tools

The Company is committed to equipping its facilities with high-tech and efficient medical tools and equipment, enhancing the accuracy and precision in disease treatment and diagnosis.

7. Service Quality Standards

Recognizing the importance of service quality, the Company continually strives for improvement. It adheres to the Hospital Accreditation standard, which is the highest standard of service, and meets the international standards set by the Joint Commission International (JCI).

Additionally, Key Performance Indicators (KPIs) are utilized to assess service quality, focusing primarily on patient needs and satisfaction. The Company also advocates the use of information technology systems to streamline patient services, enabling faster and more efficient care, and to provide beneficial communication and information post-service.

- Characteristics of the Company's Customers

1. General Customer Group

1.1 General Patients: This group comprises individuals who independently seek hospital services, including both Thai and foreign nationals. These patients are entirely responsible for their medical expenses. Typically, they are health-conscious and seek quality healthcare and good quality of life. The hospital caters to this demand by offering alternative medical center services.

1.2 Corporate Contract Group: Embassy Group refers to employees or officials from various organizations whose parent agencies have contracts with the hospital. These agreements provide medical benefits to employees and their families, with services accessible under specific terms. Additionally, this group covers insurance company clients, where the insurer has an agreement with the hospital to cover medical expenses, including treatments under the Third Party Insurance Act. The hospital generally bills the contracting companies directly as per the agreement terms.

1.3 Compensation Fund Group: This service caters to employees from various companies or factories under the compensation fund's conditions, primarily addressing work-related injuries. The hospital manages claims and reimbursements from the compensation fund for these cases.

1.4 Civil Servant Medical Welfare Project Group: This is a government-provided welfare scheme for civil servants and their families, covering both out-patient and in-patient services in all government hospitals. Recently, this welfare has extended to include private hospitals, offering more accessible and convenient service options and reducing congestion in government hospitals. The Comptroller General's Department pays the hospital for medical expenses on behalf of the civil servants. Network hospitals participate in this scheme in response to the welfare expansion, aiding the Company in constantly expanding its customer base within the civil servant segment, aided by the hospitals' strategic locations.

2. Social Security Scheme

The Social Security Fund Program Group comprises employees from various establishments who contribute monthly to the Social Security Fund. These customers are entitled to medical services when ill, at their chosen hospitals, under certain conditions and at no cost as stipulated by the Social Security Act B.E. 2535 (1992). The Social Security Office, under the Ministry of Labour, bears the medical costs on behalf of the insured persons in a lump-sum arrangement for general out-patient cases, and payments for in-patients are based on the severity of the illness. All 9 Kasemrad Group hospitals and 1 Karunvej Hospitals participate in this scheme.

Moreover, the Company has designated Kasemrad Hospital Prachachuen, Kasemrad Hospital Bangkai, Kasemrad Hospital Sriburin, Kasemrad Hospital Ramkhamhaeng, World Medical Hospital, and Kasemrad International Hospital Rattanaibeth as referral centers for comprehensive heart disease treatment. Treatment and corrective eye surgery using laser technology are provided at Kasemrad Hospital Prachachuen and World Medical Hospital. Furthermore, Kasemrad Hospital Sriburin, World Medical Hospital, Kasemrad Hospital Ramkhamhaeng, Kasemrad International Hospital Rattanaibeth, Kasemrad Hospital Chachoengsao, and Kasemrad International Hospital Aranyaprathet also have MRI Center for receiving patient referrals from partner hospitals under the Social Security Fund Program.

The hospital's customer base is diverse, with each group having unique characteristics. The hospital group, therefore, provides various tailored services to meet the specific needs of each consumer segment, aiming to enhance its service expansion potential and operational efficiency.

- Service Provision

In addition to offering comprehensive medical services across all specialties, the Company also proposes a diverse and continuous range of services beyond general medical care. These holistic services include health check-ups and disease prevention, rehabilitative and physical therapy services, and specialized patient consultations. Additionally, organizing special events for targeted groups on various occasions helps the Company to grow its customer base and contributes to a portion of the hospital's revenue. Moreover, the Company has a marketing strategy to offer targeted medical services tailored to individual patient needs, enhancing service quality and patient satisfaction for those who regularly utilize hospitals in the network.

- Medical Treatment Pricing Policy

For general customers, contractual clients, and those under the compensation fund, the Company sets prices primarily based on costs to ensure fairness to consumers and offers group-specific discounts. The medical fees charged to patients are allocated to the treating physicians as per the agreed rates. The Company also establishes payment terms with members and contractual

partners. Importantly, the Company avoids price competition with its rivals. Additionally, it employs a pricing policy aligned with the income levels of its target demographic, ensuring competitiveness with other private hospitals in the same vicinity. Customers consider medical expenses in relation to the quality of services received and the proficiency of the hospital's medical professionals.

For specific treatments like surgeries, childbirth, and annual health check-ups, the Company has instituted all-inclusive package pricing. This approach simplifies expense management for customers and aids in their decision-making, providing a clear understanding of the expected medical costs.

For customers under Social Security Fund Program, the Social Security Office under the Ministry of Labour is responsible for disbursing payments for medical services and treatments for the insured persons to the hospital. This includes several reimbursement mechanisms:

(1) Flat-rate Medical Service Fees: These are paid based on the number of insured persons registered to utilize services at network hospitals.

(2) Outlier Reimbursement Schedule (ORS): This applies to in-patient medical services for diseases with exceptionally high treatment costs, such as heart surgery, cancer, diabetes, and expensive medical supplies.

(3) Risk-adjusted Medical Service Rates: This involves reimbursements for out-patient treatments for 26 chronic diseases.

(4) Adjusted Relative Weight Rates: This is for in-patient treatments where the relative weight value, adjusted based on the length of stay, is greater than or equal to 2.

(5) Collaborative Medical Services with the Social Security Office: This is targeted at 5 groups of diseases: cardiovascular disease, stroke, breast cancer, myomectomy, and kidney and gall bladder stone.

(6) Dental services and the health check-up program at the hospital and through mobile health check-ups.

The funds for items (2) to (4) depend on the service burden incurred, as budgeted and conditioned by the Social Security Office. Additionally, item (5) represents a pilot project initiated by the Social Security Office starting January 1, 2023, with a review for renewal every 6 months. Furthermore, item (6) the fund reimbursement for dental services depends on the actual service but not more than 900 baht per insured person per year.

- Sales and Distribution Channels

The Company operates a network of 15 patient-serving hospitals, strategically located across diverse areas. There are seven hospitals in Bangkok and its suburbs, seven in other provinces, one in Lao PDR, one polyclinic in Chiang Saen, Chiang Rai Province, and one in Nong Khae District, Saraburi Province, one Kasemrad ARI Radiation Oncology clinic in Pak Kret District, Nonthaburi Province.

Key distribution channels include functioning as a higher-level medical facility (Supra Contractor) to facilitate patient referrals from local clinics, general private hospitals, and government hospital partners referring patients under the Social Security program.

(1) World Medical Hospital, Kasemrad International Hospital Rattanaibeth, Kasemrad International Hospital Aranyaprathet, Kasemrad International Hospital Vientiane, Kasemrad Hospital Bangkai, Kasemrad Hospital Sriburi, Kasemrad Hospital Prachachuen, Kasemrad Hospital Chachoengsao and Kasemrad Hospital Ramkhamhaeng serve as referral centers for heart surgeries. Specifically, Kasemrad Hospital Prachachuen, Kasemrad Hospital Bangkai, and Kasemrad Hospital Sriburi are registered with the Social Security Office as referral bases for heart diagnosis and surgery for patients under the Social Security Scheme.

(2) Kasemrad Prachachuen Hospital and World Medical Hospital serve as referral centers and specialize in vision correction surgeries using laser technology.

(3) Kasemrad International Hospital Rattanaibeth, Kasemrad Hospital Sriburi, Kasemrad Hospital Chachoengsao, Kasemrad Hospital Bangkai, Kasemrad Hospital Ramkhamhaeng, Kasemrad International Hospital Aranyaprathet, World Medical Hospital, and Kasemrad International Hospital Vientiane serve as centers for advanced diagnostic imaging (MRI or CT scan) for both network hospitals and partner hospitals.

Moreover, the location of each branch of the Company's hospitals is strategically situated in community areas, along major roads, ensuring easy access and travel. The buildings stand out architecturally, emphasizing a setting that provides an inviting atmosphere. The interiors are meticulously designed to be both clean and aesthetically pleasing, with a well-planned layout of the usable space to enhance comfort and leave a lasting impression on patients receiving treatment. These locations are in areas identified as underserved in terms of medical facilities relative to the local population, making them accessible distribution channels for consumers. Additionally, the hospital offers a mobile health check-up service, providing a convenient health screening option for employees at their workplaces.

- Promotional Strategies

Even though the private hospital industry faces restrictions in advertising and promotional activities, regulated by professional bodies like the Medical Council of Thailand and subject to legislation in regard to advertising such as the Health Facility Act B.E. 2541 (1998) and the Consumer Protection Act, and the announcement of the Department of Health Service Support on criteria, methods, conditions, and expenses for advertising or publicizing healthcare facilities, B.E. 2562 (2019), competition has intensified. Hospitals increasingly vie for market shares both domestically and internationally. Therefore, the hospital group has endeavored to organize activities that are both attractive to customers and compliant with the various regulations.

The industry competition during the preceding year

Market Dynamics and Competitive Landscape

- Industry Trends and Future Competitive Outlook

The private hospital sector is increasingly characterized by group-based competition, as hospitals have formed alliances for efficient cost and resource management, enhancing their competitiveness for both domestic and international patients.

In the long term, private hospitals are expected to see robust growth, supported by an increasing demand for health-related services. This demand is driven by heightened health awareness and the rising prevalence of complex diseases, particularly as Thailand becomes an aging society. Consumers increasingly seek medical services that are not only of high standards but also conveniently accessible. Additionally, the sector is witnessing competition in medical equipment, tools, and new innovations, especially in Health-Tech, including applications and products related to health care. Areas like telemedicine are gaining prominence in the medical industry. This scenario presents private hospitals with opportunities to enhance service efficiency and explore new avenues for providing comprehensive health care to patients.

- Competitive Landscape and Capabilities

Each branch of our hospital network faces competition from medical facilities within a 20-kilometer radius, as well as from reputable hospitals beyond this area that have earned special trust from patients. However, our hospital group holds several competitive advantages:

1. Our hospitals are staffed with highly skilled and specialized medical professionals who are well-recognized and respected in their fields.
2. We provide a range of services that extend beyond standard medical care, including comprehensive additional services.
3. Our hospitals are equipped with a wide array of medical tools and equipment. We have a substantial number of examination rooms and beds, designed to comfortably accommodate both out-patients and in-patients. Our facilities are also notable for their clean, aesthetically pleasing interiors. The well-planned layout is aimed for the convenience.
4. Situated in community hubs and easily accessible areas, our hospitals are well-positioned to attract patients. This accessibility also makes our hospitals attractive workplaces for talented medical professionals.
5. We strategically set our medical treatment prices to align with the income levels of our target customer groups, ensuring affordability while remaining competitive in the market.

- Challenges in Operating a Private Hospital Business

1. There is a deficiency in the number of medical professionals who are both skilled and renowned in their fields. This creates a competitive environment where private hospitals vie for such personnel through attractive compensation packages. This scarcity of expert medical staff is a significant constraint in the industry.
2. Private hospitals require substantial investment, particularly in medical equipment and tools, and also need considerable working capital for medicines, medical supplies, and consumables. Effective financial planning is therefore crucial for the business operations.
3. When dealing with serious illnesses, patients tend to prioritize the capability and reputation of medical professionals over other factors. Consequently, new private hospitals must invest time in developing their quality of service and building a trustworthy reputation to attract and retain patients.
4. Fluctuating health care regulations significantly impact smaller or newly established private hospitals.
5. Private hospitals must adhere strictly to the Ministry of Health's notifications on advertising, as outlined in the Health Facility Act B.E. 2541 (1998) and the announcement of the Department of Health Service Support on criteria, methods, conditions, and expenses for advertising or publicizing healthcare facilities, B.E. 2562 (2019), in the advertisement of health-related products and services.
6. Amendments in the regulations set by the Medical Council of Thailand can have a significant impact on both current and future business operations.

1.2.2.3 Procurement of products or services

Operating as a hospital group provides the Company with significant advantages in terms of economies of scale in purchasing, as well as efficient inventory management. This is facilitated by a centralized purchasing department responsible for procuring drugs, medical supplies, and equipment for all hospitals in the group. Such a consolidated approach to procurement increases the volume of purchases compared to individual hospital purchases, thereby enhancing the Company's bargaining power in terms of pricing and trade conditions with suppliers. Consequently, the Company benefits from increased discounts compared to the purchasing contracts of individual hospitals. Additionally, the Company adopts a policy of inter-hospital borrowing of medical equipment, medications, medical supplies, blood, and blood components. This strategy ensures optimal resource utilization and minimizes the issue of stock expiration. Moreover, to modernize and streamline its operations, the Company has established a subsidiary, Health Chain Innotech Company Limited. This subsidiary focuses on developing software systems for the group's hospitals, aiming to upgrade system capabilities, facilitate data integration with other operational systems, and reduce reliance on external companies, including the operation of medical laboratory businesses under Bangkok Chain Management to reduce the cost of referrals to hospitals or external Laboratory outside the hospital network.

1.2.2.4 Assets used in business undertaking

Core permanent assets

The assets used in the business operations, valued at their net book value as of December 31, 2024, are detailed as follows:

1. Land, Building, and Equipment

Details on the Company's obligations in key assets for business operation, as of December 31, 2024, are as the table below:

2. Investment Property

Details on the Company's obligations in Investment property, as of December 31, 2024, are as the table below:

3. Right-of-Use Assets Details as shown in the table:

4. Goodwill

As of December 31, 2024, the Company and its subsidiaries recognized goodwill arising from external investment acquisitions aimed at restructuring business operations within the group. This goodwill, totaling 329.38 million baht, was acquired from entities including Rattanaibeth General Hospital Company Limited, Saraburi Watchakit Company Limited, Sriburin Hospital Company Limited, Navanakorn Medicare Company Limited, and Sothon Vejchakit Company Limited. The Company modified its accounting policy for goodwill from January 1, 2008 onwards, deciding against goodwill amortization and opting instead for regular impairment reviews at each fiscal period end.

Investment policy in the subsidiaries and associated companies

Investment policy in the subsidiaries and associated : Yes
companies

As of December 31, 2023, the Company had made significant investments in its subsidiaries. It holds a controlling interest or owns more than 50 percent of the shares in 10 companies. The total investment value, calculated using the cost method, is approximately 3,167.21 billion baht. This represents about 18.23 percent of the total assets of the Company. The subsidiaries and their respective shareholdings are as follows:

1. **Rattanatibeth General Hospital Co., Ltd.** operated Kasemrad International Hospital Rattanatibeth. Shareholding Ratio 72.73%
2. **Saraburi Watchakit Co., Ltd.** operated Kasemrad Hospital Saraburi and Kasemrad Medical and Dental Clinic Saraburi. Shareholding Ratio 59.92%
3. **Sriburin Hospital Co., Ltd.** operated Kasemrad Hospital Sriburin, Kasemrad Hospital Maesai and Kasemrad Sriburin Chiang Saen Clinic. Shareholding Ratio 93.67%
4. **Navanakorn Medicare Co., Ltd.** operated Karunvej Pathumthani Hospital and Karunvej Ayudhaya Hospital. Shareholding Ratio 79.44%

5. **Sothon Vejchakit Co., Ltd.** operated Kasemrad Hospital Chachoengsao and Kasemrad Hospital Prachinburi. Shareholding Ratio 92.71%
6. **Bangkok Chain Management Co., Ltd.** operated Health drink trading, medical scientific research and analysis services through laboratories, and real estate leasing. Shareholding Ratio 100.00%
7. **Bangkok Chain International (Lao) Co., Ltd.** operated Kasemrad International Hospital Vientiane. Shareholding Ratio 75.24%
8. **Kasemrad Ari Cancer Rangsi Raksa Center Co., Ltd.** operated Kasemrad Ari Radiotherapy Cancer Clinic. Shareholding Ratio 51.00%
9. **Health Chain Innotech Co., Ltd.** operated Manufacture and sale of ready-to-use computer programs. Shareholding Ratio 90.00%
10. **Bangkok Chain Dental Co., Ltd.** Operate a mobile dental service. Shareholding Ratio 60.00%

The Company maintains a policy of investing in subsidiaries, ensuring a minimum investment of not less than 50 percent, while actively participating in their management. Investment decisions are influenced by the economic climate, business growth, and focus on businesses or products related to hospital and health services, similar to the Company's current operations. Any investment in a subsidiary requires the approval of the Company's Board of Directors. The Company implements a management policy within these subsidiaries by assigning its representatives as directors, proportional to its shareholding, to participate in decision-making, policy formulation, and ensuring business operations align with the Board's policies.

2. Risk management

2.1 Risk management policy and plan

Risk management policy and plan

The company recognizes the importance of effective organizational administration to drive stable growth and business expansion, maintain a secure financial position, and provide proper yield to shareholders. Attention is given to addressing risks and fostering sustainable development in environmental, social, and corporate governance. The company has established policies and procedures for risk management to serve as a framework for best practices. This is intended to ensure that the risk management process is effective and adheres to high standards, in accordance with guidelines of good corporate governance.

Risk management framework

Risk management is an integral component of good corporate governance. In addition to supporting the Company in achieving its predefined goals, it also enables value enhancement for the Company's stakeholders.

In 2024, the Company formed the Sustainability, Governance, and Risk Management Committee consisting of 9 members. Ms. Saifon Chaimongkol is the Chairman of the Sustainability, Governance, and Risk Management Committee and is responsible for strategy formulation and assigning oversight tasks to ensure that operations comply with good corporate governance principle, are transparent and fair to all relevant units, and align with the prescribed risk management guidelines. The company mandates regular risk assessment and management. In 2024, the committee held a total of 6 meetings and presented to the Company's Board of Directors once.

Additionally, the Company has hired Dharmniti Internal Audit Co., Ltd. to conduct internal assessments. Ms. Wantanee Wongbudrod holds the position of Deputy Manager of Internal Audit 2 and serves as the Head of Internal Audit. Ms. Somruethai Hemthanon acts as the Company's representative in coordinating internal audit activities across all hospitals in the chain.

 - Laws and regulations is not favorable for doing business
 - Violations of laws and regulations
 - Financial Risk
 - Fluctuation in exchange rates, interest rates, or the inflation rate
 - Liquidity risk

Risk characteristics

Strategic and Business Risk

Government Healthcare Policy Risk

In 2024, the Group's revenue from services under the government's health policy, from services provided under the Social Security scheme, is estimated to be 33.16% of hospital revenue. Therefore, changes in the government's health policy could impact the Group's operating results. However, the Company's management has been monitoring changes and participating in providing input on various policy formulations to provide useful information to the committees considering the government's health policies. The Company's executives have participated as members of various committees, such as the Social Security Medical Committee, the National Health Service System Committee, advisors to the Labor Committee, and the Road Accident Victim Protection Committee, Department of Insurance, Ministry of Commerce. Additionally, the Company has a policy to control expenses and continuously evaluate the performance of such projects to mitigate the impact on the Company's overall operating results.

Competitive Risk in the Private Hospital Business

Competition in the private hospital business has intensified and returned to normal service provision. This includes competition in tertiary care services, service technologies, and specialized medical centers based on the expertise and specialization of each hospital network to retain existing patient bases and attract new patient groups to use hospital services.

Management and Operational Risk

Risk of Personnel Shortage

As the healthcare service business relies on personnel with knowledge, skills, and specialized expertise in various fields, including medicine, pharmacy, nursing, and technical staff, the shortage of qualified personnel is one of the risks of the business.

Risk of Fraud and Corruption

The Company operates a private hospital business, which involves various sectors, such as the National Health Security Office, regarding reimbursement under the health promotion contract, the Social Security Office, regarding annual enrollment or renewal for medical services for insured persons, hospital accreditation institutions, and the Ministry of Natural Resources and Environment, regarding the Environmental Impact Assessment (EIA) approval for new hospital openings or capacity expansions. Therefore, the Company may face the risk of employee fraud, both from individuals within and outside the company.

Risk of Privacy Violations

The Company's business operations involve the collection and use of confidential and personally identifiable information, including patient data, business partners, and employees within the Company and its network of hospitals. This poses a risk of privacy violations from internal operations, such as unauthorized access to information by employees, inaccurate data recording, and misuse of information.

Regulatory and Legal Risk

Risk of Litigation

As the public is currently more informed and aware of their rights, including the issuance of several new laws that provide rights protection and benefits to consumers, such as the Consumer Case Procedure Act B.E. 2551, the Consumer Organization Council Establishment Act B.E. 2562, and the Personal Data Protection Act B.E. 2562. These laws will facilitate consumers in taking legal action against hospitals and medical personnel, increasing the company's risk of litigation arising from the provision of healthcare services.

Social and Community Risks

The Company operates a total of 15 hospitals located in communities both domestically and internationally. This makes the hospitals connected to the local communities. The Company strives to collaborate with and support agencies and organizations that play a role in social assistance, such as providing health check-up units to people residing near the hospitals. In addition, the Company prioritizes the health and safety of patients, communities, and stakeholders at all levels. Moreover, the Company is mindful of the risks arising from the disposal of infectious waste and other types of waste. It has established an Environment of Care Committee (ECC) to ensure the effectiveness of environmental and safety operations. The ECC is responsible for assessing issues that impact the environment and safety of hospital staff, service users, and the surrounding community. It also develops risk management programs for potential environmental impacts from the hospital's business operations. Furthermore, the Company respects human rights by establishing a human rights policy based on the three pillars of the United Nations Guiding Principles on Business and Human Rights: Protect, Respect, and Remedy. The Company also conducts a comprehensive Human Rights Due Diligence Process.

Financial Risk

Credit Risk

As the hospitals in the network provide healthcare services to various patient groups, covering both cash patients who pay for their own expenses or utilize benefits from contracted companies or insurance companies, and patients under the Social Security scheme, the Company needs to collect fees from private companies, insurance companies, and government agencies.

Liquidity Risk

The Company manages liquidity risk by maintaining a level of cash and cash equivalents sufficient to meet the operating needs of the Company and its subsidiaries, including considering the need for appropriate funding in line with future business expansion or investment plans.

Interest Rate Risk

Interest rate risk arises from future changes in market interest rates, which affect the Company's operating results and cash flow. However, the Company has set an appropriate proportion of loans and borrowings of the Company and its subsidiaries with fixed and floating interest rates. It also monitors and manages risk by sourcing funds with appropriate financing costs, preparing financial projections, and estimating and analyzing future financial ratios to ensure that key financial ratios are at appropriate levels.

Foreign Exchange Risk

As the Company operates a network of hospitals in Lao PDR, with revenue and loan financing in Lao Kip, there may be a risk of foreign exchange fluctuations due to economic conditions. The Company has measures in place to manage foreign currency income and expenses accordingly (Natural Hedge) to mitigate this risk appropriately.

Risk-related consequences

Strategic and Business Risk

Risk from Government Healthcare Policies

As approximately 33.16% of the company's revenue comes from government projects such as Social Security and the National Health Security Office, if there are policy changes, such as a reduction in service rates or service conditions, it may directly impact the company's revenue.

Competitive Risk in the Private Hospital Business

Competition in the business compels the company to develop medical technology and expand specialized service centers to meet patient needs. This includes improving the surrounding environment of the hospital and increasing medical personnel and related staff.

Management and Operational Risk

Risk of Personnel Shortage

The shortage of qualified personnel is one of the business risks. As the healthcare service business relies on personnel with knowledge, skills, and expertise in specific fields, including medical, pharmaceutical, nursing, and various technical staff, and with the current high competition in the hospital business, both in the public and private sectors, inaction by the company could affect business operations.

Corruption Risk

If the company does not conduct business transparently, it may cause damage to the company's reputation and image, loss of trust in the company, which will affect business relationships and future operations, including impacting financial performance and all stakeholders involved with the company. It can also lead to the loss of opportunities to collaborate with new business partners or expand into new markets due to mistrust arising from corrupt practices.

Risk of Personal Data Breach

Data access by unauthorized employees, incorrect data recording, and misuse of information will affect patients' confidence in using the service, as well as the company's reputation and image, which may have a negative impact in the industry. This could have a significant impact on the company's operations, financial position, and cash flow.

Regulatory and Legal Risk

Risk of Litigation

The company places importance on reporting and negotiating solutions when there are complaints from service users. This is to prevent or mitigate legal disputes. The company collects litigation cases to present to the Sustainability, Governance, and Risk Management Committee and the Board of Directors to adjust management strategies and continuously improve service quality. Currently, the company has litigation cases filed by patients claiming damages with a total claim amount of approximately 398 million baht as of December 31, 2024. Details of the progress are disclosed in Note 28 to the Financial Statements. As of the date of this report, these cases are still under court proceedings, and the outcome of these cases is not yet finalized. Based on management's assessment, there is no expected material adverse effect. Therefore, the Group has not recognized any provision for liabilities in the financial statements.

Financial Risk

Credit Risk

The company provides healthcare services covering cash patients who pay for themselves, use their rights from contracted companies or insurance companies, and patients under the Social Security scheme. This requires the company to collect expenses from private companies, insurance companies, and government agencies. Therefore, there is a risk of uncollectible medical expenses if there is no analysis, management, and follow-up on payments from contractors.

Risk management measures

Strategic and Business Risk

Risk from Government Healthcare Policies

The company has implemented risk mitigation measures by closely monitoring government policies and participating as an advisory committee in several relevant agencies.

Competition Risk in the Private Hospital Business

The Company has been dedicated to continuously improving the potentiality and standards of hospitals within the group through the enhancement of service areas and patient accommodation facilities in hospitals such as Kasemrad Bangkae Hospital, Kasemrad Prachachuen Hospital, Kasemrad Saraburi Hospital, and Kasemrad Chachoengsao Hospital. Additionally, Karunvej Pathumthani Hospital has been upgraded to Kasemrad Pathumthani Hospital. Moreover, the Company has fostered collaborations with various organizations to expand the customer base into new markets. These include partnership between World Medical Hospital and SENERA Senior Wellness Co., Ltd. to manage the medical aspects of the Senera Senior Wellness project at Bang Bua Thong branch, catering to the aging society in Thailand. The Company has also collaborated with Lavida Advanced Fertility and Genetics Center Co., Ltd.

to elevate the quality of healthcare and expand the patient base to the People's Republic of China. Additionally, there are partnerships with experts catering to customers in the beauty industry with the establishment of the Kasemrad Plastic Surgery centers within two hospitals in the group which has yielded positive results. The mobile dental services provided by Bangkok Chain Dental Co., Ltd. have been launched in six provinces and have received positive feedback. These services cater to government agencies, private companies, public schools, and private schools. Furthermore, the Company has introduced specialized medical centers within hospitals in the group to enhance services and improve competitiveness. Ongoing studies are being conducted to explore strategic areas for potential expansion of hospital operations in the future, aiming to broaden services to cover a larger customer base.

Management and Operational Risk

Risk of Personnel Shortage

To mitigate the risk of personnel shortage, the group has set competitive compensation rates and appropriate benefits that can compete with other operators. It also provides opportunities for qualified personnel to participate in management and provides continuous training to enhance new knowledge. This is to encourage such personnel to feel involved in the company's business growth.

Risk of Fraud and Corruption

The company recognizes the potential for fraud and has established concrete guidelines for various matters. An anti-corruption policy has been developed to demonstrate the company's commitment to combating corruption, along with an anti-corruption practice manual to clearly define roles, responsibilities, principles, and regulations. Communication and training are provided to the board of directors, management, and employees of the company and its subsidiaries, as well as agents, business intermediaries, product/service distributors, contractors, or consultants who are involved with or act on behalf of the company and/or its subsidiaries.

Risk of Personal Data Breach

The company places importance on personal data protection. It has established a privacy policy announcement, obtained consent for data collection and usage, established data security measures, and provided channels for employees and stakeholders to file complaints. It has also appointed a Data Protection Officer (DPO) to oversee all personal data within the company, provide advice, audit, and supervise the use of personal data in accordance with the Personal Data Protection Act B.E. 2562 (PDPA). The company also prioritizes the protection of the rights of customers/patients and stakeholders to ensure they are treated fairly and in accordance with relevant privacy laws.

Regulatory and Legal Risk

Litigation Risk

The company is aware of these risk factors and has implemented risk management measures. These include processes for monitoring, inspecting, and controlling the quality and standards of medical treatment, as well as evaluating service satisfaction. The company also continuously enhances service standards in accordance with Hospital Accreditation (HA) and Joint Commission International (JCI) standards.

Financial Risk

Credit Risk

The company has a policy to mitigate such risks by communicating treatment plans, along with an assessment of the costs incurred, and informing patients of the costs in advance. It also offers payment installment options to alleviate the burden of paying for medical treatment in full upon completion of treatment. The creditworthiness of each new counterparty is analyzed before offering terms and conditions of trade. In addition, the company has in place management and monitoring of receivables from counterparties, insurance companies, and government agencies to ensure that medical treatment payments are made according to the agreed terms.

Liquidity Risk

The company manages liquidity risk by maintaining a level of cash and cash equivalents sufficient for the operating needs of the company and its subsidiaries. It also considers the need for appropriate financing in line with future expansion or investment plans.

Interest Rate Risk

The company has set appropriate proportions of loans and borrowings of the company and its subsidiaries with fixed and floating interest rates. It also monitors and manages risk by sourcing funds at reasonable financing costs, preparing financial projections, and estimating and analyzing various financial ratios that will occur in the future to ensure that key financial ratios are at appropriate levels.

Foreign Exchange Risk

The company has measures in place to manage income and expenses in foreign currencies accordingly (Natural Hedge) to appropriately manage such risks.

Risk 2 Emerging risks

- Related risk topics :
- Strategic Risk
 - Changes in technologies
 - Other : Misinformation in communication
 - Operational Risk
 - Climate change and disasters

Risk characteristics

Emerging Risks

Information Technology System Change Risk

The advancement of information technology systems today enhances opportunities for development and elevates service delivery for various businesses, including hospitals, ultimately improving people's quality of life.

Misinformation and Disinformation in Healthcare

Communication of information today is fast and easy, primarily occurring through online media channels that are not always verified or filtered by relevant authorities. This has led to distortions in public health information, which may negatively impact people's understanding of healthcare and treatment. The rapid spread of diseases on a large scale can cause panic, lead to stockpiling of goods, and undermine public confidence in the healthcare system.

Risks Arising from Emerging Diseases

The changing global climate, including global warming, floods, droughts, wildfires, heat waves, and various dust and smoke, inevitably impacts the lives and health of people and living beings worldwide. It can also be a factor leading to emerging diseases from changes in lifestyle and health behaviors.

Climate Change Risk

Climate change may lead to disasters and scarcity of natural resources in many areas, with increasing severity.

Risk-related consequences

Emerging risks

Information technology system change risk

The advancement of information technology systems also poses a risk of cybersecurity threats, such as attempted data breaches by outsiders, data theft, or data destruction to disrupt services. This will affect the confidence, reputation, and image of the company and may have a significant impact on the company's operating results, financial position, and cash flows.

Misinformation and Disinformation in Healthcare

False or inaccurate public health communication can lead to panic through misunderstanding or the spreading of misinformation. For example, sharing fake news that certain herbs can cure diseases without scientific evidence, or rumors that vaccines cause severe side effects without proof. This can result in patients avoiding proper treatment, potentially increasing the risk of death or complications. It can also lead to the neglect of appropriate preventive measures, causing faster disease outbreaks. Additionally, it creates societal panic, leading to hoarding of essential goods and negatively affecting the economy and daily life.

Risk from emerging diseases

The risks from global climate change may positively impact and generate revenue for the company and its network of hospitals. However, at the same time, it may negatively impact hospital management in the event of serious health risks that result in more patients needing care than the company's public health service system can support.

Climate change risk

Climate change affects the quality of life and is a risk that could result in the company being unable to conduct business normally.

Risk management measures

Emerging risks

Risk of changes in information technology systems

The Company manages risk by continuously studying and upgrading its technology security systems to prevent cyber threats to the Company's information technology systems, as well as raising awareness of safe technology use among the Company's personnel.

Misinformation and Disinformation in Healthcare

The company campaigns to educate the public and promote health literacy to ensure accurate information is received. It also controls and supervises the information shared on online media and encourages the involvement of experts to provide scientifically-based information through reliable channels, such as news sources from health organizations or government agencies. This is done to prevent the spread of misinformation and reduce its impact on public health.

Risk of emerging diseases

The Company has a risk management approach based on experience and expertise from managing the COVID-19 pandemic, such as having a network of hotels that can be adapted to serve as field hospitals in the event of an outbreak of emerging diseases. The Company has experience in providing telemedicine services, as well as preparing to adopt new technologies to provide medical services for patients' convenience.

Climate change risk

The Company places importance on natural resource conservation and reducing direct and indirect environmental impacts. The Company also conducts business by considering the impacts on the environment, communities, employees, partners, and all stakeholders.

2.2.2 Risk to securities holders

Are there any risk factors affecting securities holders? : Yes

Risk 1 Shareholder Investment Risk

Related risk topics : Risk to Securities Holder

- Return from investment of securities holder

Risk characteristics

As market demand and supply are constantly changing, often due to multiple factors, the price of securities is not solely dependent on the company's performance.

Risk-related consequences

This risk may cause investors to lose all or part of their investment. To mitigate this potential risk, investors can diversify their investments across multiple industries to spread the risk.

Risk management measures

The company has implemented measures to manage such risks by adhering to good corporate governance principles and sustainable business practices to ensure fairness for all shareholders equally.

2.2.3 Risk to securities holders from investing in foreign securities (applicable to only foreign companies)

Are there any risk factors affecting securities holders : No
from investing in foreign securities?

3. Business sustainability development

3.1 Policy and goals of sustainable management

Sustainability Policy

Sustainability Policy : Yes

The company is committed to conducting business with integrity, ethics, and transparency in its management to ensure reliability. It focuses on creating engagement with stakeholders and having a sound audit system. The company also considers society and the environment to ensure compliance with business standards and integrates sustainability into its development. This includes considering environmental, social, and governance (ESG) dimensions. The company is committed to creating sustainable value for all stakeholders and is prepared to cope with challenges and risks arising from rapidly changing circumstances. This aims to prevent or mitigate the impact of business operations that may affect the company, community, society, and the environment. To build confidence among all stakeholder groups, the company has a strategy focused on becoming a leading hospital business and building partnerships to enhance service efficiency. It aims to establish a brand that covers a diverse customer base and develop specialized physicians and support teams to maintain consistent quality and standards through its corporate strategies.

To demonstrate its commitment to sustainable business practices, at its 2/2023 board meeting on February 28, 2023, the Board of Directors appointed a Sustainability Committee to oversee activities and manage risks ("Sustainability Committee"). This committee is responsible for establishing policies and overseeing the implementation and monitoring of sustainability efforts. The committee will hold a total of six meetings in 2024. The company also encourages its employees to be aware of, prioritize, and participate in integrating sustainability into their operations in accordance with the strategic plan. This will be a key driver of the company's sustainable business growth in the future.

Sustainability management goals

Does the company set sustainability management goals : Yes

The company prepares guidelines and goals for sustainable development in response to the Sustainable Development Goals according to the 13 goals of the United Nations (Sustainable Development Goals: SDGs)

Economic Sustainability

Has the company reviewed the policy and/or goals of sustainable management over the past year : Yes

Has the company changed and developed the policy and/or goals of sustainable management over the past year : Yes

Summary Report on Changes and Sustainability Performance for the Past Year

Bangkok Chain Hospital Public Company Limited has conducted a review of its charters, policies, and operational manuals for the year 2024. During the first Board of Directors meeting of 2025, the company evaluated and adjusted its operational guidelines to align with sustainable development principles. In particular, the sustainability policy was reviewed to ensure its relevance to the evolving business environment and to support the United Nations' Sustainable Development Goals (SDGs).

Additionally, the company has improved and expanded its environmental reporting framework to systematically cover all affiliated companies within the group. The initial targets set for 2024 have been revised and extended to 2027. This extension was implemented after consolidating comprehensive data and reports from all business units within the group, enabling more accurate and systematic assessment of environmental performance.

This adjustment to the reporting framework enhances the company's ability to track and evaluate progress in resource utilization, greenhouse gas emission reduction, and waste management across the entire organization. These efforts align with the company's long-term sustainability goals and reinforce trust among all stakeholders.

3.2 Management of impacts on stakeholders in the business value chain

3.2.1 Business value chain

The Company has always prioritized on treating their stakeholders. The relevant stakeholders throughout the business value chain are identified and reviewed from upstream to downstream covering the main and supporting activities of the business. In addition, the Company has assessed the importance of stakeholders with 2 factors: Influence and interest on the Company to divide stakeholders into 4 groups as follow: Stakeholders to create close participation, i.e. patients and customers, employee, stakeholders to maintain satisfaction, i.e. shareholders and investors, creditors, and business partners, stakeholders to continually provide information, i.e. communities and society, government agencies, and stakeholders that need to be monitored, i.e. commercial competitors and the mass media. In conclusion, stakeholder groups and related activities can be summarized as follows:

- Community - Society	Environment & Social Responsibility - Improving access to medical services to promote a good life quality. - Promoting and supporting social and community activities, as well as providing knowledge about health promotion. - Operations with the least impact on communities and society. Climate Change - Proper management of climate change	- Affiliated hospitals provide services to insured persons under the social security program. - Expanding affiliated hospitals to border areas with lack of access to medical services. - Provide opportunities for the community to participate in activities or projects. - Continuously support budget for community and social activities. - Provide channels for listening to opinions, complaints and suggestions.	- Social Event - Complaint Reception
Government agencies and Regulators	Corporate Governance & Transparency - Compliance with the law and regulations related.	- Conduct business activities correctly and appropriately according to laws and regulations, and strictly follow related regulations.	- Others - Listen and provide opinions, suggestions on government regulations and practices.
Competitors	Corporate Governance & Transparency - Conduct business under the rules of good and fair competition.	- Promote free trading. - Treat its competitors with fair competition	- Others - Follow industry trends.

Group of stakeholders	Stakeholders' expectations	Responses to stakeholder expectations	Channels for engagement and communication
Media	Corporate Governance & Transparency - Gain accurate, fast and timely information equally. - Provide the media with an opportunity to meet and talk with senior executives.	- Disclose important and necessary information about the Company's operations. - Open to opinions suggestions from the media.	- Press Release - Others - Disclose information through the Stock Exchange of Thailand, website, telephone, email, annual rep

Diagram of the stakeholder analysis in the business value chain

Assessing key sustainability issues

The Company has selected and evaluated issues related to business operations and consider the demands and expectations of stakeholders to prioritize sustainability operations by comparing of 2 factors including: the importance/impact of sustainability issues on business operations and importance/impact on stakeholders. In addition, the Company reviews the sustainability issues and propose to the Sustainability, Governance and Risk Management Committee. The results from the assessment for the importance of sustainability issues in 2024 can be summarized as shown in the picture below and summarize the related policies and preliminary performance of operations in the next topic. Additional details about the Company's sustainability operations are disclosed in the 2024 Sustainability Report.

3.3 Management of environmental sustainability

3.3.1 Environmental policy and guidelines

Environmental policy and guidelines

Environmental policy and guidelines	: Yes
Environmental guidelines	: Electricity Management, Fuel Management, Renewable/Clean Energy Management, Water resources and water quality management, Waste Management, Biodiversity Management, Greenhouse Gas and Climate Change Management, Air Quality Management, Noise Pollution Management

Bangkok Chain Hospital Public Company Limited is committed to sustainable development by conducting business based on environmental responsibility under the oversight of the Sustainability, Corporate Governance, and Risk Management Committee. The company is dedicated to reducing environmental impacts from both direct and indirect operations for the benefit of its personnel, as well as demonstrating social responsibility to communities and stakeholders. The company has established key environmental practices as follows:

- **Energy Management:** Focuses on efficient energy use, reducing electricity consumption, and promoting the use of clean renewable energy sources.
- **Water Management:** Encourages water conservation and efficient use, aiming to reduce water consumption across the organization.
- **Waste Management:** Emphasizes waste reduction, effective waste segregation, and recycling to minimize environmental impact.
- **Renewable Energy Management:** Promotes the use of renewable energy, such as solar power, to reduce greenhouse gas emissions.
- **Pollution Management:** Controls air and noise pollution, including preventing pollution from energy and resource use.
- **Biodiversity Conservation:** Minimizes operational impacts on ecosystems and the environment by controlling the use of chemicals.
- **Greenhouse Gas Management:** Considers greenhouse gas emissions from operations and works towards reducing these emissions.

Review of environmental policies, guidelines, and/or goals over the past year

Review of environmental policies, guidelines, and/or goals over the past year	: Yes
Changes in environmental policies, guidelines, and/or goals	: Electricity Management, Fuel Management, Renewable/Clean Energy Management, Water resources and water quality management, Waste Management, Biodiversity Management, Greenhouse Gas and Climate Change Management, Air Quality Management, Noise Pollution Management

Summary Report on Sustainability Changes and Performance in the Past Year

Bangkok Chain Hospital Public Company Limited has reviewed its charter, policies, and operating manuals for the year 2024. The Board of Directors convened at Meeting No. 1/2025 on January 13, 2025 to consider updating its operational approach in line with sustainable development principles, particularly its sustainability policy. The policy was reviewed to better align with the changing business environment and to support the United Nations Sustainable Development Goals (SDGs).

In addition, the company has improved and expanded its environmental data reporting base to comprehensively cover all subsidiaries within the group. The original target for 2024 has been revised and extended until 2027. This extension followed the integration of data and reports from all subsidiaries, allowing for more precise and systematic environmental performance assessments.

This change in the reporting base facilitates better tracking and evaluation of progress in resource usage, greenhouse gas emissions reduction, and waste management across the organization. It aligns with the company's long-term sustainability goals and enhances stakeholder confidence.

3.3.2 Environmental operating results

Information on energy management

Energy management plan

The company's energy management plan : Yes

Throughout the past period, the Company has continuously implemented energy conservation measures annually. And awareness of energy usage and conservation is strengthened through training to educate employees on energy saving, posting energy conservation announcements on information boards and elevators, promoting executives, employees, and people who use services within the hospital building to walk up and down 1 or 2 floors of stairs instead of using the elevator. Always turn off the light switch when not in use, as well as turning on the air conditioner at a temperature of 25 degrees. The Company also changes light bulbs that help in energy saving in areas where electricity is used frequently and adjusts the lighting to suit the area, as well as supporting the reduction of electrical energy use in cooling towers by installing energy-saving propellers which reduces electricity usage increase ventilation Including being able to extend the life of the cooling tower so that it can be used for a longer time as well.

Furthermore, the company has commenced the installation of solar panel systems on the rooftops of buildings and parking areas of newly constructed hospitals since 2020. This initiative is part of the company's efforts to reduce indirect greenhouse gas emissions and increase the use of renewable energy from solar power. The objective is to reduce dependence on fossil fuel-based energy sources and promote the use of clean energy in the long term, aligning with the company's sustainability goals. In addition, the company has promoted the use of other forms of renewable energy, such as the installation of electric vehicle (EV) charging stations at various locations within the hospital. These stations support the use of electric vehicles by employees and visitors, further contributing to the reduction of greenhouse gas emissions and promoting clean energy usage within the organization.

Setting goals for managing electricity and/or oil and fuel

Does the company set goals for electricity and/or fuel : Yes
management

Details of setting goals for electricity and/or fuel management

Target(s)	Base year(s)	Target year(s)
Reduction of electricity purchased for consumption	2024 : purchased electricity for consumption 56,510,935.03 Megawatt-Hours	2027 : Reduced by 0.3%

Performance and outcomes of energy management

Performance and outcomes of energy management : Yes

Over the past year, the hospital has continuously implemented energy conservation measures by focusing on fostering an awareness of efficient energy use through staff training and the installation of energy conservation campaign displays throughout various areas within the hospital. In addition, management and staff have been encouraged to use stairs instead of lifts, switch off lights when not in use, and set the air conditioning temperature at 25 degrees Celsius, as well as to replace traditional light bulbs with energy-efficient ones and install energy-saving fans in the cooling tower to enhance overall electricity efficiency.

Regarding the use of renewable energy, the company has installed solar rooftop systems on the roofs of buildings and parking areas across eight hospitals in its network, including Kasemrad Hospital Aranyaprathet, Kasemrad Hospital Prachinburi,

Kasemrad Hospital Saraburi, Kasemrad Hospital Sriburiram, Kasemrad Hospital Bangkai, Kasemrad International Hospital Rattana Thibet, Kasemrad Hospital Pathum Thani, and Kasemrad Hospital Chachoengsao. Last year, the company procured electricity from renewable energy sources totaling 2,658,022.1 kWh, which accounts for approximately 4.68% of total electricity consumption.

Furthermore, to accommodate staff and service users who utilize electric vehicles, the organization has installed EV charging stations at several locations, representing another measure to reduce greenhouse gas emissions and promote the adoption of clean energy within the organization.

Electricity purchased or generated for consumption from renewable energy sources (Kilowatt-Hours)	0.00	0.00	2,658,022.10

Information on water management

Water management plan

The Company's water management plan : Yes

This year, the company has recognized the importance of water and wastewater management in the context of the escalating climate change, which has led to issues such as droughts, flooding, and limited access to water resources. In order to meet the water needs of all sectors and reduce the impact on the surrounding community and environment, the company has implemented a campaign to encourage employees and service users to use water efficiently. This includes promoting the practice of turning off faucets completely when not in use and maintaining the water supply system in good working condition to reduce water wastage from faulty equipment.

Additionally, the company has assigned an external firm to take responsibility for improving and controlling the wastewater treatment system, including regularly testing and sampling wastewater to ensure quality standards. This approach ensures that wastewater management aligns with environmental standards and comprehensively supports sustainability efforts.

Setting goals for water management

Does the company set goals for water management : Yes

Details of setting goals for water management

Target(s)	Base year(s)	Target year(s)
Reduction of water withdrawal	2024 : Water withdrawal 700,867.00 Cubic meters	2027 : Reduced by 0.3%

Performance and outcomes of water management

Performance and outcomes of water management : Yes

This year, the hospital's water management performance was evaluated through water quality analysis, confirming that it meets the prescribed standards with no complaints from stakeholders. This serves as evidence of the institution's commitment and success in managing water efficiently. The hospital has implemented several measures to promote water conservation and reduce losses from the plumbing system. These measures include campaigns encouraging staff and service users to use water mindfully—for example, ensuring that faucets are fully closed when not in use and providing education on proper water usage. Additionally, ongoing maintenance of the plumbing system has been carried out to ensure optimal efficiency and to minimize losses from faulty equipment.

Regarding wastewater management, the hospital has entrusted an external company with the responsibility of upgrading and controlling the wastewater treatment system. Regular analysis of wastewater quality and routine sampling of effluent are also conducted to ensure that the hospital's water and wastewater management systems comply with environmental standards and align with sustainable development guidelines.

Water management: Water withdrawal by source

Information on waste management

Waste management plan

The company's waste management plan : Yes

The company's waste and by-product management plan is founded on the 3Rs concept (Reduce, Reuse, Recycle). It begins with segregating waste into four categories: general waste, recyclable waste, infectious waste, and hazardous waste. Subsequently, systematic procedures for storage and disposal are established for instance, infectious waste is packaged in red bags and stored in containers with securely fitted lids to control and mitigate risks to health and the environment.

To ensure compliance with legal requirements, the company has established an Environment of Care Committee as the primary body responsible for formulating policies, planning operations, and overseeing the management of all types of waste—be it general waste, recyclable waste, infectious waste, or hazardous waste by legal standards. This committee also plays a key role in developing corrective measures to address waste management issues, thereby preventing any adverse impacts on patients, staff, visitors, and the surrounding community. Furthermore, the Environment of Care Committee collaborates with the Prevention and Control Infection Committee to supervise the waste segregation and storage processes and to provide training to both staff and contractors working within the hospital premises, ensuring that waste management arising from hospital services is conducted appropriately and in compliance with relevant regulations.

Setting goals for waste management

Does the company set goals for waste management : Yes

Details of setting goals for waste management

Target(s)	Base year(s)	Target year(s)	Waste management methods
Increase of waste recovery Waste type: Non-hazardous waste	2024 : non-hazardous waste 1,681,734.20 Kilograms	2027 : Increased by 5%	• Reuse • Recycle • Landfilling • Incineration without energy recovery

Performance and outcomes of waste management

Performance and outcomes of waste management : Yes

Bangkok Chain Hospital Public Company Limited conducts its business with a strong commitment to environmental responsibility under the oversight of the Sustainability Committee, Corporate Governance, and Risk Management. The company is focused on achieving the highest efficiency in managing waste, by-products, and medical supplies to minimize environmental impact and promote sustainable operations.

The company participates in the "Care the Bear" project initiated by the Stock Exchange of Thailand to promote behavior that reduces greenhouse gas emissions from organizational activities. This project emphasizes reducing resource use through the reduction of paper, plastic, and foam consumption, as well as energy usage from electrical devices, and calculating tangible carbon footprint reductions. Additionally, the company has collaborated with SCGC in the "Wake Up Waste" project to promote the circular economy concept in waste management, focusing on the segregation and maximization of waste reuse to reduce landfill waste and mitigate environmental impact, particularly in recycling plastic waste into reusable products. In the initial phase of the project, Kasemrad Prachachuen and Kasemrad Ramkhamhaeng Hospitals have implemented plastic bottle and recyclable material segregation. The collected waste is sent for recycling and processed into new products that can be reused, resulting in a reduction of greenhouse gas emissions by 1,106.44 kilograms of CO₂, equivalent to the carbon sequestration of 91 mature trees.

To ensure compliance with legal requirements and established standards, the company has established an Environment of Care Committee. This committee is responsible for formulating policies, planning, and overseeing the management of all types of waste. It also collaborates with the Infection Prevention and Control Committee to supervise waste segregation and storage, in addition to providing training for both staff and contractors. The performance in managing waste and by-products has been well received by stakeholders, with no reported issues related to environmental concerns or the management of medical supplies, thereby underscoring the company's commitment and responsibility toward society and the environment in its sustainable business practices.

Information on greenhouse gas management

Greenhouse gas management plan

The company's greenhouse gas management plan : Yes

The organization is committed to reducing greenhouse gas emissions from its internal activities by promoting environmentally friendly behaviors among its personnel and instilling a consciousness for sustainable energy use. Simultaneously, it seeks to enhance operational processes to utilize resources efficiently and minimize unnecessary emissions. The organization emphasizes the use of renewable energy through the installation of solar panels on building roofs and parking areas to harness solar power, thereby reducing reliance on fossil fuels and lowering indirect greenhouse gas emissions. In addition, a systematic approach has been implemented for the segregation and recycling of waste for reuse. An environmental data collection system has also been established to calculate the impact of greenhouse gas emissions (CFO), and the resulting data is used to continuously plan and manage operations to drive long-term emission reductions.

Compliance with principles and standards for greenhouse gas or climate change management

Greenhouse gas emission scope	Base year(s)	Short-term target year	Long-term target year
Scope 1	2024 : Greenhouse gas emissions 24,059.28 tCO ₂ e	2027 : Reduced by 0.3% in comparison to the base year	2030 : Reduced by 0.3% in comparison to the base year

Performance and outcomes of greenhouse gas management

Performance and outcomes of greenhouse gas management : Yes

The company manages greenhouse gas emissions in collaboration with SCGC through the “Wake Up Waste” project, which promotes the circular economy concept by implementing a systematic waste management process. The initiative focuses on waste segregation and maximizing resource utilization to minimize landfill waste and mitigate environmental impacts. A key aspect of the project involves repurposing plastic waste into reusable products. In the initial phase, Kasemrad Prachachuen Hospital and Kasemrad Ramkhamhaeng Hospital have undertaken the collection and sale of plastic bottles and recyclable materials, resulting in an approximate reduction of 1,106.44 kilograms of carbon dioxide emissions**, equivalent to the carbon sequestration capacity of approximately 91 mature trees.

Greenhouse gas management : Corporate greenhouse gas emission

	2022	2023	2024
Total greenhouse gas emissions (Metric tonnes of carbon dioxide equivalent)	7,593.15	29,754.67	24,059.28

3.4 Social sustainability management

3.4.1 Social policy and guidelines

Social and human rights policy and guidelines	: Yes
Social and human rights guidelines	: Employee rights, Migrant/foreign labor, Child labor, Consumer/customer rights, Community and environmental rights, Safety and occupational health at work, Non-discrimination

Bangkok Chain Hospital Public Company Limited and its subsidiaries recognize the importance of promoting and upholding human rights alongside conducting business in accordance with ethical principles and good corporate governance. The Company safeguards human rights both within and outside the organization by establishing human rights policies and practices aligned with internationally recognized standards. Specifically, the Company supports and adheres to the Universal Declaration of Human Rights (UDHR), the United Nations Global Compact (UNGC), the United Nations Guiding Principles on Business and Human Rights (UNGP), and the International Labour Organization (ILO) Declaration on Fundamental Principles and Rights at Work. Furthermore, the Company remains committed to strict compliance with national human rights laws in all jurisdictions where it operates.

Additionally, the Company acknowledges that employees, partners, customers, surrounding communities, and all stakeholders are essential resources that contribute to the organization's success and growth. Therefore, the Company prioritizes fair and equitable human resource management, ensures the well-being of partners and customers, fosters positive relationships with local communities, and focuses on improving the quality of life in the areas where it operates. Moreover, the Company has assessed key social issues relevant to both the organization and its stakeholders, including personnel development, human resource management, human rights, access to medical services, community engagement, and occupational health and safety. To address these critical social dimensions, the Company has established operational policies that ensure an appropriate and effective response.

Review of social and human rights policies, guidelines, and/or goals over the past year

Review of social and human rights policies, guidelines, and/or goals over the past year	: Yes
Changes in social and human rights policies, guidelines, and/or goals	: Employee rights, Migrant/foreign labor, Child labor, Consumer/customer rights, Community and environmental rights, Safety and occupational health at work, Non-discrimination, Supplier rights

The company conducts a comprehensive review of its Human Rights Policy and Human Rights Due Diligence (HRDD) report annually (at least once a year) or whenever significant changes affecting business operations occur. This year, the company has referenced relevant standards and refined its policy to enhance clarity, including detailing operational guidelines and remediation measures. These revisions ensure that the Human Rights Policy aligns with the company's principles and complies with applicable regulations and laws. Additionally, the Board of Directors must review and approve any amendments to the Human Rights Policy. The updated policy is then communicated across the organization to ensure widespread awareness.

The Human Rights Policy and the comprehensive HRDD report were reviewed and officially adopted by the resolution of the Board of Directors Meeting No. 1/2568 on January 13, 2025.

Human Rights Due Diligence : HRDD

Does the company have an HRDD process : Yes

Bangkok Chain Hospital Public Company Limited and its subsidiaries conduct business involving diverse stakeholders and employees. To mitigate the risk of human rights violations, which could potentially impact business operations, the Company implements a comprehensive Human Rights Due Diligence (HRDD) process following the United Nations Guiding Principles on Business and Human Rights (UNGP).

The Company has established a framework for its HRDD process based on the key principles outlined in the UNGP, comprising five key components:

1. Policy Commitment – Establishing and communicating the Company’s commitment to respecting human rights.
2. Impact Assessment – Evaluating actual and potential human rights impacts from business activities.
3. Integration and Control Mechanisms – Embedding human rights considerations into company policies and implementing both internal and external control mechanisms.
4. Monitoring and Reporting – Tracking and disclosing the effectiveness of human rights measures.
5. Remediation and Corrective Actions – Addressing and remedying identified human rights issues.

3.4.2 Social operating results

Information on employees and labor

Employees and labor management plan

The company's employee and labor management plan : Yes

Employee and labor management plan implemented by the Company in the past year : Fair employee compensation, Employee training and development, Promoting employee relations and participation, Migrant/foreign labor, Child labor, Safety and occupational health at work

Organization and Employee development

Employees are considered as human resources that take an important role in driving the business to achieve goals and lead to sustainable success of the organization. Therefore, taking care and developing human resources is essential. It must promote both knowledge and skills, as well as efficient operations. The Company continuously promotes personnel development covering employees, directors, and executives. Details appear in the corporate governance section under the heading information about employees and under the topic of recruiting, developing, and evaluating the performance of duties of the committee.

Occupational health and Safety

Occupational health and safety is one of the important issues related to the health of medical personnel, employees, and stakeholders of the organization, as well as affecting the operations of the business. Therefore, the Company is aware and prioritize to occupational health and safety to create a good culture and working environment and build confidence among relevant stakeholders in every sector. The affiliated hospitals operate and comply with national standards and health services (Hospital Accreditation): HA) and international quality standards, Joint Commission International (JCI). In addition, the Company has established an occupational health and safety policy, which is essential to serve as a framework for the Company's operations regarding safety, occupational health, and the working environment. And determine the responsibility of every personnel to perform their duties.

Setting employee and labor management goals

• Employee training and development	Employee training hours	-: The average employee training hours are no less than 6 hours per person.	2025: The average employee training hours are no less than 6 hours per person.

Performance and outcomes for employee and labor management

Performance and outcomes for employee and labor management : Yes

The company prioritizes the development and care of its human resources, which aligns with its business strategy of prioritizing patient life and health. The company allocates funding to support external training programs for its personnel, offering a wide array of courses such as Advanced Cardiovascular Life Support (ACLS) for physicians, nurses, and other healthcare professionals, as well as the Pediatric Advanced Life Support (PALS Provider Course), among others. Enhancing these skills significantly improves the quality of patient care, which is a critical factor contributing to the hospital network receiving the “Hospital of Choice” award, thereby reflecting both excellence and high levels of patient satisfaction.

Furthermore, the company organizes activities aimed at fostering positive interpersonal relationships within the workplace, including celebrations for Chinese New Year, Thai New Year, and the birthdays of executives and employees. These initiatives promote a congenial and cooperative organizational atmosphere, which is essential for cultivating a sustainable and supportive corporate culture.

Overall, the company’s human resource management performance clearly demonstrates its commitment to developing personnel with up-to-date skills and knowledge while simultaneously nurturing a friendly and collaborative work environment. This, in turn, has led to the delivery of high-quality healthcare services that are widely recognized and esteemed.

Information about customers

Customer management plan

Company's customer management plan : Yes

Customer management plan implemented by the company over the past year : Responsible production and services for customers, Communication of product and service impacts to customers/consumers, Development of customer satisfaction and customer relationship, Consumer data privacy and protection

The Company is committed to regular communication and fostering understanding between the organization and all stakeholders, adhering to principles of accurate, transparent, and timely disclosure. This ensures that stakeholders receive appropriate and comprehensive information. The disclosure is carried out under the Company's policies and includes strategies and communication channels tailored to each group. These methods include discussions, surveys, and communication through social media, press releases, documents, and annual reports.

The Company provides opportunities for stakeholders to participate in issues that may impact their group by offering channels for receiving feedback, suggestions, and complaints through whistleblowing and grievance procedures. The stakeholder engagement policy outlines the responsibility to maintain a fair and effective system for listening to and responding to complaints. Furthermore, the Company places high importance on protecting the personal data of customers and patients with stringent and secure measures, which are used to enhance services that meet needs and maximize satisfaction. This forms the foundation for sustainable business operations with social responsibility.

Setting customer management goals

Does the company set customer management goals : Yes

Details of setting customer management goals

Target(s)	Indicator(s)	Base year(s)	Target year(s)
• Development of customer satisfaction and customer relationship	Customer satisfaction	-: The company aims to prioritize customer satisfaction by setting a target customer satisfaction score of no less than 80% in its operations each year.	2025: The company aims to prioritize customer satisfaction by setting a target customer satisfaction score of no less than 80%

Performance and outcomes of customer management

Performance and outcomes of customer management : Yes

In 2024, the company continuously developed its Customer Relationship Management (CRM) system, focusing on enhancing customer satisfaction and trust by providing accurate, transparent, and timely information. This has resulted in the retention of a long-term customer base. A notable example is Kasemrad Prachachuen Hospital receiving the "Hospital of the Year" award at the annual award ceremony, reflecting the quality of healthcare services and the hospital's commitment to effectively meeting the needs of its patients.

Additionally, the affiliated hospitals organized activities and projects to promote access to high-quality healthcare services, such as the "Quality Mother" event, organized by Kasemrad Rattathibet Hospital, which provided educational sessions for mothers and fathers. The hospital also held the "Mother Fair" to prepare for new family members. Another significant initiative was the WMC Live event organized by World Medical Hospital, which aimed to provide health information and disease treatment. Furthermore, the Telehospital system, developed in 2022, has improved the efficiency of medical services across the hospital network. This system reduces travel time and costs for patients in remote areas, resulting in quicker and more comprehensive access to medical services.

Information on community and society

Community and social management plan

Company's community and social management plan	: Yes
Community and social management plan implemented by the company over the past year	: Employment and professional skill development, Education, Religion and culture, Forests and natural resources, Sports and recreation, Occupational health, safety, health, and quality of life, Disadvantaged and vulnerable groups, Water and sanitation management, Reducing inequality

The company and its subsidiaries operate with a strong sense of responsibility towards the community and society, prioritizing adherence to safety, security, and health standards correctly and appropriately, while considering the impact on natural resources and the environment. The company's practices include promoting awareness of social and environmental responsibility among employees on an ongoing basis, as well as allocating a portion of profits to support activities that contribute positively to society and the environment. These approaches help prevent any negative impact on the quality of life of the public and the environment.

Additionally, the company collaborates and strictly adheres to the laws and regulations set by the relevant regulatory bodies, focusing on the sustainable development of society, communities, and the environment. The company supports the conservation and sustainable use of natural resources and places emphasis on promoting education for youth and supporting public benefit activities in disadvantaged communities to build resilient, self-sufficient communities in the long term.

Setting community and social management goals

Does the company set community and social management goals	: No
--	------

Performance and outcomes of community and social management

Performance and outcomes of community and social management	: Yes
---	-------

The company places great emphasis on continuous participation in social and community engagement initiatives, focusing on promoting public health and well-being, particularly among youth. This commitment is realized through various programs and activities addressing healthcare needs and educational support. One such initiative includes the "LET'S CELEBRATE THAI HEROES, PARALYMPIC PARIS 2024" event, during which the company provided health check-up vouchers to Paralympic athletes as a gesture of recognition and encouragement for their dedication. Additionally, the company's hospital network actively supports charitable running events aimed at promoting physical fitness and overall well-being. This support includes the provision of emergency vehicles, pre-run health assessments, first aid services, vitamin-infused beverages, and cooling towels for participants, fostering a culture of health consciousness among the public. Furthermore, the company has implemented donation programs to provide essential supplies and medical equipment to schools, orphanages, and government agencies. These contributions include hospital beds, wheelchairs, medicines, and medical supplies, along with financial donations to support educational programs, public sector operations, and Buddhist religious preservation efforts. These initiatives form an integral part of the company's ongoing commitment to corporate social responsibility throughout the year.

The outcomes of these social and community engagement efforts reflect the company's dedication to delivering high-quality healthcare services and supporting comprehensive social initiatives. Through workforce development, public health promotion, and assistance for underprivileged communities, the company upholds key indicators of social responsibility and sustainable management, reinforcing its role as a responsible and community-oriented organization.

4. Management Discussion and Analysis (MD&A)

4.1 Operation, financial condition and material changes

Operational overview

In 2024, The Company and its affiliated hospitals reported a total revenue of 11,832.4 million Baht, which similar to the previous year. The increase in revenue was primarily driven by outpatient services for both Thai and foreign patients which rose by 9.9 percent yoy. On the other hand, the revenue from inpatient services decreased by (11.3) percent yoy due to changes in the Kuwaiti government's policy of referring patients abroad for treatment. Revenue from social security patient increased slightly by 1.0 percent yoy because the Company was impacted by the reduction in service rates for complex treatment (RW>2) which affected total revenue by a decrease of (244.8) million Baht.

The Company reported earnings before interest, taxes, depreciation and amortization (EBITDA) of 2,708.7 million Baht a decrease of (6.7) percent yoy, with an EBITDA margin of 22.9. The net profit attributable to the Company was 1,282.4 million Baht reflecting a (8.8) percent decrease yoy. Net profit margin was 10.8 percent.

In 2024, the Company was impacted by the reduction in service rates for complex treatment (RW>2) which affected net profit by a decrease of (190.7) million Baht and the impact of gains on net monetary position amounted to 61.8 million Baht, following to Thailand Accounting Standard (TAS) No.29 regarding Financial Reporting in hyperinflationary Economies. The Company operates through the subsidiary Bangkok Chain International (Lao) Co., Ltd., which the Company holds 75.2 percent of stakeholder.

Analysis on the operation and financial condition

Operating results and profitability

In 2024, the Company and its affiliated hospitals reported total revenue of 11,832.4 million Baht, which similar to the previous year. The revenue from general patient amounted to 7,929.5 million Baht, a decrease of (0.6) percent yoy. The details are as follows:

- **Revenue from OPD patients** amounted to 4,426.6 million Baht, an increase of 9.9 percent yoy. This growth was due to the rise in Thai OPD patients seeking services at specialized centers such as specialized internal medicine centers and skin care and aesthetic centers as well as mobile health checkup services in collaboration with external private organizations. Additionally, the revenue growth from the new hospitals. Furthermore, revenue from the Company's new services continued to grow including skin and aesthetic services under Kasemrad Plastic Surgery (KPS) and mobile dental services through Bangkok Chain Dental Company.
- **Revenue from IPD patients** amounted to 3,502.8 million Baht, a decrease of (11.3) percent yoy. The main reason was the impact of changes in the Kuwaiti government's policy of referring patients abroad for treatment, which resulted in reduced revenue from foreign patients. However, in 2024 excluding revenue from Kuwaiti patients, the revenue from foreign patients still

grew by 17.3 percent compared to the previous year.

- **Revenue from social security patients** amounted to 3,888.5 million Baht, an increase of 1.0 percent yoy. This was due to the Company recording extra items from Social Security Office, which impacted the revenue by a decrease of (244.8) million Baht. However, revenue from social security patients continued to grow due to an increase in the number of registered people in high demand hospitals after the quota expansion. Additionally, in 2024 Social Security Office has announced policies to enhance healthcare services for insured individuals, which supported the Company's revenue growth. These policies included annual health checkups, Obstructive Sleep Apnea test, mobile dental services, the mou for five complex diseases. The revenue continued to grow from social security patients using copayment with other benefits such as group insurance, health insurance.
- **Revenue related to COVID-19 treatment from government programs** amounted to (92.6) million Baht, reflecting a decrease of (4.3) percent yoy.

In 2024, the Company reported profit from operating activities of 1,710.9 million Baht, a decrease of (12.7) percent yoy. Earnings before interest, tax, depreciation and amortization (EBITDA) amounted to 2,708.7 million Baht, a decrease of (6.7) percent yoy. The EBITDA margin was 22.9 percent. Net profit attributable to owners of the Company amounted to 1,282.4 million Baht reflecting a decrease of (8.8) percent yoy. The net profit attributable to owners of the Company stood at 10.8 percent

Asset management capability

As of 31 December 2024, the Company has total Assets totaled of 17,374.8 million Baht, a decrease of (2.0) percent comparing to the end of previous year. This includes a decrease in current assets due to accrued revenue, account receivables, cash and cash equivalents used for the expansion of the new hospital, renovations of the existing hospital building, payment of the registered capital of subsidiaries, and repayment of loans from financial institutions. Non-current assets increased due to land, buildings, and equipment, as a result of adjustments made in accounting records in accordance with the Financial Reporting in hyper inflationary Economies in the Lao PDR.

The total liabilities amounted to 3,347.9 million Baht, a decrease of (16.8) comparing to the end of previous year. Mainly due to the repayment of long-term loans from financial institutions.

The total shareholder's equity amounted to 14,027.0 million Baht, an increase of 2.4 percent comparing to the end of previous year was due to the retained earnings generating from the operation.

4.2 Potential factors or incidents that may materially affect the financial condition or the operating results

Significant factors or incidents that may materially affect the future financial condition or the operating results

For the fiscal year 2025, the Company continues to focus on enhancing the capability of medical services for all levels of existing patients, as well as expanding the patient base both domestically and internationally. This will be achieved through the enhancement of medical services in the hospitals' medical centers. Additionally, with the new services provided, the performance of the three newly opened hospitals will continue to demonstrate consistently improved operational outcomes. The renovations of several hospitals completed in 2025, along with upgrading Karunvej Hospital Pathumthani to Kasemrad Hospital Pathumthani, will significantly contribute to an increased number of patients. This will serve as a supporting factor for the growth of the Company's revenue.

In 2025, the Company received an increased quota of insured patients from the Social Security Office for hospitals with the capacity to provide services to insured individuals. The Company will continue to raise awareness and expand the insured patient base at Kasemrad and Karunvej hospitals. Nevertheless, the Company will continue to maintain its current patient base while expanding to new groups, such as patients from the Maldives.

The Company remains committed to maintaining high-quality medical services and expanding its patient base through the opening of new hospitals and improvements to existing ones, with the aim of sustainable growth. The operational details in line with the implementation of the Company's growth strategy are as follows:

1. Continuous improvement in the overall operation of all three new hospitals.

1) Kasemrad International Hospital Aranyaprathet, with a capacity of 110 beds, is located near Rong Kluea Market in Aranyaprathet District, Sa Kaeo Province. The hospital targets Cambodian patients and local residents. For 2024, the hospital reported revenue of 228.0 million Baht, reflecting an 16.2 percent increase yoy. EBITDA was 26.4 million Baht rising 94.12 percent yoy. The hospital has the following strategic plans:

- Prepare service points at the border for receiving and sending Cambodian patients, while facilitating the processing of documents for entry into Thailand, in preparation for the permanent border opening in 2025.
- Expand the network of partner clinics, including public hospitals in Cambodia, to serve as a referral hub for patient for both Thai and foreign patients.
- Continuously establish networks with insurance companies, insurance agents, government agencies, and private sectors, both in Thailand and Cambodia, outside of the Poipet area to build trust and create channels for promoting activities, treatment packages, room rates and special services.
- Organize seminars to educate people and organizations through both offline and online channels, raising health awareness while also promoting the hospital.

2) Kasemrad Hospital Prachinburi, with a capacity of 115 beds, is located in the 304 Industrial Estate, Si Maha Phot District, Prachinburi Province. The hospital targets general and social security patients. For 2024, the hospital reported revenue of 195.8 million Baht, a (9.6) percent decrease yoy. EBITDA was (29.2) million Baht declining 52.1 percent yoy. The hospital has the following strategic operational plans:

- Improve the scheduling of doctors, medical staff, and service systems to increase efficiency, reduce patient waiting times, and extend service hours for medical centers with high patient volumes, such as the Pediatrics Center, Rehabilitation Medicine Center and Dental Center.
- Continuously follow up with patients after service to increase the return rate of existing patients. Additionally, promote sales activities through both online and offline channels to expand the patient base, including both general patients and those under the social security program.
- Expand the base of social security patients by increasing awareness among hospital staff and medical personnel, and through online promotion. This will ensure that patients receive more effective services as social security patients can also use copayment with other benefits such as group insurance, health insurance and self-payment options.
- Expand the network of clinics to establish a referral hub for patient in Prachinburi Province.

3) Kasemrad International Hospital Vientiane, with a capacity of 110 beds, Located in Vientiane Capital, Lao PDR. This hospital targets general patients and international patients. For 2024, the hospital reported revenue of 352.2 million Baht, an increase of 17.5 percent yoy. EBITDA was 33.2 million Baht. The hospital has the following strategic operational plans:

- Build relationships with local hospitals, government agencies, and private companies to raise awareness of the hospital and increase access to services for patients at all levels. This will be accompanied by the continuous expansion of networks with agencies and insurance companies both domestically and internationally.

- Enhance the efficiency of the service system to simplify processes and reduce patient waiting times, while providing continuous training for staff and hospital personnel to strengthen knowledge and improve operational capabilities.
- Organize public relations activities to increase health awareness among local residents, along with promotional activities during festivals, such as health check-ups, dental check-ups, vaccination packages, prenatal care etc.

2. Enhancing Medical Services for General Patients and Social Security Program Patients

The Company is enhancing medical services for both general patients and those under the social security program, as well as expanding the base of insured individuals. Key strategies for operation include:

- **Accelerating awareness and expanding the base of registered person.** In 2025, the Company received an increase in the quota of insured patients based on the capacity and service standards of the hospitals in its network. The total quota for insured individuals is 1,878,500 people, reflecting a 1.2 percent yoy increase. As of Q4/2024, the number of insured individuals registered with hospitals in the network is 1,033,657 people, reflecting a 1.7 percent yoy increase. For 2025, the Company expects to further expand the insured base following the upgrade of Karunvej Hospital Pathumthani to Kasemrad Hospital Pathumthani, starting January 1, 2025. This upgrade will enhance the hospital's image, including the addition of specialized medical centers and improved facilities for patients. Additionally, the completion of renovations at all Kasemrad hospitals in 2025 will support the registration of insured individuals at these hospitals.
- **The Company officially inaugurated the Kasemrad Ari Radiation Oncology Clinic** in September 2024, providing services to general patients and serving as a referral clinic for social security patients within the Kasemrad network. In 2024, the clinic reported revenue of 15.4 million Baht and EBITDA was 0.6 million Baht. The clinic specializes in cancer treatment through radiation therapy, utilizing advanced technologies such as CT Simulation for radiation planning, Linear Accelerator, and High Dose Rate Brachytherapy, a precise technique that minimizes side effects for patients. For 2025, the Company plans to extend service hours to accommodate up to 65 patients per day. Additionally, the clinic aims to expand its patient base by including social security patients from other hospital networks, as well as civil servant and universal coverage patients.
- **Bangkok Chain Dental Co., Ltd has opened the mobile dental service** through a joint venture between Bangkok Chain Hospital Public Company Limited and Dental Factory Co., Ltd., with ownership stakes of 60 percent and 40 percent, respectively. In 2024, the Company has provided services in five provinces: Bangkok, Nonthaburi, Pathum Thani, Nakhon Ratchasima, and Rayong. The service received positive feedbacks from government agencies, private companies, public schools, and private schools. For 2025, the Company aims to expand customer base by increasing the number of mobile dental units while also extending services to additional provinces.
- **The Company launched a plastic surgery center** to capitalize on Thailand's growing beauty market operating under the brand Kasemrad Plastic Surgery (KPS). The center offers services using medical equipment and technology that meet the standards of large hospitals with highly experienced and well-recognized surgeons. In 2024, the Company opened two branches: Kasemrad International Hospital Rattana Thibeth and Kasemrad Hospital Ramkhamhaeng. For 2025, the Company plans to expand its branches to other hospitals under Kasemrad network while also growing its customer base through online and offline promotional activities

3. Hospitals currently under construction or renovation are proceeding according to the plan.

The Company has an expansion plan for two hospitals as follows:

- **Kasemrad Hospital Suvarnabhumi**, located in Samut Prakan Province, has approximately 268 licensed beds and an investment budget of around 1,650 million Baht. The funding will come from internal cash flow and long-term loans. Currently, the land is being prepared and an EIA is being submitted within Q4/2024. Construction is expected to begin in 2025 and the hospital is anticipated to open in early 2027.
- **Kasemrad Hospital Rayong**, Rayong Province has approximately 250 registered beds and targets both general patients and those covered under the social security program. With around 517,000 insured individuals and multiple industrial estates in the province, there is a strong opportunity for competition and expanded access to healthcare services. Additionally, Rayong is part of the Eastern Economic Corridor (EEC), allowing the Company to benefit from tax incentives for establishing a hospital in the area. The Company is currently in the design phase and preparing to submit an EIA. Construction is expected to begin in 2026, with operations commencing in 2028.

In 2024, the Company focused on enhancing service quality by establishing new specialized centers and renovating hospital environments to improve patient experience and satisfaction across all levels. As part of this initiative, the Company completed renovations at four hospitals which have commenced operations. The details are as follows:

- **Kasemrad Hospital Chachoengsao**, the improvement of the internal environment of the hospital and the establishment of a comprehensive heart center helping reduce waiting times for treatment. As a result, the hospital has become a referral hub for heart disease patients in Chachoengsao province and surrounding areas.

- **Kasemrad Hospital Prachachuen**, the improvement of service areas, inpatient rooms, intensive care unit (ICU), emergency rooms (ER), and x-ray rooms. After opening the newly improved facilities, the hospital has been able to allocate space more efficiently for patient services, reducing waiting times and improving the hospital's image. This has contributed to increased registrations for insured persons with the hospital in 2025.

- **Kasemrad Hospital Bangkai**, the improvement of both the interior and exterior design of the hospital building, including the dialysis center, laboratory, delivery room, operating room, inpatient rooms, and waiting areas for outpatients. For this hospital, there are still some areas and specialized centers under ongoing improvements, which will continue into 2025.

- **Kasemrad Hospital Pathumthani**, the renovation of a new building for general patients including a premium dental center, health check-up center and inpatient rooms. Since the gradual opening of these services in Q2/2024, patients have experienced more convenience in accessing services, contributing to insured persons returning to register with the hospital.

For 2025, the Company continues to implement renovations for both interior and exterior hospital spaces across its network. The ongoing improvements are as follows:

- **Kasemrad Hospital Bangkai**, the renovations of outpatient service areas for social security and general patients as well as intensive care unit (ICU) which is expected to be fully completed by the beginning of 2026.

- **Kasemrad Hospital Pathumthani**, the renovation of the existing building which includes intensive care unit (ICU), outpatient service areas, emergency rooms (ER) and service areas in the new building, is aimed at accommodating the growth of both Thai and international patients. The entire renovation is expected to be completed by March 2025. This will result in an improved atmosphere within the hospital, an increased capacity to accommodate more patients, and better management of space and services. It will also reduce waiting times, enhance satisfaction, and provide a positive experience for all levels of patients.

- **Kasemrad Hospital Maesai**, the construction of a new 3-story building to accommodate the needs of both Thai and international patients. The new building will include areas for general patient, emergency rooms (ER), pediatric center, dental center and inpatient rooms. Construction is set to begin in March 2025, with expected to operate in Q2/2026.

- **Kasemrad Hospital Ramkhamhaeng**, the construction of a new building to accommodate a larger number of general and social security patients. The building provides outpatient service areas, inpatient rooms and a parking building. Construction is expected to begin within 2025, with the facility anticipated to open in 2027.

Part 2 Corporate Governance

6. Corporate governance policy

6.1 Overview of the policy and guidelines

Overview of the policy and guidelines

Corporate governance policy and guidelines : Yes

The Company places importance on conducting business with integrity, transparency, and responsibility towards society and all stakeholders according to the corporate governance code. Therefore, the Company has established the business code of conduct and the corporate governance code in writing by compiling rules, regulations, criteria, and practices of The Securities and Exchange Commission, Thailand and adapting them to the Company's practices. The Company has also reviewed them to ensure that they are in line with the changes in legal requirements and specific characteristics of the industry's business operations.

The Company has published its policies and handbooks regarding business ethics as well as the good corporate governance to create understanding. They are also used as guidelines for proper operation of employees at all levels and to provide information to shareholders, stakeholders, investors, and other interested parties in order to determine and disclose the guidelines for promoting compliance with business code of conduct. More details on handbooks regarding business code of conduct and the good corporate governance code are available on the Company's website (www.bangkokchainhospital.com.)

The Board of Directors, which represents the shareholders, is responsible for supervising the business in accordance with the laws, objectives, regulations, and resolutions of the shareholder meeting, as well as overseeing the management to achieve operational goals according to strategies and annual plans approved by the Board of Directors. In order to enhance its operational efficiency, the Board of Directors has therefore appointed subcommittees, namely Audit Committee, Executive Committee, Sustainability, Governance and Risk Management Committee, and Nomination and Remuneration Committee with expertise and experiences in related fields to perform their duties according to the established approval authority with integrity and maintain the Company's interest. More details are available in (56-1 One Report) on the Scope of Power of the Committee section.

As of December 31, 2024 The Company's Board of Directors had 12 directors, comprising of:

- 7 executive directors, accounted for 58.33% of total directors
- 5 non-executive directors, accounted for 41.67% of total directors
- 3 female directors, accounted for 25.00% of total directors
- 4 independent directors, accounted for 33.33% of total directors

This meets the requirements of The Securities and Exchange Commission, and The Stock Exchange of Thailand. In addition, the Board of Directors has appointed subcommittees as follows:

1) Audit Committee comprises of 3 independent directors whose term of office is equal to that of directors. (Audit Committee members are listed in the Information about Committee section.)

2) Executive Committee comprises of 8 directors and executives (Executive Committee members are listed in the Information about Committee section.) to perform specific duties and propose matters to the Board of Directors for consideration and acknowledgement.

3) Sustainability, Governance and Risk Management Committee comprises of 9 directors and executives. (Sustainability Committee members are listed in the Information about Committee section.)

4) Nomination and Remuneration Committee comprises of 3 directors. (Nomination Committee members are listed in the Information about Committee section.)

Each subcommittee has rights and duties as specified in its regulations. The Company has clearly separated roles and responsibilities between the Board of Directors and senior executives. The Company's Board of Directors is responsible for determining policies and supervising the operations of senior executives at policy level. Senior executives are responsible for managing the Company's operations in various areas in accordance with the established policies. This is to ensure that none of them has absolute unlimited power.

6.1.1 Policy and guidelines related to the board of directors

Are there policy and guidelines related to the board of : Yes
directors

Guidelines related to the board of directors : Nomination of directors, Determination of director remuneration, Independence of the board of directors from the management,

Nomination of directors

For the selection of company directors, the Board of Directors collectively reviews and selects individuals to serve as directors, taking into consideration the board diversity, necessary skills and experiences of directors, qualifications and expertise beneficial to the company or a Board Skills Matrix. The suitability is assessed based on qualifications, experiences, expertise, and past performance as company directors. Additionally, there is no gender bias to enhance diversity in the recruitment of qualified individuals as directors who shall have no prohibited characteristics according to laws and the Notification of the Securities and Exchange Commission, Thailand. Furthermore, the Board of Directors meeting No. 2/2023 on February 28, 2023 appointed the Nomination and Remuneration Committee to support the recruitment and selection of directors with qualifications suitable for the Company's business strategies, as well as evaluating performance and considering appropriate remuneration.

The procedures of appointing the Board of Directors are as follows:

1. One shareholder holds one vote per share.
2. Shareholders shall cast their votes to individually elect directors.
3. Individuals who receive the highest number of votes in descending order are elected as directors, up to the designated number of directors. In the event that the number of individuals with tie votes exceeds the designated number of directors, the Chairman shall cast the deciding vote.

Reference link for the nomination of directors policy and guidelines : <https://www.bangkokchainhospital.com/en/governance/cg-policies-and-compliance>

Determination of director remuneration

The Company has established a clear and transparent remuneration policy for directors, which has been approved by shareholders. The remuneration for executives is determined with the consideration of remuneration data of companies in the same industry in similar size, the Company's turnover and each executive's performance. Furthermore, the Board of Directors meeting No. 2/2023 on February 28, 2023 appointed the Nomination and Remuneration Committee to support the recruitment and selection of directors with qualifications suitable for the Company's business strategies, as well as evaluating performance and considering appropriate remuneration for directors.

Reference link for determination of the director remuneration policy and guidelines : <https://www.bangkokchainhospital.com/en/governance/cg-policies-and-compliance>

Independence of the board of directors from the management

The Company's Board of Directors consists of people with knowledge and capabilities in various fields who play an essential role in determining the Company's policies in collaboration with senior executives, planning both short-term and long-term operations, as well as setting financial policies and risk management and the organization overview. They also have a pivotal role in supervising, inspecting and evaluating the Company's and senior executives' performances to ensure that they align with the plans.

Reference link for the policy and guidelines related to independence of the board of directors from the management : <https://www.bangkokchainhospital.com/en/governance/cg-policies-and-compliance>

Director development

The Company's Board of Directors has a policy to promote and facilitate trainings and knowledge enhancement for its directors and executives to continuously improve and perform duties effectively through both internal and external training programs. Each member of the Board of Directors is required to undergo trainings to understand their roles as directors, committee members, and senior executives. The Board of Directors has participated in training courses provided by the Thai Institute of Directors (IOD), including the Director Certification Program (DCP) and the Director Accreditation Program (DAP).

For the orientation of new directors, the Board of Directors assigns the Company Secretary to prepare various information for the new directors. This is to ensure that the new directors are briefed on their roles, duties, responsibilities, the Company's policies, business information, and corporate governance practices before they assume their duties. This initiative aims to promote knowledge and understanding of the business for all directors, supporting them in performing their duties efficiently. Additionally, the Company has a policy to consistently enhance the knowledge of both directors and executives.

Reference link for the director development policy and guidelines : <https://www.bangkokchainhospital.com/en/governance/cg-policies-and-compliance>

Board performance evaluation

The Company has conducted monitoring to ensure strict compliance with the corporate governance code and corporate ethics. This monitoring, with a particular emphasis on matters related to disclosure of information, related party transactions, acquisition or disposal of assets, investments in and oversight of subsidiaries, and risk management, has revealed that the Company has adhered comprehensively to the relevant policies and practices.

Performance Appraisal of the Board of Directors and Subcommittees

The Company has stipulated the regular annual assessment of the Board of Directors and subcommittees. The assessment is conducted in 3 formats:

1. Self-assessment form of each committee

The self-assessment form of each committee has adopted guidelines from the Stock Exchange of Thailand to suit the characteristics and structure of the committee. The assessment results will play a crucial role in enhancing the performance and effectiveness of the committee's duties and operations. The committee evaluates the level of opinion scores or the level of implementation in 4 main topics:

- 1) Structure and qualifications of the board/committee
- 2) The board/committee meetings
- 3) Roles, duties, and responsibilities of the board/committee members
- 4) Other aspects such as the relationship between the committee and the management division

The Company Secretary distributes the self-assessment forms to all board/committee members for their self-evaluation at the end of each year. The secretary is responsible for collecting and summarizing the results, presenting them at the Board of Directors meetings for consideration, acknowledgment, and discussion on an annual basis.

2. Self-assessment form of each board/committee member

The self-assessment form for individual board/committee members serves as a tool to facilitate the review and development of their performance, ensuring effectiveness. The assessment categories align with the key responsibilities of board/committee members as stipulated by laws, charters, ethics, best practices of the Securities and Exchange Commission, and the Stock Exchange of Thailand. These categories include:

- 1) Structure and qualifications of the board/committee
- 2) The board/committee meetings
- 3) Roles, duties, and responsibilities of the Board of Directors and subcommittees

The Company Secretary distributes the self-assessment forms to all board/committee members for their self-evaluation at the end of each year. The secretary is responsible for collecting and summarizing the results, presenting them at the Board of Directors meetings for consideration, acknowledgment, and discussion on an annual basis.

3. Performance assessment of the Chief Executive Officer

The performance assessment of the of the Chief Executive Officer is divided into 2 categories, following the assessment guidelines set by the Stock Exchange of Thailand. These categories include:

Category 1 Performance assessment, consisting of 11 evaluation criteria as follows:

1. Leadership
2. Strategy formulation
3. Strategy implementation
4. Financial planning and performance
5. Operations in environmental, social, and corporate governance aspects

Category 2 Development of the Chief Executive Officer, consisting of strengths and areas of improvement. The Board of Directors provides additional insights in this category.

The Chief Executive Officer has participated in setting his or her own performance goals and acknowledges the approved goals each year. Subsequently, at the end of each year, the Company Secretary distributes the assessment forms to all board/committee members to assess the Chief Executive Officer. The Chief Executive Officer also conducts a self-assessment, which is used for a comparison of results and as valuable information for future development.

In addition, the Company Secretary shall compile and report the results at the Board of Directors meeting for consideration, acknowledgment and discussion on an annual basis.

Corporate governance of subsidiaries and associated companies

The Company has considered appointing directors and executives as directors of each subsidiary, with the approval of the Board. In the event that these directors and executives no longer hold positions in the subsidiary, the Board of Directors will consider appointing individuals to oversee the interests from time to time. The Company has also established policies for significant transactions, such as related party transactions.

Other guidelines related to the board of directors

Roles, Duties, and Responsibilities of the Board of Directors

The Company's Board of Directors engages in establishing the Company's visions, missions, strategies, goals, business plans, and budgets. Additionally, they oversee the management to ensure efficient and effective implementation of business plans, as well as establishing internal control systems, internal audits, and appropriate risk management measures. These operations have been regularly monitored in the Board of Director meetings. Moreover, scope of powers of the Board of Directors, Audit Committee, Executive Committee, Sustainability, Governance and Risk Management Committee, Nomination and Remuneration committee, as well as the Chief Executive Officer has been clearly and transparently determined.

The Company has established regulations and guidelines of business code of conduct in writing, as well as penal provisions. This is intended to guide stakeholders in carrying out their duties in line with the Company's missions with integrity. The Company has policies and procedures for addressing ethical issues, ensuring compliance with laws, moral standards, and societal customs. Furthermore, the Company upholds ethical practices concerning service charges and service recipients have the right to request details and expense for medical treatments. The Company adheres to the Health Facility Act B.E. 2541 (1998) and also complies with ethical standards in public relations, adhering to the Private Health Facility Act.

The Company has a clear management structure and measures to prevent conflicts of interest. For example, in case the Company deems that conflicts of interest may arise from any directors, such director shall abstain from voting. The Company has appointed the Audit Committee to share opinions and review the validity of related transactions to present to the Board of Directors. In addition, the Company has disclosed related transactions in the financial statements in accordance with established financial reporting standards.

Board of Directors Meeting

The Board of Directors determines at least 4 meetings per year with additional extraordinary meetings held as necessary. Clear agendas are set in advance with regular performance monitoring agenda. The Company sends invitation letters along with the agendas and documents at least 7 days prior to the meeting to provide directors sufficient time to review the information before attending the meeting.

In each meeting, the Chairman provides an opportunity for each director to express their opinions independently. In cases where any director has a vested interest in the matter under consideration, he or she is required to inform the meeting, refrain from expressing opinions, and abstain from voting on that specific matter. The minimum quorum required for decision-making at a board meeting is at least two-thirds of the entire board.

Internal Control and Audit System

The Company places importance on effective internal control system at both the management and operational levels. Clear responsibilities and authorities for employees and executives have been defined. There are controls in place to oversee asset usage and duties are segregated among employees, control monitors, and evaluators to ensure appropriate checks and balances.

Additionally, the Company has an internal control system related to financial operations, including a financial reporting system that presents reports to the executives in charge.

The Company has appointed internal auditors from Dharmniti Internal Audit Co., Ltd., an independent internal audit firm, with appropriate qualifications to serve as the Company's internal auditors. The selection is based on the adequacy of personnel, experience, knowledge, skills, and independence of the internal auditors to perform the duties of auditing various parts of the Company's operations. This is in accordance with the specified evaluation criteria for the adequacy of the internal control system.

The internal audit department is responsible for examining the operations of all units, conducting regular audits based on the annual audit plan, including the inspection of bookkeeping, bank deposit transactions, as well as conducting physical counts of inventory and fixed assets. In case of suspicion or any abnormal incidents within any unit, the internal audit department promptly investigates the operations of that unit the truth is ascertained. Then, the internal audit department regularly compiles audit reports and informs the Audit Committee of their findings.

6.1.2 Policy and guidelines related to shareholders and stakeholders

Are there policy and guidelines and measures related to : Yes
shareholders and stakeholders

Guidelines and measures related to shareholders and : Shareholders, Employee, Customer, Business competitors, Suppliers,
stakeholders Creditors, Government agencies, Community and society, Other
guidelines and measures related to shareholders and stakeholders

Shareholders

The Board of Directors prioritizes the rights and equality of shareholders. It is clearly specified in the corporate governance policy that shareholders have the right to receive share certificate, transfer shares, receive sufficient information in a timely manner and appropriate for decision making. Shareholders shall have the right to attend and vote at shareholder meetings to decide on important policy changes as well as the right to elect and dispose directors, the right to approve the appointment of an auditor, and the right in profit sharing.

Equitable Treatment of Shareholders

- The Company treats shareholders and stakeholders equally and fairly.
- The Company has a clear management structure and measures to prevent conflicts of interest. For example, in case the Company deems that conflicts of interest may arise from any directors, such director shall abstain from voting. The Company has appointed the Audit Committee to share opinions and review the validity of related transactions to present to the Board of Directors. In addition, the Company has disclosed related transactions in the financial statements in accordance with financial reporting standards.
- The Company has informed relevant details in the invitation letter prior to the shareholder meeting sufficient for decision making on each agenda, including distribution of the dividend, appointment of directors, consideration of directors' remuneration, appointment of auditors and determination of audit fees, as well as other important matters such as the Company's regulation amendment, share issuance and offering etc.
- The Company encourages shareholders to use a power of attorney when they are unable to attend the meeting in person by indicating at least 1 independent director as their proxy.

Prior to an Annual General Meeting of shareholders

Shareholders have the right to receive an invitation letter and information regarding the date, time, and venue of the meeting, agenda, rules, and procedures in attendance. (<https://www.bangkokchainhospital.com/storage/document/shareholder-meeting/agm2024/bch-agm2024-invitation-full-en.pdf>)

In 2024, the Company held its Annual General Meeting of Shareholders on April, 24 2024 via Electronic Meeting (E-AGM) The meeting shall be broadcasted from Bangkok Chain Hospital Public Company Limited, Head office No.44 Moo 4, Chaengwattana Road, Pakkret, Nonthaburi. The Company published Annual General Meeting documents on March 26, 2024 on the Company's website in both Thai and English versions. The Company sent invitation letter with details of the meeting agenda, opinion of the Board of Directors, all relevant information on matters to be decided at the meeting, as well as the date, time, and venue of the meeting, map, annual report, and power of attorney A, B, and C in Thai and English to shareholders on March 26, 2023 (at least 14 days prior to the meeting date), delivered by Thailand Securities Depository Company Limited.

In addition, the Company had a policy to offer more options for shareholders by nominating at least 1 independent director to be a shareholder's proxy for shareholders who were unable to attend the meeting in person. On November 29, 2023, the Company

announced information on the website of the Stock Exchange of Thailand and the Company's website at www.bangkokchainhospital.com in the Investor Relations section to open an opportunity for shareholders to propose agendas of the Annual General Meeting 2024 up until January 31, 2024

At the shareholder meeting

The Company implemented a technology for registration and vote counting to provide clear and transparent results. In addition, the Company invited independent individuals from legal consulting companies to witness the meeting and inspect the voting and vote counting to ensure a transparent and accurate meeting. At the Annual General Meeting 2024, all of the Board of Directors attended the meeting and encouraged all shareholders to participate and exercise their vote or authorize any persons to attend the meeting or one of the independent directors to vote on their behalf in case they were unable to attend the meeting. The Board of Directors also provided an equal opportunity for shareholders to express their opinions, ask for explanations, or inquire. Important inquiries and opinions were recorded in the minutes of the Annual General Meeting by the Company Secretary.

Following the shareholder meeting

The Company submitted the meeting resolutions to the Stock Exchange of Thailand according to regulations within 14 days after the shareholder meeting, as well as publishing the minutes of the meeting on the Company's website in the Investor Relations section to provide quick and convenient access of minutes to shareholders and general investors. (<https://www.bangkokchainhospital.com/storage/document/shareholder-meeting/agm2024/bch-agm2024-minute-th.pdf>)

Employee

The Company recognizes the importance of its employees who are considered as essential resource that supports and drives the organization to achieve its business goals. Therefore, the Company has policies to ensure employees' good quality of life by providing fair working conditions, appropriate welfare, career development opportunities, as well as safe and hygienic working conditions. The guidelines are as follows:

- Strictly comply with law and regulations regarding employees
- Provide safe and proper working environment for employees' lives and properties
- Treat employees well and respect their individuality and human dignity
- The Company fairly determines employee compensation according to their responsibilities and capabilities. Proper welfare are provided to employees, including the establishment of a provident fund and reimbursement of medical expenses in network hospitals.
- Consider the appointment and transfer, as well as fair rewards and penalties with consideration of employees' knowledge, capabilities, and suitability
- The Company considers its employees as valuable resources that shall be treated fairly. Thus, there are guidelines for continuously developing its personnel, such as organizing Excellence Management training in collaboration with Thammasat University Consulting Networking and Coaching Center.
- The Company focuses on recruitment, employment and operations without discrimination, which covers employees at all levels and all vulnerable groups, such as the disabled and other underprivileged people.
- The Company encourages its employees to adhere to the energy saving and environmental management policies for resource efficiency.
- Avoid unfair actions which may affect job security or threaten and put pressure on the employee's mental state.
- Employees have the rights to file a complaint when they have been treated unfairly according to the established system and process.
- Open for feedback and suggestion from employees at all levels equally and equitably

Customer

The Company is committed to provide high-quality, standardized, and safe services to its patients/customers. Thus, it has implemented HA (Hospital Accreditation) standards for hospital development and evaluation by The Healthcare Accreditation Institute (Public Organization) supported by the Ministry of Public Health which cover the hospital's health promotion. Joint Commission International (JCI), which is an international standard for hospital quality, has also been applied to providing services and improving the service quality for patients.

Business competitors

The Company has policies to treat business competitors with fair competition and never seek for their confidential information in a deceitful or inappropriate manner based on the following guidelines:

- Treat its competitors with fair competition
- Never attempt to defame its business competitors with false accusations
- Never violate confidentiality or obtain unauthorized access to the trade secret

Suppliers

The Company conducts business with partners and others parties according to trade terms and conditions or agreements that have been entered into in a fair and ethical manner, taking into account the reasonableness of price, quality and [service](#). It also places importance on environmentally friendly procurement and conducting business with partners who are environmentally responsible to build a good relationship along with driving partner capabilities and sustainable growth of the Company and subsidiaries. The Company has set guidelines for business partners as follows:

- Partners shall conduct business with integrity, transparency, honesty, accurate information disclosure, verifiability, and strict compliance with related laws.
- Partners shall fairly treat its competitors with fairness and not seek for their confidential information in a deceitful manner.
- Partners shall refrain from requesting, receiving or providing benefits dishonestly or conducting activities that lead to corruption risks.
- Partners shall have no conflicts of interest with the Company and its subsidiaries and never exploit the Company and its subsidiaries.
- Partners shall not disclose the confidential information without consent.
- Partners shall not violate any intellectual property.
- Partners shall establish complaint channels for stakeholders and the process to investigate and follow up on complaints for complainants.
- Partners shall strictly comply with labor law and human rights principles.
- Partners shall comply with occupational health and safety laws as well as encouraging its employees to acquire knowledge and understanding on safety and emergency procedures.
- Partners shall strictly comply with environmental laws and regulations from the government sector and establish measures to mitigate and minimize environmental impacts caused by its services.
- Partners shall conduct the risk assessment and regularly provide the trainings to handle emergency situations.

The Company has published Partner Code of Conduct for better understanding as a guideline for joint operations which was approved at the Board of Directors meeting No. 1/2024 on January 19, 2024 with an annual review at the Board of Directors meeting No. 1/2025 on January 13, 2025. The Company has continuously implemented policies and measures, as well as communicating internally and externally. More details on Partner Code of Conduct are available on the Company's website. (www.bangkokchainhospital.com)

Creditors

The Company treats its creditors fairly by strictly adhering to the conditions, contract specifications and never spend the funded loan in contrast with the objectives of the agreement with the moneylender. In case where the Company is unable to fulfill its contractual obligations, the Company shall report to creditors in advance for mutual resolutions.

Government agencies

The Company conducts business to strengthen and develop the national prosperity by adhering to relevant laws, rules, regulations and code of conducts according to general business etiquette.

Community and society

The Company conducts business with responsibility to the community and society. It places an emphasis on proper compliance with standards regarding safety, security, hygiene and the environment as well as considering the impact on natural resources and the environment. The guidelines are as follows:

- Continuously raise awareness on social and environmental responsibilities among employees at all levels
- Regularly spend a portion of profits on activities that contribute to society and environment
- Conduct business with minimal impact on the society, environment, and people's quality of life as well as encouraging the Company's business partners to recognize and conduct business with environmental responsibility

- Conduct, cooperate on or control strict compliance with legislative intent and regulations issued by regulatory agencies
- Place importance on community and social activities, focusing on social, community, and environmental development, as well as on preservation of natural resources, for example, establishing mobile medical units, promoting physical activities for good health and supporting patients who need financial assistance etc.

Other guidelines and measures related to shareholders and stakeholders

Anti-Corruption

The Company conducts business against all forms of corruption by implementing risk management and inspection processes to prevent and suppress corruption and misconduct. It also supports an organizational culture that adheres to integrity and righteousness. In 2024, the Board of Directors reviewed anti-corruption policies and guidelines and deemed that they still aligned with the Company's business operations and were appropriate for the current situations. Furthermore, there were no significant fault regarding anti-corruption and non-compliance with relevant laws or regulations, as well as the breach of business code of conduct.

In 2024, the Company completed the certification process and was a member of the Thai Private Sector Collective Action Against Corruption for the second consecutive time. Additionally, the Company continues to implement related policies and measures as well as communicating internally and externally, such as disseminating anti-corruption policies on the website www.bangkokchainhospital.com, regarding good corporate governance, employee training and orientation for better understanding, as well as regularly informing partners and contractors to ensure transparent procurement and business operations in accordance with established policies

- The Company prohibits bribery in all its forms for all activities related to the Company's business operations. No facilitation fee in any forms is offered to government officials, both directly and indirectly. In case where the company is required to donate for charity, provide business gifts or financial support for any activities, it shall be conducted in a transparent manner without intention to influence public/private officials to perform inappropriate actions.
- These policies shall be announced and published both internally and externally and serve as guidelines for all executives and employees to adhere to ethical principles. The Company has determined strict penalty measures on executives and employees involved in internal corruption, bribery, or any form of corruption.
- The Company communicates and emphasizes these measures through orientation and internal trainings to ensure that all executives and employees are aware of the importance of the anti-corruption policies. The Company also communicates with its employees about the Company's commitment to preventing and combating all forms of corruption.
- The Company has established appropriate internal control system to prevent its employees from committing or being involved in corruption.
- The Company have policies for whistleblowing and filing a complaint, as well as providing communication channels for employees and those involved to report suspicious activities to ensure that they are protected and that officers will be assigned or appointed to investigate every trace reported in a transparent and timely manner.
- The Company has established clear guidelines regarding anti-corruption, which were approved at the Audit Committee meeting and the Board of Directors meeting on August 15, 2017 with an annual review at the Board of Directors meeting No. 1/2025 on January 13, 2025. The Company has continuously implemented relevant policies and measures, as well as communicating internally and externally, for example, disseminating anti-corruption policies on www.bangkokchainhospital.com regarding good corporate governance, employee training and orientation for better understanding, as well as regularly informing partners and contractors to ensure transparent procurement and business operations in accordance with established policies. More details on anti-corruption policies and guidelines are available on the Company's website.

Human Rights

The Company is committed to treat its employees equally, fairly, and respectfully. Equal treatment is conducted regardless of gender, religion, culture, race without violation of sexual rights. To demonstrate this commitment, the Company has therefore established human rights policies and regulations for directors, executives, employees, and all relevant stakeholders to strictly adhere which can be summarized as follows:

- The Company supports, promotes and respects human rights and treat other individuals respectfully and equally. This includes employees, customers or patients, business partners, stakeholders, and all vulnerable groups without discrimination in terms of physical or mental difference, religion, race, nationality, skin color, gender, language, age, social status, marital status, place of origin, culture, opinions, or any other matters.
- The Company will definitely not engage in actions that violate human rights (Zero Tolerance Policy), especially the employment of children under the legal age specified by employment laws and the employment of forced labor and illegal migrant

workers for business operations and in the supply chain.

- The Company provides complaint channels regarding human rights violations related to or arising from the Company's operations. It places an emphasis on respecting the rights of complainants and whistleblowers. The Company will investigate and handle complaints transparently without delay.

- The Company has established clear human rights policies, which were approved at the Board of Directors meeting on January 16, 2023 with an annual review at the board of Directors meeting No. 1/2025 on January 13, 2025. The Company has continuously implemented relevant policies and measures, as well as communicating internally and externally to create and maintain an organizational culture that adheres to human rights and does not support or promote activities that violate human rights principles. More details on human right policies are available on the Company's website www.bangkok.chainhospital.com in the good corporate governance section.

Intellectual Property

The Company has determined information and communication technologies as essential factors to improve work efficiency. Therefore, every employee is required to take responsibility for the information in their possession and prevent unauthorized access. Dissemination or reproduction of documents that violate the copyright laws are not encouraged, as well as the use of products that infringe on intellectual property.

6.2 Business code of conduct

Business code of conduct

Business code of conduct : Yes

The Company's Board of Directors is committed to conducting business with integrity and fairness by establishing the Business Code of Conduct in writing. The code of conduct is intended to be used and disseminated to all directors, executives, and employees to ensure understanding of the ethical standards the Company adheres to in its business operations. It also serves as a guideline to demonstrate the Company's intention of transparent and responsible business practices with consideration of stakeholders, society, and environment. The aforementioned code of conduct reflects the Company's values and guidelines for employees' behavior and work practices within established ethical frameworks.

Policy and guidelines related to business code of conduct

Guidelines related to business code of conduct : Prevention of conflicts of interest, Anti-corruption, Whistleblowing and Protection of Whistleblowers, Preventing the misuse of inside information, Other guidelines related to business code of conduct

Prevention of conflicts of interest

The Company has established a policy regarding the Board of Directors, executives, and employees, requiring them to fulfill their duties for the utmost benefit of the Company. In cases where any individual has a vested interest or involvement in a matter under consideration, such individuals must notify the Internal Audit Unit responsible for such matters and refrain from participating in the deliberation of the relevant transaction.

The Company has established measures to prevent conflicts of interest that may arise from related party transactions of the Company and individuals with possible conflicts. Individuals with vested interests in any matter are not allowed to participate in the approval of such transactions. The Board of Directors ensures compliance with securities and exchange laws and regulations, notifications, orders, or provisions of the Stock Exchange of Thailand. This includes adherence to disclosure requirements for related party transactions and the acquisition or disposal of significant assets of the Company. The Company also adheres strictly to accounting standards set by the accountant association.

Furthermore, the Company arranges with the Audit Committee, auditors, or independent experts, as appropriate, to inspect and provide opinions on the reasonableness of related party transactions. The details of such related party transactions will be disclosed in the notes to financial statements which have inspected or reviewed by the auditors. The details are available in the corporate governance section under the internal control and related party transactions section.

Anti-corruption

The Company has established policies and processes to anti-corruption, with a committee overseeing internal control systems. The executives are responsible for creating awareness and communicating these policies to employees. The Company has disclosed details of its anti-corruption policies on its website (www.bangkokchainhospital.com) in the Investor Relations section, under the good corporate governance.

- The Company declared its commitment to participate in the Thai Private Sector Collective Action Against Corruption (CAC) on November 10, 2017 and has consistently renewed its participation. In this regard, the Company has implemented measures in line with its anti-corruption policies.

- The Company has established a regular risk assessment to identify potential risks arising from corruption and consistently reviewed the risk management measures to ensure that they remain appropriated and at the admissible level which can be referenced from the corruption risk management guidelines.

- The Company and its subsidiaries conduct initial orientation training for new employees and provide ongoing knowledge development trainings for the Board, executives, and employees to ensure that everyone has a clear understanding of the anti-corruption measures, the Company's expectations, and the penal provision. - Directors, executives, and employees will receive a copy of policies in a brochure format, and complete policies can be obtained from the Company's website. Additionally, the Company will communicate through annual events to ensure that everyone is informed and understands the Company's policies against corruption.

- The Company will conduct regular reviews of the anti-corruption policies, at least once a year. The Risk Management Committee will present them to the Audit Committee for consideration regarding adequacy and effectiveness. This includes reporting on the results of risk assessments and providing recommendations to the Board of Directors concerning best practices

that shall be maintained.

- The internal control systems and various regulations will undergo periodic reviews by the Internal Audit Department. Issues discovered during these reviews shall be promptly reported to the Audit Committee to ensure that the internal control systems are effective and sufficient for combating corruption.
- The Company encourages business partners to participate in the anti-corruption initiative.

Other guidelines related to business code of conduct

Disclosure and Transparency

The Company has information disclosure policy regarding the operations and performance of the company which shall be disclosed in an accurate, complete, consistent, timely, transparent, and reliable manner. Shareholder structure shall be presented clearly to show ultimate shareholders. Details on shareholding structure as well as the corporate governance are available in the annual information disclosure form (56-1 One Report).

The Company has clearly and transparently established a policy, which had been approved by shareholders, on remuneration for directors. In this regard, the remuneration of the Company's executives is determined with the consideration of remuneration data of companies in the same industry in similar size, the Company's turnover and each executive's performance.

The Board of Directors is responsible for the consolidated financial statements of the Company and its subsidiaries, as well as the financial information in the annual report. The financial statements are provided in accordance with financial

reporting standards by selecting and adhering to appropriate accounting policies with caution and best estimation. Important information shall be sufficiently disclosed in the remarks on financial statements. The Company has appointed the Audit Committee which consists of independent non-executive directors who are responsible for the quality of the Company's financial reports and internal control system.

The Company has policies to have investor relations managers responsible for complete, accurate, truthful, reliable disclosure of information in a timely and transparent manner, as well as equally and fairly communicating with third parties, such as shareholders, qualified institutional buyers, general investors, analysts, and related departments.

The Company provides information regarding the Company and its performances, financial statements, and information reported to the Stock Exchange of Thailand. More details are available on the Stock Exchange of Thailand's website at www.set.or.th and the Company's website at www.bangkokchainhospital.com. In cases where investors and related parties have questions or inquiries for additional information, please contact the Finance Director in charge of Investor Relations via email ir@bangkokchainhospital.com or via the Company's website at www.bangkokchainhospital.com or call 02-836-9940

6.3 Material changes and developments in policy and corporate governance system over the past year

6.3.1 Material changes and developments related to the review of policy and guidelines in corporate governance system or board of directors' charter

In the past year, did the company review the corporate governance policy and guidelines, or board of directors' charter : Yes

Material changes and developments in policy and guidelines over the past year : Yes

The Company adheres to and follows the principles of good corporate governance in its operations through the Board of Directors, executives, and employees and considers good corporate governance principles as a crucial factor in promoting its overall success as a socially responsible organization. The Board of Directors meeting No. 1/2025 on January 13, 2025 reviewed its policies and guidelines on corporate governance in accordance with the guidelines announced by The Securities and Exchange Commission, Thailand (SEC) or Principles of Good Corporate Governance for Listed Companies 2017 (CG Code). This serves as a framework for the Board of Directors and the listed companies to apply in their corporate governance practices for good turnover in a long run. Additionally, the Board of Directors has reviewed policies, guidelines, and charters of all committees to ensure alignment with current business operations and situations.

In 2024, the Company underwent developments and improvements in its policies and corporate governance as follows:

6.3.2 Implementation of the CG Code for listed companies

Implementation of the CG Code as prescribed by the SEC : Fully implement

Bangkok Chain Hospital Public Company Limited has adopted the principles of good corporate governance (CG Code) for listed companies as prescribed by the Securities and Exchange Commission (SEC). The company emphasizes transparency, accountability, and comprehensive disclosure through the following approaches:

Enhancing and Strengthening the Board Structure

The company has established a clear structure for the Board of Directors and the Audit Committee, with well-defined roles and responsibilities. Emphasis is placed on including independent members separate from key executives to ensure fair and effective decision-making.

Integrating ESG Principles and International Standards

In applying the CG Code, the company has incorporated environmental, social, and governance (ESG) principles into its management policies. Clear goals and key performance indicators (KPIs) are set to monitor progress and assess management effectiveness in all aspects.

Disclosure and Reporting Guidelines

The company prioritizes continuous and transparent disclosure of corporate governance-related information. Reports on management performance, risk management, and internal audits are regularly published to provide investors and stakeholders with essential and beneficial information for decision-making.

Utilizing Technology and Innovation in Governance Processes

To enhance management and auditing efficiency, the company employs information technology for data collection, analysis, and disclosure. The use of automation and IT systems reduces complexity in decision-making and internal auditing processes.

Performance Evaluation and Monitoring

A systematic evaluation process is in place to assess the performance of the Board of Directors and executives regularly. The assessment results are used to refine management strategies, ensuring alignment with the CG Code set by the SEC.

Bangkok Chain Hospital Public Company Limited has integrated the CG Code into its policies, reinforcing investor confidence and strengthening long-term stakeholder trust.

6.3.3 Other corporate governance performance and outcomes

The company is committed to continuously reviewing and improving its policies and practices in accordance with good corporate governance principles. This ensures that the company's policies align with the corporate governance standards for listed companies. In 2024, the company underwent corporate governance performance evaluations and received the following recognitions:

- SET ESG Ratings: The company received an "AA" rating from the Stock Exchange of Thailand for the second consecutive year. This reflects its commitment to sustainable business practices that consider environmental, social, and governance (ESG) factors while maintaining strong financial performance and long-term value creation for shareholders and stakeholders.
- Corporate Governance Recognition: The company was awarded a 5-star "Excellent" rating for corporate governance for the second consecutive year, based on the results of the 2024 Corporate Governance Report (CGR) for listed companies.
- ESG100 Recognition: The company was included in the ESG100 list for 2024, selected from 920 listed securities. It was recognized as an outstanding performer in ESG within the services sector and has been part of the ESG100 list for seven consecutive years (2018-2024).
- Sustainability Disclosure Recognition: The company received a Sustainability Disclosure Recognition from the Thaipat Institute for the second consecutive year.
- Outstanding Investor Relations Award: The company was honored with the Outstanding Investor Relations Award 2024 at the SET Awards 2024, a prestigious recognition in the Thai capital market. This award highlights the company's dedication to building investor confidence and maintaining strong stakeholder engagement.
- Corporate Excellence Award: The company received the Corporate Excellence Award in the Healthcare, Pharmaceutical & Biotechnology category at the Asia Pacific Enterprise Awards (APEA) 2024 Regional Edition. The chairman of the board and the highest-ranking executive : No
are from the same person

The chairman of the board is an independent director : No

The chairman of the board and the highest-ranking executive : Yes
are from the same family

Chairman is a member of the executive board or taskforce : Yes

The company appoints at least one independent director to : Yes
determine the agenda of the board of directors' meeting

The measures for balancing the power between the board of directors and the Management

The measures for balancing the power between the board of : Yes
directors and the Management

Methods of balancing power between the board of directors : Appointing an independent director to jointly consider the agenda
and Management of the board of directors' meeting

The company appointed an independent director to jointly determine the agendas of the Board of Director meetings to ensure compliance with corporate governance code for registered companies in accordance with Principle 3 Strengthen Board Effectiveness that balances power between the management division and the Board of Directors.

In each meeting, the Chairman provides an opportunity for each director to express their opinions independently. In cases where any director has a vested interest in the matter under consideration, he or she is required to inform the meeting, refrain from expressing opinions, and abstain from voting on that specific matter. The minimum quorum required for decision-making at a board meeting is at least two-thirds of the entire board.

7.2.3 Information on the roles and duties of the board of directors

Board charter : Yes

Scope of powers of Board of Directors

The Company's Board of Directors holds authorities, duties, and responsibilities for managing the Company in accordance with laws, company objectives and regulations as well as the resolutions of the shareholder meetings that are lawful in terms of integrity, honesty, and prudence to safeguard the Company's interests. In summary, the key authorities, duties, and responsibilities are as follows:

1) Arrange the preparation of financial statements, including the profit and loss statements as of the end of the accounting period, which have been audited, and present them at the shareholder meetings for consideration and approval.

2) The Board may delegate authority to one or more directors or any other persons to perform any specific act on behalf of the Board under its control. The Board may also delegate authority to empower such individuals as the Board deems appropriate, within a timeframe determined by the Board. The Board has the right to revoke, withdraw, modify, or amend designated persons or the authority granted as deemed appropriate.

Moreover, the Board may delegate authority to the Executive Committee with specific details within the scope of powers of the Executive Committee. The delegated authority must not involve granting powers that would enable the Executive Committee to consider and approve transactions that may result in the Executive Committee or persons with possible conflicts' vested interest or conflict of interest with the Company or its subsidiaries, except for approving transactions that align with the policies and criteria previously considered and approved by the Board.

3) Set goals, guidelines, policies, and budgets, as well as overseeing the management and operations of the Executive Committee in accordance with the assigned policies. Legal matters that require approval from the shareholder meeting before implementation include capital increase, capital reduction, issuance of debentures, sale or transfer of the entire or part of the Company's business to other parties, and the acquisition or transfer of business from other companies, and the amendment to memorandum. Additionally, the Board has responsibilities in supervising the Company to comply with securities and exchange laws and the Stock Exchange's regulations such as related party transactions, and the buying or selling of significant assets according to the criteria set by the Stock Exchange of Thailand or relevant laws pertaining to the Company's business.

4) Consideration of the management structure involves appointing the Executive Committee, the Chief Executive Officer, and other committees as deemed appropriate.

5) Monitor the performances to ensure continuous alignment with strategic plans and budgets.

6) Consider and approve interim dividend payments to shareholders when the Company has earned sufficient profits to do so. Report the details of such dividend payments at the next shareholder meeting.

7) Review, approve, and adhere to policies or guidelines related to the Company's anti-corruption, as well as defining responsibilities for executives to manage effective communication to all personnel and stakeholders to ensure acknowledgement and compliance.

7.3 Information on subcommittees

7.3.1 Information on roles of subcommittees

Roles of subcommittees

Board of Directors

Role

- Audit of financial statements and internal controls

Scope of authorities, role, and duties

1) Arrange the preparation of financial statements, including the profit and loss statements as of the end of the accounting period, which have been audited, and present them at the shareholder meetings for consideration and approval.

2) The Board may delegate authority to one or more directors or any other persons to perform any specific act on behalf of the Board under its control. The Board may also delegate authority to empower such individuals as the Board deems appropriate, within a timeframe determined by the Board. The Board has the right to revoke, withdraw, modify, or amend designated persons or the authority granted as deemed appropriate.

Moreover, the Board may delegate authority to the Executive Committee with specific details within the scope of powers of the Executive Committee. The delegated authority must not involve granting powers that would enable the Executive Committee to consider and approve transactions that may result in the Executive Committee or persons with possible conflicts' vested interest or conflict of interest with the Company or its subsidiaries, except for approving transactions that align with the policies and criteria previously considered and approved by the Board.

3) Set goals, guidelines, policies, and budgets, as well as overseeing the management and operations of the Executive Committee in accordance with the assigned policies. Legal matters that require approval from the shareholder meeting before implementation include capital increase, capital reduction, issuance of debentures, sale or transfer of the entire or part of the Company's business to other parties, and the acquisition or transfer of business from other companies, and the amendment to memorandum. Additionally, the Board has responsibilities in supervising the Company to comply with securities and exchange laws and the Stock Exchange's regulations such as related party transactions, and the buying or selling of significant assets according to the criteria set by the Stock Exchange of Thailand or relevant laws pertaining to the Company's business.

4) Consideration of the management structure involves appointing the Executive Committee, the Chief Executive Officer, and other committees as deemed appropriate.

5) Monitor the performances to ensure continuous alignment with strategic plans and budgets.

6) Consider and approve interim dividend payments to shareholders when the Company has earned sufficient profits to do so. Report the details of such dividend payments at the next shareholder meeting.

7) Review, approve, and adhere to policies or guidelines related to the Company's anti-corruption, as well as defining responsibilities for executives to manage effective communication to all personnel and stakeholders to ensure acknowledgement and compliance.

Audit Committee

Role

- Others
 - Review for accuracy in collaboration with the internal auditor.

Scope of authorities, role, and duties

- 1) Review the accuracy, adequate disclosure, and the reliability of the Company's financial reports.
- 2) Review the suitability and effectiveness of the Company's internal control system and internal audit.
- 3) Participate in the evaluation of the qualifications and skills of the Chief Financial Officer and the Director of Accounting Department.
- 4) Consider the selection, appointment, and approval of remuneration of the firm that provides internal audit services for the Company, taking into account the knowledge, skills, and experience of the personnel of the respective firm, as well as approving the annual internal audit plan. In the case where the Company establishes its own internal audit unit, the Audit Committee shall approve the appointments, transfers, and withdrawals, as well as assessing the annual performance of the personnel responsible for the internal audit unit.
- 5) Consult and review the audit scope and plan of internal auditors and the Company's auditors to ensure alignment and coordination
- 6) Conduct reviews and examinations in collaboration with internal auditors regarding audit findings, observations, and recommendations.
- 7) Review to ensure that the Company adheres to securities and exchange laws, the Stock Exchange's regulations, and relevant laws pertaining to the Company's business.
- 8) Consider, select, propose appointments and remuneration of the Company's auditors, taking into account their independence, reliability, adequacy of resources, and the volume of audit work performed by the respective audit firm. This includes considering the experience of the personnel assigned to conduct the Company's audit, as well as attending meetings with the auditors without the presence of the management division at least once a year.
- 9) Conduct reviews and examinations in collaboration with internal auditors regarding financial reports, observations, and recommendations.
- 10) Review to ensure that the Company adheres to its anti-corruption policies.
- 11) Consider the Company's information disclosure in cases where there are related party transaction or transactions that may involve conflicts of interest, ensuring accuracy, completeness, and compliance with legal requirements and stock market regulations. This is to ensure that such transactions are reasonable and in the best interest of the Company.
- 12) Prepare the Audit Committee report to be disclosed in the Company's annual report. The report must be signed by the Chairman of the Audit Committee and include, at a minimum, the following information:
 - The opinion regarding the accuracy, completeness, and reliability of the Company's financial report
 - The opinion regarding the adequacy of the Company's internal control system
 - The opinion regarding the compliance with securities and exchange laws, the Stock Exchange's regulations, or relevant laws pertaining to the Company's business
 - The opinion regarding the suitability of the auditors
 - The opinion regarding potential conflicting of interest
 - The number of audit committee meetings and the attendance of each member
 - The overall opinions or observations received by the Audit Committee regarding the fulfillment of duties in accordance with the charter
 - Other particulars that are deemed necessary for shareholders and general investors to be aware of within the scope of duties and responsibilities assigned by the Company's Board of Directors
- 13) Any other operations carried out as assigned by the Company's Board of Directors with the approval of the Audit Committee.
- 14) Possess the authority to conduct audits and inspection as necessary on various matters, including seeking independent professional advice when deemed necessary by the Company's expenses, to ensure the effective fulfillment of duties and responsibilities.
- 15) Regularly review and amend the audit committee charter annually to ensure the relevance and appropriateness in alignment with the organizational environment.

In carrying out the aforementioned duties, the Audit Committee holds direct responsibility to the Board of Directors, while the Board of Directors also bears responsibility for the Company's operations to external parties.

Sustainability, Governance and Risk Management Committee

Role

- Risk management
- Corporate governance
- Sustainability development
- Climate-related risks and opportunities governance

Scope of authorities, role, and duties

- 1) Establish policies, goals, and practices related to sustainability and corporate governance covering economic, social, and environmental dimensions to support the sustainable business operation in a long run and present them to the Board of Directors for approval, as well as reviewing policies, goals, and practices to align with the Company's operational direction or strategies.
- 2) Support and promote collaboration in implementing sustainability initiatives throughout the organization by fostering knowledge and understanding among the Board, executives, and employees regarding sustainability, corporate governance, and organizational risk management. Additionally, the committee supports the integration of sustainability operations with the Company's strategies and plans to achieve the organization's sustainability goals.
- 3) Oversee operations and provide advice and recommendations on sustainability operations, including monitoring performance both internal and external sustainability indicators. Additionally, the committee supervise reporting or disclosure of information related to sustainability.
- 4) Support, oversee, and monitor operations to ensure compliance with laws, regulations, or stipulations of regulatory and relevant government agencies, as well as upholding good corporate governance principles in alignment with the Company's business code of conduct and good corporate governance principles.
- 5) Consider, review, and present organizational risk management policies and frameworks to the Board of Directors for consideration.
- 6) Review and provide approval for acceptable levels of risk, and present them to the Board of Directors for acknowledgment.
- 7) Oversee the business development and implementation in accordance with organizational risk management policies and frameworks consistently, ensuring that the Company maintains an efficient and continuous organization-wide risk management system.
- 8) Review organizational risk management reports to monitor significant risks and take actions to ensure that the organization has adequate and appropriate risk management.
- 9) Coordinate with the Audit Committee regarding critical organizational risks and collaborate with the internal audit department to ensure that the Company has an appropriate internal control system for risk management. This includes adapting and implementing the risk management system appropriately and consistent practices throughout the organization.
- 10) Report on sustainability operations, corporate governance, as well as organizational risks and significant risk management to the Board of Directors regularly.
- 11) Consider appointing working groups related to sustainability operations, corporate governance, and risk management as deemed appropriate. This includes defining roles, responsibilities, and accountability to ensure operational alignment with objectives.
- 12) Provide guidance and advice to the working groups involved in sustainability operations, corporate governance, and risk management, as well as considering appropriate guideline to address various data amendments related to the development of sustainability operations and the enhancement of the organizational risk management system.
- 13) Perform any other tasks related to sustainability, corporate governance, and risk management as assigned by the Board of Directors.

Nomination and Remuneration Committee

Role

- Director and executive nomination
- Remuneration

Scope of authorities, role, and duties

- 1) Establish criteria and processes for selecting individuals with suitable qualifications to serve as directors of the Board and subcommittees. This includes screening candidates through the defined selection process to present a list of individuals to the Board of Directors and/or at the shareholder meeting for consideration and approval.
- 2) Propose criteria for evaluating the performance of the committee to the Board of Director to be used in the assessment of overall performance of each committee.
- 3) Review the succession planning policy to ensure readiness in workforce management and continuous business operations.
- 4) Consider the model of the remuneration policy and establish appropriate remuneration for the Company's directors and subcommittee members in alignment with the Company's strategies, roles, and responsibilities as stipulated, as well as comparing the remuneration data with other companies in the same industry, which shall be presented to the Board of Directors and/or shareholder meetings for approval.
- 5) Report to the Board of Directors on the performance of the Nomination and Remuneration Committee.
- 6) Appoint working groups related to the nomination and remuneration review, ensuring appropriateness, as well as defining roles, responsibilities, and accountability to fulfil the objectives.
- 7) Perform any other operations related to the nomination and remuneration as assigned by the Board of Directors.

8. Report on key operating results on corporate governance

8.1 Summary of duty performance of the board of directors over the past year

Summary of duty performance of the board of directors over the past year

The Company conducts its business and operations under the earnest supervision of the Board of Directors, adhering steadfastly to an ideology of conducting business with fairness and responsibility to all stakeholders within the Principles of Good Corporate Governance for Listed Companies 2017 by The Securities and Exchange Commission, Thailand or Corporate Governance Code (CG Code) and in line with the Company's corporate governance policy and corporate ethics. The objective is to instill confidence among shareholders, investors, and all stakeholders, fostering a culture and values of the organization that contribute to the overall success of the business. Additionally, this approach supports the achievement of sustainable competitiveness and growth for the Company.

In 2024, the Board of Directors reviewed its charters, policies, measures, and various practices in organizational management according to the CG Code, including principles of good corporate governance at an international level. The examples of important performances are as follows:

- Reviewed and approved the visions, strategic plans, annual business plans, and medium-term and long-term business plans (3-5 years). The focus was on enhancing competitiveness through the creation and adaptation to cope with changing circumstances. Efficient cost management and consistent monitoring and supervision of operations were emphasized in line with the strategic plans.
- Reviewed the policies and practices related to good corporate governance, following the corporate governance code and corporate ethics. Additionally, criteria and qualifications relevant to succession planning were approved. This aims to plan for the recruitment and selection of personnel with the knowledge and abilities aligned with the strategic management direction to assume important positions or key positions with due retirement or that may become vacant in the future. This ensures continuity in the execution of tasks and effective organizational management.

In addition to disclosing compliance with the CG Code, the Company has also disclosed information on practices in other areas according to the corporate governance code. This includes the Company Governance Report of Thai Listed Company (CGR), the Annual General Meeting Quality Assessment (AGM Checklist), as well as enhancing the disclosure of Environmental, Social, and Corporate Governance (ESG) information of listed companies to reflect the Company's commitment to conducting business under good corporate governance that considers social and environmental impacts.

Assessment Result in Corporate Governance

Company Governance Report of Thai Listed Company (CGR)

The Company Governance Report of Thai Listed Company for the fiscal year 2024 involved an examination and monitoring of the corporate governance development of the registered companies in Thailand. The assessment was conducted based on criteria developed from the good corporate governance code of the Organization for Economic Cooperation and Development (OECD). The assessment results showed that the Company received an excellent rating, symbolized by 5 stars.

Sustainable Stock Assessment Project, SET ESG Ratings

The Sustainable Stock Assessment Project, SET ESG Ratings for 2024, conducted by the Stock Exchange of Thailand, involved the examination of registered companies that operate with a sense of responsibility towards stakeholders with the consideration of environmental, social, and corporate governance aspects. The objective was to strengthen organizational resilience and sustainable growth. The assessment resulted in a rating of AA.

Annual General Meeting Quality Assessment (AGM Checklist)

The Annual General Meeting Quality Assessment 2024, conducted by the Thai Investors Association as the project operator, aimed to evaluate the quality of the annual general meeting as assigned by the Securities and Exchange Commission, Thailand (SEC). The result was a perfect score of 100%.

The Examination of Registered Securities Company Excelling in ESG Practices

The Company has been selected as one of the ESG100 security portfolio by Thaipat Institute for the sixth consecutive year (2018-2024), reflecting its commitment to conducting business with responsibility towards the environment, society, and corporate governance principles. This recognition also positions the Company as a sustainable investment option capable of delivering long-term returns.

Thai Private Sector Collective Action Against Corruption

The Company declared its commitment to participate in the Thai Private Sector Collective Action Against Corruption (CAC) on November 10, 2017 and has consistently renewed its participation. In this regard, the Company has implemented measures in line with its anti-corruption policies.

8.1.1 Selection, development and evaluation of duty performance of the board of directors

Information about the selection of the board of directors

List of directors whose terms have ended and have been reappointed

List of directors	Position	First appointment date of director	Skills and expertise
Mr. KANTAPORN HARNPHANICH	Director (Executive Directors)	28 Apr 2015	Marketing, Digital Marketing, Governance/ Compliance, Business Administration

Mr. THAWAT SUNTRAJARN, M.D.	Director (Non-executive directors, Independent director)	26 Apr 2010	Health Care Services, Governance/ Compliance, Business Administration

Selection of independent directors

Criteria for selecting independent directors

The Board of Directors collaboratively conducts a preliminary assessment of the qualifications of individuals to serve as independent directors. This assessment is based on the qualifications and disqualifications outlined for directors in the Public Limited Companies Act, the Notification of the Capital Market Supervisory Board, and any relevant notifications, regulations, and/or rules. Additionally, the Board of Directors considers the selection of independent directors based on their qualifications, work experience, and other relevant suitability criteria. Subsequently, the proposed candidates are presented at the shareholder meeting for consideration and appointment as the Company's directors. The Company has a policy that the appointment shall include at least one-third of independent directors out of total directors, with a minimum of 3 independent directors in total. Furthermore, the Board of Director's charter stipulates that an independent director's tenure should not exceed 9 consecutive years from the date of their initial appointment as an independent director.

In the event of reappointing an independent director, the Board will thoroughly consider the necessity of such reappointment. Furthermore, a director of the Company can hold positions as a director in up to 5 other registered companies (including director positions within the Company) to ensure that he or she can fulfill the roles with maximum efficiency. The qualifications of independent director are as follows:

1. Hold shares not exceeding 1% of the paid-up capital of the Company, its subsidiaries and affiliated companies, or entities that may have conflicts of interest. This must include the shareholdings of related persons of such independent director.
2. Must be independent, whether directly or indirectly, from any financial and managerial relationship with the Company, its subsidiaries and affiliated companies, or entities that may have conflicts of interest, as well as having no benefits or vested interest in such manner within the past 2 years prior to the appointment as an independent director, unless thoroughly reviewed by the Board of Directors and deemed that such benefits or interest will not impact the independent director's ability to perform his or her duties and provide independent opinions
3. Must not be appointed as representative to protect the interests of the Company's directors, major shareholders, or shareholders associated with the Company's major shareholders.
4. Must not be involved in the management and is not a salaried employee, officer, or consultant of the Company, its subsidiaries and affiliated companies, or entities that may have conflicts of interest. Additionally, the director shall not have relation with or be a close relative of the Company's executives or major shareholders.
5. Be able to independently perform the duties and express opinions or report performances as assigned by the Board of Directors without being under the control of the Company's executives or major shareholders, including individuals who have relation with or are close relatives of such persons.
6. Have no other characteristics that would prevent them from providing independent opinions on the Company's operations. This definition is consistent with the requirements stipulated by the Securities and Exchange Commission, and the Stock Exchange of Thailand.

Business or professional relationships of independent directors over the past year

Business or professional relationships of independent : No

Selection of directors and the highest-ranking executive

The Board of Directors plays a pivotal role in determining strategies and business directions for sustainable growth. Regarding the process of recruiting and selecting directors, the Chief Executive Officer, and senior executives, the Board of directors is responsible for considering the appointment of the Chief Executive Officer, Deputy Chief Executive Officer, Executive Director, and Chairman of the Executive Committee. The process is conducted by evaluating individuals with suitable qualifications, leadership qualities, a broad vision, ethical integrity, and a transparent work history.

The process of recruiting and selecting executives and senior executives is outlined in the succession planning policy. In this regard, the Chief Executive Officer has the authority and main responsibilities for various administration aspects of the Company, as delegated by the Board of Directors. When the Chief Executive Officer position becomes vacant or the incumbent is unable to perform the duties, the Company will appoint an executive at a similar or subordinate level to temporarily act in place of the Chief Executive Officer until a suitable candidate is selected and appointed.

Criteria for recruiting Deputy Chief Executive Officer, Executive Director, and Chairman of the Executive Committee are as follows:

1. Have experience working in administration at least 5 years.
2. Have experience in administration in the position of line director or higher.
3. Have leadership and a broad vision.
4. Have the ability to strategize and manage organizational operations.
5. Have the ability to make decisions and solve problems with sound judgment, circumspection, in consideration of the utmost benefit of the organization.

Method for selecting directors and the highest-ranking executive

Method for selecting persons to be appointed as : Yes
directors through the nomination committee
Method for selecting persons to be appointed as the : Yes
highest-ranking executive through the nomination
committee

Rights of minority shareholders on director appointment

The Board of Directors prioritizes the rights and equality of shareholders. It is clearly specified in the corporate governance policy that shareholders have the right to receive share certificate, transfer shares, receive sufficient information in a timely manner and appropriate for decision making. Shareholders shall have the right to attend and vote at shareholder meetings to decide on important policy changes as well as the right to propose meeting agendas, the right to nominate qualified individuals for consideration for appointment as company directors, the right to elect and dispose directors, the right to approve the appointment of an auditor, and the right in profit sharing.

Method of director appointment : Method whereby each director requires approval votes more than half of the votes of attending shareholders and casting votes

Setting qualifications for the selection of directors

Information on the evaluation of duty performance of directors

Criteria for evaluating the duty performance of the board of directors

The Company has conducted monitoring to ensure strict compliance with the corporate governance code and corporate ethics. This monitoring, with a particular emphasis on matters related to disclosure of information, related party transactions, acquisition or disposal of assets, investments in and oversight of subsidiaries, and risk management, has revealed that the Company has adhered comprehensively to the relevant policies and practices.

Self-assessment form of each committee

The self-assessment form of each committee has adopted guidelines from the Stock Exchange of Thailand to suit the characteristics and structure of the committee. The assessment results will play a crucial role in enhancing the performance and effectiveness of the committee's duties and operations. The committee evaluates the level of opinion scores or the level of implementation in 4 main topics:

- 1) Structure and qualifications of the board/committee
- 2) The board/committee meetings
- 3) Roles, duties, and responsibilities of the board/committee members
- 4) Other aspects such as the relationship between the committee and the management division

The Company Secretary distributes the self-assessment forms to all board/committee members for their self-evaluation at the end of each year. The secretary is responsible for collecting and summarizing the results, presenting them at the Board of Directors meetings for consideration, acknowledgment, and discussion on an annual basis.

Self-assessment form of each board/committee member

The self-assessment form for individual board/committee members serves as a tool to facilitate the review and development of their performance, ensuring effectiveness. The assessment categories align with the key responsibilities of board/committee members as stipulated by laws, charters, ethics, best practices of the Securities and Exchange Commission, and the Stock Exchange of Thailand. These categories include:

- 1) Structure and qualifications of the board/committee
- 2) The board/committee meetings
- 3) Roles, duties, and responsibilities of the Board of Directors and subcommittees

The Company Secretary distributes the self-assessment forms to all board/committee members for their self-evaluation at the end of each year. The secretary is responsible for collecting and summarizing the results, presenting them at the Board of Directors meetings for consideration, acknowledgment, and discussion on an annual basis.

Evaluation of the duty performance of the board of directors over the past year

The Company has stipulated the regular annual assessment of the Board of Directors and subcommittees. The assessment is conducted in 2 formats: Self-assessment form of each committee and Self-assessment form of each board/committee member

Details of the evaluation of the duty performance of the board of directors

8.1.3 Supervision of subsidiaries and associated companies

Mechanism for overseeing subsidiaries and associated companies

Does the Company have subsidiaries and associated : Yes
companies

Mechanism for overseeing subsidiaries and associated : Yes
companies

Mechanism for overseeing management and taking : The appointment of representatives as directors, executives, or controlling
responsibility for operations in subsidiaries and persons in proportion to shareholding
associated companies approved by the board of
directors

The Company has considered appointing directors and executives as directors of each subsidiary, with the approval of the Board. In the event that these directors and executives no longer hold positions in the subsidiary, the Board of Directors will consider appointing individuals to oversee the interests from time to time. The Company has also established policies for significant transactions, such as related party transactions.

8.1.4 The monitoring of compliance with corporate governance policy and guidelines

Prevention of conflicts of interest

Operations for conflict of interest prevention over the past year

Has the company operated in preventing conflicts of : Yes
interest over the past year

The Company has established a policy regarding the Board of Directors, executives, and employees, requiring them to fulfill their duties for the utmost benefit of the Company. In cases where any individual has a vested interest or involvement in a matter under consideration, such individuals must notify the Internal Audit Unit responsible for such matters and refrain from participating in the deliberation of the relevant transaction.

The Company has established measures to prevent conflicts of interest that may arise from related party transactions of the Company and individuals with possible conflicts. Individuals with vested interests in any matter are not allowed to participate in the approval of such transactions. The Board of Directors ensures compliance with securities and exchange laws and regulations, notifications, orders, or provisions of the Stock Exchange of Thailand. This includes adherence to disclosure requirements for related party transactions and the acquisition or disposal of significant assets of the Company. The Company also adheres strictly to accounting standards set by the accountant association.

Furthermore, the Company arranges with the Audit Committee, auditors, or independent experts, as appropriate, to inspect and provide opinions on the reasonableness of related party transactions. The details of such related party transactions will be disclosed in the notes to financial statements which have inspected or reviewed by the auditors. The details are available in the corporate governance section under the internal control and related party transactions section.

Prevention of the use of inside information to seek benefits

Operations for prevention of the use of inside information to seek benefits over the past year

Has the company operated in preventing the use of : Yes
inside information to seek benefits over the past year

The Company has a policy prohibiting its directors and executives from using material internal information that has not been disclosed to the public for personal gain, including the buying or selling of company securities. Directors, executives, and employees with access to internal information should refrain from or abstain from trading company securities during the one-month period prior to the public disclosure of financial statements.

The Company has informed executives of various departments about their responsibilities in holding securities of the Company, as well as those of their spouses and underage children. Additionally, they are required to report changes in their securities holdings to the Securities and Exchange Commission in accordance with section 59 and the penalty clause outlined in section 22 of the Securities and Exchange Act (No. 5) B.E. 2559 (2016)

In 2024, there were no instances of directors, executives, and employees committing offenses related to the misuse of internal information and securities trading during the blackout period. The Company has also established penalties for cases of non-compliance by using the Company's internal information for personal gain, ranging from verbal warnings to termination of employment.

Anti-corruption action

Operations in anti-corruption in the past year

Has the company operated in anti-corruption over the : Yes
past year

Form of operations in anti-corruption : The participation in anti-corruption projects

The Company has established policies and processes to anti-corruption, with a committee overseeing internal control systems. The executives are responsible for creating awareness and communicating these policies to employees. The Company has disclosed details of its anti-corruption policies on its website (www.bangkokchainhospital.com) in the Investor Relations section, under the good corporate governance.

The Company declared its commitment to participate in the Thai Private Sector Collective Action Against Corruption (CAC) on November 10, 2017 and has consistently renewed its participation. In this regard, the Company has implemented measures in line with its anti-corruption policies, which include:

- The Company has established a regular risk assessment to identify potential risks arising from corruption and consistently reviewed the risk management measures to ensure that they remain appropriated and at the admissible level which can be referenced from the corruption risk management guidelines.
- The Company and its subsidiaries conduct initial orientation training for new employees and provide ongoing knowledge development trainings for the Board, executives, and employees to ensure that everyone has a clear understanding of the anti-corruption measures, the Company's expectations, and the penal provision.
- Directors, executives, and employees will receive a copy of policies in a brochure format, and complete policies can be obtained from the Company's website. Additionally, the Company will communicate through annual events to ensure that everyone is informed and understands the Company's policies against corruption.

- The Company will conduct regular reviews of the anti-corruption policies, at least once a year. The Risk Management Committee will present them to the Audit Committee for consideration regarding adequacy and effectiveness. This includes reporting on the results of risk assessments and providing recommendations to the Board of Directors concerning best practices that shall be maintained.

- The internal control systems and various regulations will undergo periodic reviews by the Internal Audit Department. Issues discovered during these reviews shall be promptly reported to the Audit Committee to ensure that the internal control systems are effective and sufficient for combating corruption.

- The Company encourages business partners to participate in the anti-corruption initiative.

3 Mr. PIPHOB VERAPHONG (Member of the audit committee)	5	/	5

8.2.2 The results of duty performance of the audit committee

In 2024, the Audit Committee held a total of 5 meetings, including one meeting with the auditors without the presence of the management division. The Audit Committee diligently carried out its responsibilities as assigned by the Board of Directors in accordance with its charter and the good corporate governance principles. The key highlights of their duties can be summarized as follows:

1. Reviewed the financial statements of the Company and its subsidiaries before presenting them to the Board of Directors as well as considering key issues and following guidance from the auditors, the persons in charge from the management division, and the Internal Audit Department. The Audit Committee's opinion aligned with the auditors' that the financial statements had been prepared accurately in accordance with financial reporting standards and adequately disclosed.
2. Reviewed the Company's internal control system, considering the assessment results of the internal control system in accordance with the guidelines of COSO (The Committee of Sponsoring Organizations of the Treadway Commission) which the Internal Audit Department has reported on a quarterly basis. The result showed that the internal control system was adequate and suitable for the Company's business operations.
3. Considered the selection and appointment of internal auditors from Dharmniti Internal Audit Co., Ltd., a third party which possesses appropriate qualifications to serve as the Company's internal auditors. This selection was based on the adequacy of personnel, experience, knowledge, capabilities, and independence of the internal auditors to perform the duties of auditing various parts of the Company's operations. This was in accordance with the specified evaluation criteria for the adequacy of the internal control system.
4. Reviewed to ensure that the Company had complied with relevant laws, regulations, and provisions. Additionally, the Audit Committee scrutinized the anti-corruption policies, as certified by the Thai Private Sector Collective Action Against Corruption.
5. Proposed the appointment of and compensation for auditors from KPMG Phoomchai Audit Co., Ltd. The Audit Committee was of the opinion that the performance in the past year followed the established procedures and had sufficient independence to fulfill the responsibilities as the Company's and its subsidiaries' auditors.
6. Considered related party transactions that might involve conflicts of interest, adhering to transparency and adequate disclosure to ensure compliance with the laws and regulations of the Stock Exchange of Thailand.
7. Approved the internal audit plans for the fiscal year 2024 and reviewed the audit reports for each quarter.
8. Reviewed the Audit Committee charter to ensure its relevance and suitability to the organizational environment. Additionally, the Audit Committee self-assessed its performance, examining completeness and compliance within the defined scope outlined in the Audit Committee charter.

The Audit Committee has performed its duties and responsibilities as assigned by the Board of Directors with full diligence and capability. All actions taken are for the benefits of the Company, shareholders, and stakeholders.

The results of duty performance of Sustainability, Governance and Risk Management Committee

In 2024, the Board of Directors appointed an additional director for Sustainability, Corporate Governance, and Risk Management Committee, namely Ms. Thitiporn Wongchaisuriya, M.D., to ensure comprehensive oversight of operational risks in the medical field in the scope of duties and responsibilities. This change is in line with the sustainable business development guideline in terms of Environment, Social and Governance (ESG). The Sustainability, Governance and Risk Management Committee organized a total of six meetings, which 100 percent of the members attended. The committees performed their duties and responsibilities as set out in the Charter and carried out other responsibilities as assigned by the Board of Directors. The key points of the operations can be summarized as follows:

1. Consider the company's annual risk management policy and plan, covering different types of risks from both internal and external factors that may affect the Company's operations.
2. Consider and plan strategies in accordance with the risk management policy to be able to assess, monitor, and control

the overall risks of the company to an acceptable level.

3. Monitor, follow, and control the results of risk management.
4. Report to the Board of Directors for acknowledgment of risk management results.
5. Consider sustainability framework and policy which is in line with the business strategies as well as monitor and follow the results regarding sustainable development goals related to its business operations.
6. Consider the sustainability operations and monitor the performance to disclose relevant sustainability information in accordance with both internal and external performance indicators.
7. Consider and review significant factors, including revising working processes and plans to ensure that the committees' responsibilities are aligned with the current situation and stakeholder engagement. Additionally, the committees encourage to evaluate the company's sustainable development by using external companies.

Following the operations, it is confident that the company can achieve the operation goals as set forth in order to maintain and create maximum benefits for shareholders and stakeholders.

Meeting attendance Nomination and Remuneration Committee

2 Mr. THAWAT SUNTRAJARN, M.D. (Member of the subcommittee)	2	/	2
3 Ms. PORNSUDA HARNPHANICH (Member of the subcommittee)	2	/	2

The results of duty performance of Nomination and Remuneration Committee

In 2024, the committee carried out its duties of the Nomination and Remuneration Committee to support the selection and nomination procedures of suitable candidates in line with company strategies to serve as directors including the determination of remuneration of directors appropriately. For the year 2024, the Nomination and Remuneration Committee held a total of two meetings, which 100 percent of the members attended, to perform its duties according to its Charter and executed tasks as assigned by the Board of Directors. The Summary of essences that is considered is as follows:

1. Review the structure of the Board of Directors and the charter of Nomination and Remuneration Committee to ensure that its duties are appropriate and consistent with the current situation.
2. Follow up and supervise the company's succession plan to prepare personnel to support and comply with business directions. This includes replacing individuals in key positions who are due to retire in the future.
3. Review annual evaluation forms to ensure that they align with the structure of Board of Director and sub-committees. The results can be summarized for performance reviews and to support the development of effective operations.
4. Consider the compensation and pension for the Board of Directors and sub-committees, ensuring they are appropriate to the company's strategy, duties, and responsibilities assigned.

The Nomination and Remuneration Committee has performed the duties assigned with care, prudence, transparency, accuracy, and in accordance with the established guidelines under the principles of good corporate governance, with the aim of maximizing benefits that will lead to the creation of long-term sustainable value for the company.

9. Internal control and related party transactions

9.1 Internal control

Summary of the opinion of the board of directors regarding the internal control of the company

On 19 January 2024, the Board of Directors, Audit Committee, and the managements had a meeting to assess the internal control system based on the audit results of the internal audit unit, recommendations of the auditors, and inquiries of additional information from the management. Following the assessment of the company's internal control system in five parts, namely the organization and environment, risk management, operation control of the management, information and communication systems, and monitoring system, the Board of Directors considered that the company has a adequately effective internal control system, while maintaining a sufficient internal control system in relation to the transactions with major shareholders, directors, executives, or related persons. For the internal control in other sections, the Board of Directors has an opinion that the company also maintains sufficient internal control. In addition, for good corporate governance, the Board of Directors has encouraged and supported the management to continually improve the quality of the internal control system.

For the internal control of the ten subsidiaries, the company has determined that its subsidiaries maintain an internal control system that is consistent with the company's internal control guidelines. Also, the company has assigned officials to inspect the operations of the subsidiaries. In 2024, it was found that the subsidiaries provided adequate and similar internal control in all five areas to the company.

9.1.1 Adequacy and appropriateness of the company's internal control system

Company's internal control system : The Committee of Sponsoring Organizations of the Treadway Commission (COSO)

The Committee of Sponsoring Organizations of the Treadway Commission (COSO)

The company has a strong internal control system, which is crucial for listed companies or those with public shareholders. An effective system helps prevent, manage, and mitigate risks or damages that may impact the company and its stakeholders. Therefore, it is the responsibility of the Board of Directors to ensure that the company has an adequate and appropriate internal control system to oversee operations efficiently in line with its goals, objectives, laws, and relevant regulations. This system must also safeguard assets from fraud and damage while ensuring the accuracy and reliability of financial records and reports.

9.1.2 Deficiencies related to the internal control system

	2022	2023	2024
Total number of deficiencies related to the internal control system (cases)	0	0	0

9.1.3 Opinions of the audit committee and auditor's observations on internal control

Does the audit committee have opinions on internal control : No
different from the board of directors' opinions?

Does the auditor have any observations on the company's : No
internal control?

9.1.4 Opinions of the audit committee on the position of the head of the internal audit unit

Head of the internal audit unit : Outsourced service

Audit Committee appointment of internal auditors from Dharmniti Internal Audit Co., Ltd., a third party which possesses appropriate qualifications to serve as the Company's internal auditors. This selection was based on the adequacy of personnel, experience, knowledge, capabilities, and independence of the internal auditors to perform the duties of auditing various parts of

the Company's operations. This was in accordance with the specified evaluation criteria for the adequacy of the internal control system.

9.1.5 Appointment, discharge, and transfer of the head of the internal audit unit

Does the appointment, discharge, and transfer of the head of : Yes
the internal audit unit require the audit committee approval?

The appointment, dismissal, and transfer of the Head of Internal Audit must be considered and approved in every Audit Committee meeting.

9.2 Related party transactions

The company has connected transactions with its subsidiaries and no individuals who may have conflicts of interest holding more than 10% of their shares. The connected transactions consist of purchase/sales of goods and services with subsidiaries with the set prices or compensations in accordance with normal business conditions and intercompany loan transactions. Whereas, the interest rates on intercompany loans are set at the rates close to the market rates and with appropriate conditions. The company has disclosed information in the notes to financial statements.

Related party transactions

Does the company have any related party transactions? : No

9.2.3 Policy and future trends of related party transactions and the compliance with the obligations specified in the prospectus of the company

Measures and procedures for approving related party transactions or connected transactions

The connected transactions are managed through normal conditions of business, such as providing raw material procurement services for group companies. The procurement and purchase department of the company is responsible for purchasing and charging fees for procurement services from subsidiaries. For the management of service fees, the company has set prices and conditions by taking into account the actual prices plus appropriate profits or normal business prices based on reasonable, proper, fair market conditions and prices by taking into account the best interests of the company. The company will report those connected transactions and conditions to the Audit Committee for considerations and opinions on the necessity and reasonableness of transactions.

For other connected transactions such as borrowings, the company has set prices and conditions according to the general trading or in accordance with reasonable price conditions by taking into account the best interests of the company. The company will assign the Audit Committee to provide opinions on the necessity and reasonableness of transactions. If the Audit Committee does not have expertise for considerations of the connected transactions, the company shall arrange for an independent expert or the company's auditors to provide opinions on the said connected transactions for decisions of the Board of Directors or shareholders, depending on the case.

In this regard, to make the connected transactions, the company shall comply with the law of securities and stock exchange, as well as regulations, notifications, orders, or regulations of the Stock Exchange of Thailand, while complying with the disclosure requirements of connected transactions and the acquiring or disposing of the company's important assets. For the approval of connected transactions, the directors or stakeholders have no rights to vote.

Future trends in related party transactions

The company expects that connected transactions will remain in the future, which shall be according to normal business operations with subsidiaries, such as raw material procurement services, purchasing assets from individuals who may have conflicts of interest or administrative services. For financial assistance, the company has no policy for further transactions, except in cases of necessity. For instance, the company or its subsidiaries shall face a liquidity shortage by connected transactions which may occur in the future. The Board of Directors shall comply with the above related measures or procedures for approval. In addition, the company shall disclose the connected transactions in the notes to financial statements audited by the company's auditors, in compliance with financial report standards.

9.2.4 Information on appraised assets and appraisal price in conjunction with the execution of related party transactions

Can be referred in attachment 4: assets for business undertaking and details of asset appraisal

Part 3 Financial Statement

Board of Directors' Responsibility Statement for the
Financial Report

Certification of the Accuracy of Information

The Company has carefully reviewed the information in this Annual Report and certified that such information is accurate, complete, not misleading, lack of any information that should be reported. In addition, the Company certifies that:

- (1) The financial statements and financial information summarized in the Annual Report contains accurate and complete information on the financial position, operating results, and cash flows of the Company and its subsidiaries.
- (2) The Company has established a good information disclosure system to ensure that the Company has disclosed the essential information of the Company and its subsidiaries correctly and completely.
- (3) The Company has established a good internal control system and supervised to ensure compliance with the existing system. The Company has informed the internal control assessment as of 13 January 2025 to the auditor and the Audit Committee of the Company, covering deficiencies and significant changes in the internal control system, including misconducts that may affect the preparation of the Company's and its subsidiaries' financial reports.

In this regard, as evidence that all documents are the same set of documents that the Company has certified, therefore the Company has assigned Ms.Pornsuda Harnphanich to notarize every pages of the documents. If any document does not have Ms.Pornsuda Harnphanich's signature, the Company will assume that it is not the information that the Company has certified the Accuracy of Information.

Auditor's Report

**Bangkok Chain Hospital Public Company Limited
and its Subsidiaries**

Financial statements for the year ended
31 December 2024
and
Independent Auditor's Report

Independent Auditor's Report

To the Shareholders of Bangkok Chain Hospital Public Company Limited

Opinion

I have audited the consolidated and separate financial statements of Bangkok Chain Hospital Public Company Limited and its subsidiaries (the "Group") and of Bangkok Chain Hospital Public Company Limited (the "Company"), respectively, which comprise the consolidated and separate statements of financial position as at 31 December 2024, the consolidated and separate statements of comprehensive income, changes in equity and cash flows for the year then ended, and notes, comprising a summary of material accounting policies and other explanatory information.

In my opinion, the accompanying consolidated and separate financial statements present fairly, in all material respects, the financial position of the Group and the Company, respectively, as at 31 December 2024 and their financial performance and cash flows for the year then ended in accordance with Thai Financial Reporting Standards (TFRSs).

Basis for Opinion

I conducted my audit in accordance with Thai Standards on Auditing (TSAs). My responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Consolidated and Separate Financial Statements* section of my report. I am independent of the Group and the Company in accordance with the *Code of Ethics for Professional Accountants including Independence Standards* issued by the Federation of Accounting Professions (Code of Ethics for Professional Accountants) that is relevant to my audit of the consolidated and separate financial statements, and I have fulfilled my other ethical responsibilities in accordance with the Code of Ethics for Professional Accountants. I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my opinion.

Key Audit Matters

Key audit matters are those matters that, in my professional judgment, were of most significance in my audit of the consolidated and separate financial statements of the current period. These matters were addressed in the context of my audit of the consolidated and separate financial statements as a whole, and in forming my opinion thereon, and I do not provide a separate opinion on these matters.

<i>Estimate of value of accrued medical treatment income from government</i>	
Refer to Notes 4(q) and 9	
The key audit matter	How the matter was addressed in the audit
The Group has accrued income from service contracts for patients under the government welfare programs which include accrued income under service contracts with Social Security Office. The amount of accrued income is significant and need to follow criteria, methods, and conditions set by the government welfare programs such as the number of insured individuals registered with the hospital and statistical data regarding hospital services and so on. Since the criteria, methods, and conditions for recognition the accrued income are complex, therefore, this matter is key area of focus in my audit.	The audit procedures included: • Understanding the recognition process of revenue and accrued income from providing services to patients under the government welfare program and testing the implementation of internal control designed by the Group. • Sampling tests the revenue transaction and accrued income with supporting documents to ensure the appropriateness of data and assumption that management applied including criteria, methods and conditions in accordance with government welfare programs. • Evaluating the appropriateness of accrued income by comparing them to historical data, the amount received during the year and relevant documents. • Sampling subsequent receipt after the reporting period with relevant documents. • Considering the adequacy of the disclosure in accordance with the financial reporting standards.

Impairment assessment of goodwill	
Refer to Notes 4(m) and 16	
The key audit matter	How the matter was addressed in the audit
The Group performs test impairment of goodwill annually in accordance with Thai Financial Reporting Standards (TFRSs). The carrying amount of goodwill as at 31 December 2024 is Baht 329 million which is material to the financial statements. In the impairment testing, the recoverable amount has been calculated using discounted cash flow (“DCF”) which management involves a judgment in determining the key assumptions. Therefore, this matter is key area of focus in my audit.	My audit procedures included: • understanding and assessing management process for impairment testing including determining the recoverable amount; • evaluating the appropriateness of valuation technique applied for the determination of recoverable amount of goodwill, including evaluating the appropriateness of key assumptions by comparing them to historical data and other information and testing calculation; • considering the adequacy of the disclosures in accordance with the Thai Financial Reporting Standards

Other Information

Management is responsible for the other information. The other information comprises the information included in the annual report but does not include the consolidated and separate financial statements and my auditor’s report thereon. The annual report is expected to be made available to me after the date of this auditor's report.

My opinion on the consolidated and separate financial statements does not cover the other information and I will not express any form of assurance conclusion thereon.

In connection with my audit of the consolidated and separate financial statements, my responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the consolidated and separate financial statements or my knowledge obtained in the audit, or otherwise appears to be materially misstated.

When I read the annual report, if I conclude that there is a material misstatement therein, I am required to communicate the matter to those charged with governance and request that the correction be made.

Responsibilities of Management and Those Charged with Governance for the Consolidated and Separate Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated and separate financial statements in accordance with TFRSs, and for such internal control as management determines is necessary to enable the preparation of consolidated and separate financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated and separate financial statements, management is responsible for assessing the Group's and the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group and the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's and the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Consolidated and Separate Financial Statements

My objectives are to obtain reasonable assurance about whether the consolidated and separate financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes my opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with TSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated and separate financial statements.

As part of an audit in accordance with TSAs, I exercise professional judgment and maintain professional scepticism throughout the audit. I also:

- Identify and assess the risks of material misstatement of the consolidated and separate financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for my opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's and the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's and the Company's ability to continue as a going concern. If I conclude that a material uncertainty exists, I am required to draw attention in my auditor's report to the related disclosures in the consolidated and separate financial statements or, if such disclosures are inadequate, to modify my opinion. My conclusions are based on the audit evidence obtained up to the date of my auditor's report. However, future events or conditions may cause the Group and the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated and separate financial statements, including the disclosures, and whether the consolidated and separate financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. I am responsible for the direction, supervision and performance of the group audit. I remain solely responsible for my audit opinion.

I communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that I identify during my audit.

I also provide those charged with governance with a statement that I have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on my independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with those charged with governance, I determine those matters that were of most significance in the audit of the consolidated and separate financial statements of the current period and are therefore the key audit matters. I describe these matters in my auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, I determine that a matter should not be communicated in my report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Bangkok Chain Hospital Public Company Limited and its Subsidiaries

Notes to the financial statements

For the year ended 31 December 2024

These notes form an integral part of the financial statements.

The financial statements issued for Thai statutory and regulatory reporting purposes are prepared in the Thai language. These English language financial statements have been prepared from the Thai language statutory financial statements, and were approved and authorised for issue by the Board of Directors on 27 February 2025.

1 General information

Bangkok Chain Hospital Public Company Limited, the “Company”, is incorporated in Thailand and was listed on the Stock Exchange of Thailand on November 2004. The Company’s registered office at 44 Moo 4 Chaengwattana Road, Pakkred Nonthaburi.

The Company’s major shareholders during the financial year were Hamphanich family (49.99% shareholding).

The principal activities of the Company and its subsidiaries (together referred to as the “Group”) are private hospitals, nursing business to provide medical treatment to patients with a total of 15 chained hospitals in Bangkok vicinity, Chiang Rai, Saraburi, Nonthaburi, Pathumthani, Ayudhaya, Chachoengsao, Prachinburi, Sa Kaeo Province and Lao People’s Democratic Republic as well as selling healthy drinks, providing medical analysis and research services in operation rooms, providing clinic for cancer treatment using laser technology, providing developing package computer programs. and property for rent. Details of the Company’s subsidiaries as at 31 December 2024 and 2023 are given in note 12.

2 Basis of preparation of the financial statements

The financial statements are prepared in accordance with Thai Financial Reporting Standards (TFRS); guidelines promulgated by the Federation of Accounting Professions and applicable rules and regulations of the Thai Securities and Exchange Commission. The financial statements are presented in Thai Baht, which is the Company’s functional currency. The accounting policies, described in the note 4, have been applied consistently to all periods presented in these financial statements. In addition, the consolidated financial statements for the year ended 31 December 2024 have been applied TAS 29 Financial Reporting in Hyperinflationary Economies for the first time for the foreign operations whose functional currency is Lao Kip (LAK) as disclosed in note 5.

The preparation of financial statements in conformity with TFRS requires management to make judgements, estimates and assumptions that affect the application of the Group’s accounting policies. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised prospectively.

3 Change in material accounting policy

- (a) ***TAS 12 Income Taxes – Deferred Tax related to Assets and Liabilities arising from a Single Transaction***
The Group has adopted Deferred Tax related to Assets and Liabilities arising from a Single Transaction – Amendments to TAS 12 since 1 January 2024. The amendments narrow the scope of the initial recognition exemption by excluding transactions that give rise to equal and offsetting temporary differences – e.g. leases and decommissioning liabilities. The Group shall recognise deferred tax assets and liabilities that are relevant to leases and decommissioning liabilities since the beginning of the earliest comparative period presented by adjusting cumulative effects in retained earnings or other components of equity at that date. For all other transactions, the Group applies the amendments to transactions that occur after the beginning of the earliest period presented. Previously, the Group recognised deferred tax for leases and decommissioning liabilities arising from temporary differences on a net basis after the initial recognition.

Bangkok Chain Hospital Public Company Limited and its Subsidiaries
Notes to the financial statements
For the year ended 31 December 2024

Following the amendments, the Group has recognised separately the deferred tax asset in relation to its lease liabilities and the deferred tax liability in relation to its right-of-use assets. However, there was no impact on the statement of financial position because the balances qualify for offsetting in accordance with TAS 12. There was also no impact on the opening retained earnings as at 1 January 2023 as a result of the change. The key impact for the Group relates to disclosure of the deferred tax assets and liabilities recognised.

(b) TAS 1 Presentation of Financial Statements – Disclosure of Accounting Policies

The Group has adopted Disclosure of Accounting Policies – Amendments to TAS 1 since 1 January 2024. The amendments require the disclosure of ‘material’ rather than ‘significant’, accounting policies. The amendments also provide guidance on the application of materiality to disclosure of accounting policies.

Following the amendments, the Group has revisited the accounting policy information it has been disclosing and made updates to the information disclosed in the notes 4.

4 Material accounting policies

(a) Basis of consolidation

The consolidated financial statements relate to the Company and its subsidiaries (together referred to as the “Group”) and the Group’s interest in associate. The financial statements of subsidiaries are included in the consolidated financial statements from the date on which control commences until the date on which control ceases. Intra-group balances and transactions, and any unrealised income or expenses arising from intra-group transactions, are eliminated on consolidation.

The Group recognises investment in associate in the consolidated financial statements using the equity method until the date of significant influence.

Business combinations

The Group applies the acquisition method when the Group assess that the acquired set of activities and assets meets the definition of a business and control is transferred to the Group, other than business combinations with entities under common control.

The consideration transferred in the acquisition is generally measured at fair value, as are the identifiable net assets acquired. Any goodwill that arises is tested annually for impairment. (see note 4(j)) Any gain on bargain purchase is recognised in profit or loss immediately. Transaction costs are expensed as incurred, except if related to the issue of debt or equity securities.

Any contingent consideration is measured at fair value at the date of acquisition, and remeasured at fair value at each reporting date. Subsequent changes in the fair value are recognised in profit or loss.

A contingent liability of the acquiree is assumed in a business combination only if such a liability represents a present obligation and arises from a past event, and its fair value can be measured reliably.

(b) Investments in subsidiaries and associate

Investments in subsidiaries and associates in the separate financial statements of the Company are measured at cost less allowance for impairment losses. Dividend income is recognised in profit or loss on the date on which the Company’s right to receive payment is established.

Bangkok Chain Hospital Public Company Limited and its Subsidiaries
Notes to the financial statements
For the year ended 31 December 2024

(c) Foreign currencies

Transactions in foreign currencies including non-monetary assets and liabilities denominated in foreign currencies are translated to the respective functional currencies of each entity in the Group at exchange rates at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies are translated at the exchange rate at the reporting date.

Foreign currency differences are generally recognised in profit or loss.

Foreign operations

The assets and liabilities of foreign operations are translated to Thai Baht at the exchange rates at the reporting date. The revenues and expenses of foreign operations are translated to Thai Baht at rates approximating the exchange rates at the dates of the transactions.

All amounts (i.e. assets, liabilities, equity, income and expenses) of foreign operations whose functional currencies are the currencies of a hyperinflationary economy are translated to Thai Baht at exchange rates at the reporting date. Prior to translating the financial statements of those foreign operations, the financial statements, including comparatives, are restated to account for changes in the general purchasing power of the local currency. Gain (loss) on the net monetary position is recognised in profit or loss. The restatement is based on relevant price indices at the reporting date.

Foreign exchange differences are recognised in other comprehensive income and accumulated in the translation reserve until disposal of the investment, except to extent that the translation difference is allocated to non-controlling interest.

When a foreign operation is disposed of in its entirety or partially such that control is lost, the cumulative amount in the translation reserve related to that foreign operation is reclassified to profit or loss as part of the gain or loss on disposal. If the Group disposes of part of its interest in a subsidiary but retains control, then the relevant proportion of the cumulative amount is reattributed to non-controlling interests.

When the settlement of a monetary item receivable from or payable to a foreign operation is neither planned nor likely in the foreseeable future, exchange gains and losses arising from such a monetary item are considered to form part of a net investment in a foreign operation and are recognised in other comprehensive income, and presented in the translation reserve in equity until disposal of the investment.

(d) Financial instruments

(d.1) Classification and measurement

Other financial assets and financial liabilities (except trade accounts receivables (see note 4(f))) are initially recognised when the Group becomes a party to the contractual provisions of the instrument, and measured at fair value plus or minus, for an item not at fair value through profit or loss (FVTPL), transaction costs that are directly attributable to its acquisition or issue.

On initial recognition, a financial asset is classified as measured at: amortised cost; fair value through other comprehensive income (FVOCI); or FVTPL. Financial assets are not reclassified subsequent to their initial recognition unless the Group changes its business model for managing financial assets, in which case all affected financial assets are reclassified prospectively from the reclassification date.

On initial recognition, financial liabilities are classified as measured at amortised cost using the effective interest method or FVTPL. Interest expense, foreign exchange gains and losses and any gain or loss on derecognition are recognised in profit or loss.

Bangkok Chain Hospital Public Company Limited and its Subsidiaries
Notes to the financial statements
For the year ended 31 December 2024

Financial assets measured at amortised costs are subsequently measured at amortised cost using the effective interest method. The amortised cost is reduced by expected credit losses. Interest income, foreign exchange gains and losses, expected credit loss and any gain or loss on derecognition are recognised in profit or loss.

Equity investments measured at FVOCI are subsequently measured at fair value. Dividend income is recognised as income in profit or loss on the date on which the Group's right to receive payment is established, unless the dividend clearly represents a recovery of part of the cost of the investment. Other net gains and losses are recognised in OCI and are never reclassified to profit or loss.

(d.2) Derecognition and offset

The Group derecognises a financial asset when the contractual rights to receive the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Group neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

The Group derecognises a financial liability when its contractual obligations are discharged or cancelled, or expire. The Group also derecognises a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognised at fair value.

The difference between the carrying amount extinguished and the consideration received or paid is recognised in profit or loss.

Financial assets and financial liabilities are offset and the net amount presented in the statement of financial position when, and only when, the Group currently has a legally enforceable right to set off the amounts and the Group intends either to settle them on a net basis or to realise the asset and settle the liability simultaneously.

(d.3) Impairment of financial assets other than trade accounts receivables

The Group recognises allowances for expected credit losses (ECLs) on financial assets measured at amortised cost, equity investments measured at FVOCI, debt investments measured at FVTPL.

The Group recognises ECLs equal to 12-month ECLs unless there has been a significant increase in credit risk of the financial instrument since initial recognition or credit-impaired financial assets, in which case the loss allowance is measured at an amount equal to lifetime ECLs.

ECLs are a probability-weighted estimate of credit losses based on forward-looking and historical experience. Credit losses are measured as the present value of all cash shortfalls discounted by the effective interest rate of the financial asset.

The Group assumes that the credit risk on a financial asset has increased significantly if it is more than 30 days past due, significant deterioration in credit rating, significant deterioration in the operating results of the debtor and existing or forecast changes in the technological, market, economic or legal environment that have a significant adverse effect on the debtor's ability to meet its obligation to the Group.

Bangkok Chain Hospital Public Company Limited and its Subsidiaries
Notes to the financial statements
For the year ended 31 December 2024

The Group considers a financial asset to be in default when:

- the debtor is unlikely to pay its credit obligations to the Group in full, without recourse by the Group to actions such as realising security (if any is held); or
- the financial asset is more than 90 days past due.

(d.4) Write offs

The gross carrying amount of a financial asset is written off when the Group has no reasonable expectations of recovering. Subsequent recoveries of an asset that was previously written off, are recognised as a reversal of impairment in profit or loss in the period in which the recovery occurs.

(d.5) Interest

Interest income and expense is recognised in profit or loss using the effective interest method.

(e) Cash and cash equivalents

Cash and cash equivalents comprise cash balances, call deposits and highly liquid short-term investments which has a maturity of three months or less from the date of acquisition. Bank overdrafts that are repayable on demand are a component of financing activities for the purpose of the statement of cash flows.

(f) Trade accounts receivable and accrued income

Trade receivable and accrued income are recognised when the Group has an unconditional right to receive consideration. Trade receivable and accrued income are measured at transaction price less allowance for expected credit loss. Bad debts are written off when the Group has no reasonable expectations of recovering.

The Group estimates lifetime expected credit losses (ECLs), using a provision matrix to find ECLs rate. This method groups the debtors based on shared credit risk characteristics and past due status, taking into account historical credit loss data, adjusted for factors that are specific to the debtors and an assessment of both current economic conditions and forward-looking general economic conditions at the reporting date.

(g) Inventories

Inventories are measured at the lower of cost and net realisable value. Cost is calculated using the weighted average cost principle.

(h) Investment properties

Investment properties are measured at cost less accumulated depreciation.

Depreciation is calculated on a straight-line basis over the estimated useful lives of buildings and improvement of 10 - 30 years and recognised in profit or loss. No depreciation charged on freehold land.

Differences between the proceeds from disposal and the carrying amount of investment property are recognised in profit or loss.

Bangkok Chain Hospital Public Company Limited and its Subsidiaries
Notes to the financial statements
For the year ended 31 December 2024

(i) Property, plant and equipment

Property, plant and equipment are measured at cost less accumulated depreciation and impairment losses.

Cost includes capitalised borrowing costs, and the costs of dismantling and removing the items and restoring the site on which they are located.

Land use rights were land in Lao People's Democratic Republic which the Group has ownership and consume of benefit in such land throughout the term of the land assignment agreement. Land use rights measured at cost less accumulated amortisation. Amortisation is recognised in profit or loss on a straight-line basis over the contract period.

Differences between the proceeds from disposal and the carrying amount of property, plant and equipment are recognised in profit or loss.

Subsequent costs

The cost of replacing a part of an item of property, plant and equipment is recognised in the carrying amount of the item when the future economic benefits embodied within the part will flow to the Group, and its cost can be measured reliably. The carrying amount of the replaced part is derecognised. The costs of the day-to-day servicing of property, plant and equipment are recognised in profit or loss as incurred.

Depreciation

Depreciation is calculated on a straight-line basis over the estimated useful lives of each component of an asset and recognised in profit or loss. No depreciation is provided on freehold land and assets under construction.

The estimated useful lives are as follows:

Land use right	90	years (Contract period)
Land improvement	10 - 30	years
Buildings and buildings improvements	6 - 40	years
Buildings equipment	5 - 30	years
Hospital equipment and medical instrument	5 - 20	years
Office equipment	5 - 20	years
Computer and system work	3 - 20	years
Vehicles	5 - 20	years

(j) Goodwill

Goodwill is measured at cost less accumulated impairment losses.

(k) Intangible assets

Intangible assets are measured at cost less accumulated amortisation and impairment losses. Subsequent expenditure is capitalised only when it will generate the future economic benefits. Amortisation is calculated on a straight-line basis over the estimated useful lives of intangible assets and recognised in profit or loss.

The estimated useful lives for the current period and comparison period are as follows:

Software licenses	3 - 10 years
-------------------	--------------

Bangkok Chain Hospital Public Company Limited and its Subsidiaries
Notes to the financial statements
For the year ended 31 December 2024

(l) Leases

At inception of a contract, the Group assesses that a contract is, or contains, a lease when it conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

As a lessee

At commencement of a contract, the Group allocates the consideration in the contract to each lease component on the basis of its relative stand-alone prices of each component. For the leases of property, the Group has elected not to separate non-lease components and accounted for the lease and non-lease components wholly as a single lease component.

The Group recognises a right-of-use asset and a lease liability at the lease commencement date, except for leases of low-value assets and short-term leases which is recognised as an expense on a straight-line basis over the lease term.

Right-of-use asset is measured at cost, less any accumulated depreciation and impairment loss, and adjusted for any remeasurements of lease liability. The cost of right-of-use asset includes the initial amount of the lease liability adjusted for any prepaid lease payments, plus any initial direct costs incurred. Depreciation is charged to profit or loss on a straight-line method from the commencement date to the end of the lease term.

The lease liability is initially measured at the present value of all lease payments that shall be paid under the lease. The Group uses the Group's incremental borrowing rate to discount the lease payments to the present value. The Group determines its incremental borrowing rate by obtaining interest rates from various external financing sources and makes certain adjustments to reflect the terms of the lease and type of the asset leased.

The lease liability is measured at amortised cost using the effective interest method. It is remeasured when there is a lease modification, or a change in the assessment of options specified in the lease. When the lease liability is remeasured, a corresponding adjustment is made to the carrying amount of the right-of-use asset or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

As a lessor

At inception or on modification of a contract, the Group allocates the consideration in the contract to each component on the basis of their relative standalone selling prices.

At lease inception, the Group considers to classify a lease that transfers substantially all of the risks and rewards incidental to ownership of the underlying asset to lessees as a finance lease. A lease that does not meet this criteria is classified as an operating lease.

The Group recognises lease payments received under operating leases in profit or loss on a straight-line basis over the lease term as part of rental income. Initial direct costs incurred in arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income.

(m) Impairment of non-financial assets

The carrying amounts of the Group's assets are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, the assets' recoverable amounts are estimated. For goodwill and intangible assets that have indefinite useful lives or are not yet available for use, the recoverable amount is estimated each year at the same time.

Bangkok Chain Hospital Public Company Limited and its Subsidiaries
Notes to the financial statements
For the year ended 31 December 2024

The recoverable amount is the greater of the asset's value in use and fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

Impairment losses of assets recognised in prior periods is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss in respect of goodwill is not reversed. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

(n) Employee benefits

Defined contribution plan

Obligations for contributions to the Group's provident funds are expensed as the related service is provided.

Defined benefit plans

The Group's net obligation in respect of defined benefit plans is calculated by estimating the amount of future benefit that employees have earned in the current and prior periods. The defined benefit obligations is discounted to the present value, which performed annually by a qualified actuary using the projected unit credit method.

Remeasurements of the net defined benefit liability, actuarial gain or loss are recognised immediately in OCI. The Group determines the interest expense on the net defined benefit liability for the period by applying the discount rate used to measure the defined benefit obligation at the beginning of the annual period, taking into account any changes in the net defined benefit liability during the period as a result of contributions and benefit payments. Net interest expense and other expenses related to defined benefit plans are recognised in profit or loss.

The Group's net obligation in respect of long-term employee benefits is the amount of future benefit that employees have earned in return for their service in the current and prior periods. That benefit is discounted to determine its present value. Remeasurements are recognised in profit or loss in the period in which they arise.

Short-term employee benefits

Short-term employee benefits are expensed as the related service is provided. A liability is recognised for the amount expected to be paid if the Group has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

(o) Provisions

Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The unwinding of the discount is recognised as a finance cost.

(p) Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the Group has access at that date. The fair value of a liability reflects its non-performance risk.

Bangkok Chain Hospital Public Company Limited and its Subsidiaries
Notes to the financial statements
For the year ended 31 December 2024

When measuring the fair value of an asset or a liability, the Group uses observable market data as far as possible. Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

- Level 1: quoted prices in active markets for identical assets or liabilities.
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly.
- Level 3: inputs for the asset or liability that are based on unobservable input.

If an asset or a liability measured at fair value has a bid price and an ask price, then the Group measures assets and asset positions at a bid price and liabilities and liability positions at an ask price.

The best evidence of the fair value of a financial instrument on initial recognition is normally the transaction price - i.e. the fair value of the consideration given or received.

(q) Revenue from contracts with customers

Revenue recognition

Revenue is recognised when a customer obtains control of the goods or services in an amount that reflects the consideration to which the Group expects to be entitled, excluding those amounts collected on behalf of third parties, value added tax and is after deduction of any trade discounts.

Revenue from sales of goods is recognised on the date on which the goods are delivered to the customers.

Revenues from hospital operations, mainly consisting of medical fees, hospital room sales, and medicine sales, are recognised as income when services have been rendered or medicine delivered. The revenue is recognised to the extent that it is highly probable that a significant reversal in the amount of cumulative revenue recognised will not occur. Therefore the amount of revenue recognised is adjusted for estimated returns, which are estimated based on the historical data.

Income from services provided to patients under the service contract with Social Security Office is recognised on the basis, procedures and conditions for reimbursement as stipulated by the aforesaid offices, such as, the number of insured persons registered with the hospital, and statistical information of the services provided by the hospital, etc. In addition, the repayment is depended on the policy and budget of the government welfare schemes. The management is required to make an estimation of such accrued income in accordance with the basis, procedures and conditions as stipulated by the aforesaid offices.

For bundled packages, the Group accounts for individual products and services separately if they are distinct (i.e. if a product or service is separately identifiable from other items and a customer can benefit from it) or the multiple services are rendered in different reporting periods. The consideration received is allocated based on their relative stand-alone selling prices which are determined based on the price list at which the Group sells the products and services in separate transactions.

(r) Income tax

Income tax expense for the year comprises current and deferred tax, which is recognised in profit or loss except to the extent that they relate to items recognised directly in equity or in other comprehensive income.

Current tax is recognised in respect of the taxable income or loss for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

Bangkok Chain Hospital Public Company Limited and its Subsidiaries
Notes to the financial statements
For the year ended 31 December 2024

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognised for the temporary differences: the initial recognition of goodwill; the initial recognition of assets or liabilities in a transaction that is not a business combination combination or at the time of the transaction affects neither accounting nor taxable profit or loss and does not give rise to equal taxable and deductible temporary differences and differences relating to investments in subsidiaries and joint ventures to the extent that it is probable that they will not reverse in the foreseeable future.

The measurement of deferred tax reflects the tax consequences that would follow the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities, using tax rates enacted or substantively enacted at the reporting date. Current deferred tax assets and liabilities are offset in the separate financial statements.

A deferred tax asset is recognised to the extent that it is probable that future taxable profits will be available against which the temporary differences can be utilised. Deferred tax assets are reviewed at each reporting date and reduced to the extent that it is no longer probable that the related tax benefit will be realised.

(s) Earnings per share

The calculation of basic EPS has been based on the profit attributable to ordinary shareholders of the Company and the weighted-average number of ordinary shares outstanding.

5 Hyperinflation

In October 2024, the IMF estimated that the three-year cumulative inflation rate of Lao P.D.R. has exceeded 100%, as a result Lao P.D.R. should be considered hyperinflationary economy for the annual reporting period ending 31 December 2024. Consequently, the consolidated financial statements for the year ended 31 December 2024 have been applied TAS 29 Financial Reporting in Hyperinflationary Economies for the first time for the foreign operations whose functional currency is LAK. The consolidated financial statements were restated to reflect the change in the general purchasing power retrospectively since 1 January 2024 and the comparative consolidated financial statements have not been restated according to TAS 21 *The Effects of Changes in Foreign Exchange Rates*. This resulted in an opening balance adjustment of Baht 61.27 million to consolidated equity.

Under TAS 29, the financial statements of foreign operation, whose functional currencies is LAK, that prepared based on historical cost are restated to be presented in the measuring unit current at the end of the reporting period. In that connection, non-monetary items are restated to reflect the purchasing power at the reporting date and all items in the statement of comprehensive income are restated to reflect the inflation during the period. Monetary items do not need to be restated as they already reflect purchasing power at the reporting date. The financial statements of subsidiary are translated to Thai Baht using selling rates at the reporting date.

The general price index for purposes of measuring inflation movements is the Consumer Price Index (CPI) which is published by the Bank of Lao P.D.R. at 31 December 2024 was 243.52 (2023: 208.37).

Bangkok Chain Hospital Public Company Limited and its Subsidiaries
Notes to the financial statements
For the year ended 31 December 2024

All subsidiaries were incorporated in Thailand, except Bangkok Chain International (Lao) which was incorporated in Lao People's Democratic Republic.

None of the Group's subsidiaries are publicly listed and consequently do not have published price quotations.

During the year 2023, Bangkok Chain International (Lao) Co., Ltd., the subsidiary, has increased its registered capital to be LAK 412,600 million (206.3 million shares, par value at LAK 2,000 per share) for working capital. The Company invested in newly share capital amounting to Baht 378.19 million which percentage of shareholding change from 68.47% shareholding to be 75.24% shareholding. However, another shareholders have right to purchase newly 13.97 million shares back from the Company at the former percentage shareholding according to acquisition amount and period in the agreement. Subsequently, in February 2024, the Company received payment of shares amounting to Baht 7 million for 1.84 million shares and the Board of Director meeting on 29 February 2024 passed a resolution for 3 months extension for the unexercised right to purchase additional shares of another shareholder of 12.13 million shares, which ended on 31 May 2024 at the price of Baht 4.00 per share. Subsequently, the Board of Director meeting on 14 August 2024 passed a resolution for 4 months extension for the unexercised right to purchase additional shares of another shareholder of 12.13 million shares, which ended in September 2024 at the price of Baht 4.07 – 4.28 per share. During June 2024, the Company received payment of shares amounting to Baht 4.5 million for 1.11 million shares.

During the year 2024, the Company invested in Bangkok Chain Dental Company Limited, a subsidiary which provide dental mobile check-up service amounting to Baht 30 million, 60% shareholding. The subsidiary partially called for additional payment of ordinary shares from shareholders until fully called in May 2024.

During the year 2024, Kasemrad Ari Cancer Rangsi Raksa Center Company Limited called for additional payment of ordinary shares from shareholders until fully in April and June, amounting to Baht 38.25 million and Baht 76.50 million, which was 25% and 50% of registered capital. As a result, the Company investment in subsidiary increased by Baht 114.75 million, totalling investment was Baht 153 million.

During the year 2024, the Group acquired an additional in Sothon Vejchakit Company Limited, a subsidiary, amounting to Baht 45 million, increasing its ownership interest from 86.29% to 92.71%. The Group's recognised a decreased in non-controlling interests of Baht 45 million.

Impairment of investment in a subsidiary

In 2024, management tested impairment of the investment in the subsidiary located in the Lao People's Democratic Republic, which was declared a hyperinflation.

Management estimated the recoverable amount of the investment using a discounted cash flow approach, which was based on performance trends and applied a discount rate of 14.86%. The recoverable amount of the investment in the subsidiary was lower than its carrying amount. As a result, the Company recognised an impairment loss of Baht 470 million in the statement of comprehensive income for the year ended 31 December 2024.

Bangkok Chain Hospital Public Company Limited and its Subsidiaries
Notes to the financial statements
For the year ended 31 December 2024

The gross amount of the Group's and the Company's fully depreciated plant and equipment that was still in use as at 31 December 2024 amounted to Baht 2,238 million and Baht 1,377 million, respectively (2023: Baht 2,149 million and Baht 1,392 million, respectively).

As from 1997, servitude has been made to Land & House Public Company Limited for a passage way with a width of not less than 7 meters for all motor vehicles, drainage water, electricity and telephone systems, on a plot of land, under the title deed No. 2175, Khwaeng Bangsue, Khet Bangsue, Bangkok running along the whole length of the south side of the land, without any compensation and time frame.

The Company leased land for 3 years and 90 years and paid fixed and variable lease payment. These payment terms are common in Thailand.

Interest on lease liabilities	327	260	327	260
Expenses relating to leases of low-value assets	23,715	34,848	16,861	16,705

In 2024, the Group leased photocopier and computer for 5 years and paid fixed and variable lease payment that are based on usage over the lease term. These payment terms are general term.

In 2024, total cash outflow for leases of the Group and the Company were Baht 29.30 million and Baht 22.44 million, respectively (2023: Baht 39.43 million and Baht 21.34 million, respectively).

Impairment of property, plant and equipment

In 2024, the subsidiary located in the Lao People's Democratic Republic was affected by hyperinflation, which led to the need to adjust the value of non-monetary assets, including property, plant and equipment, to reflect the purchasing power as of the reporting date. The value of property, plant and equipment as of 1 January 2024, was adjusted upward by a net amount of Baht 708.49 million to align with inflation. Management tested for impairment of these assets by assessing the recoverable amount of the property, plant, and equipment using a discounted cash flow approach, which was based on performance trends and applied a discount rate of 14.86%. The recoverable amount of the property, plant and equipment was lower than their carrying amount, and the Group therefore recognised an impairment loss of Baht 660 million.

At 31 December	329,376	329,376

Impairment testing for CGUs containing goodwill

For the purposes of impairment testing, goodwill has been allocated to the Group's CGUs (operating divisions) as follows.

	Consolidated financial statements	
	2024	2023
	<i>(in thousand Baht)</i>	
Rattanatibeth General Hospital Co., Ltd.	100,550	100,550
Saraburi Wetchakit Co., Ltd.	46,944	46,944
Sriburin Medical Co., Ltd.	8,617	8,617
Navanakorn Medicare Co., Ltd.	45,624	45,624
Sothon Vejchakit Co., Ltd.	127,641	127,641
Total	329,376	329,376

The recoverable amount of these CGU was based on its value in use, determined by discounting the future cash flows to be generated from the continuing use of the Group's.

The key assumptions used in the estimation of value in use were as follows:

	Consolidated financial statements	
	2024	2023
	<i>(%)</i>	
Discount rate	6.9	7.0
Terminal growth rate	1.5	2

The discount rate was measure based on the rate of weighted average of cost of capital (WACC), adjusted for a risk premium to reflect both the increased risk of investing in equities generally and the systematic risk of the specific.

Five years of cash flows were included in the discounted cash flow model. A terminal growth rate has been determined as the lower of the nominal gross domestic product (GDP) rates for the countries and revenue growth was projected taking into account the average growth levels experienced over the past years by management and the estimated patients and price average per head for the next five years.

Bangkok Chain Hospital Public Company Limited and its Subsidiaries
Notes to the financial statements
For the year ended 31 December 2024

Based on the impairment testing, the recoverable amount was estimated to be higher than its carrying amount. Therefore, the Group did not recognise impairment in the financial statements for the year ended 31 December 2024.

20 Share premium and reserve

Share premium

Section 51 of the Public Companies Act B.E. 2535 requires companies to set aside share subscription monies received in excess of the par value of the shares issued to a reserve account (“share premium”). Share premium is not available for dividend distribution.

Legal reserve

Section 116 of the Public Companies Act B.E. 2535 Section 116 requires that a company shall allocate not less than 5% of its annual net profit, less any accumulated losses brought forward, to a reserve account (“legal reserve”), until this account reaches an amount not less than 10% of the registered authorised capital. The legal reserve is not available for dividend distribution.

The Company’s legal reserve as at 31 December 2024 and 2023 was equal to 10% of the registered authorised capital.

Other components of equity

Translation reserve

The translation reserves comprises all foreign currency differences arising from the translation of the financial statements of foreign operations.

Fair value reserve

The cumulative net change in the fair value of equity securities designated at FVOCI.

21 Segment information and disaggregation of revenue

Segment information

Management considers the Group operates in single line of business, private hospital business, and has, therefore only one reportable segment. Nevertheless in 2017, the Group has expanded business to the Lao People's Democratic Republic. Therefore, the Group has 2 segments which comprise of the Kingdom of Thailand and in the Lao People's Democratic Republic. Nevertheless, business operations in the Lao People's Democratic Republic does not meet the quantitative thresholds for determining reportable segments in 2023 and 2024.

Operating segment information is reported in a manner consistent with the internal reports that are regularly reviewed by the chief operating decision maker in order to make decisions about the allocation of resources to the segment and assess its performance. The chief operating decision maker has been identified as the executive committee.

Notes to the financial statements
For the year ended 31 December 2024

The following tables present valuation technique of financial instruments.

Type	Valuation technique
Debt and equity securities	Adjusted net asset method

The book value of long-term loans to and long-term loans from are approximate to the fair value because of contractual interest rate is taken to approximate the discount rate which measured at fair value by discounted projected cash flows method.

(b) Financial risk management policies

Risk management framework

The Group's board of directors has overall responsibility for the establishment and oversight of the Group's risk management framework. The board of directors has established the risk management committee, which is responsible for developing and monitoring the Group's risk management policies. The committee reports regularly to the board of directors on its activities.

The Group's risk management policies are established to identify and analyse the risks faced by the Group, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Group's activities. The Group, through its training and management standards and procedures, aims to maintain a disciplined and constructive control environment in which all employees understand their roles and obligations.

The Group audit committee oversees how management monitors compliance with the Group's risk management policies and procedures, and reviews the adequacy of the risk management framework in relation to the risks faced by the Group. The Group audit committee is assisted in its oversight role by internal audit. Internal audit undertakes both regular and ad hoc reviews of risk management controls and procedures, the results of which are reported to the audit committee.

(b.1) Credit risk

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Group's account receivables from customers and investments in debt securities.

(b.1.1) Trade accounts receivables

The Group's exposure to credit risk is influenced mainly by the individual characteristics of each customer. However, management also considers the factors that may influence the credit risk of its customer base, including the default risk associated with the industry and country in which customers operate.

The risk management committee has established a credit policy under which each new customer is analysed individually for creditworthiness before the Group's standard payment and delivery terms and conditions are offered. The Group's review includes external ratings, if they are available, financial statements, credit agency information, industry information and in some cases bank references.

The Group limits its exposure to credit risk from trade accounts receivables by establishing a maximum payment period of 5 months.

Bangkok Chain Hospital Public Company Limited and its Subsidiaries
Notes to the financial statements
For the year ended 31 December 2024

Loss rates are based on actual credit loss experience over the past 3-5 years. These rates are multiplied by scalar factors to reflect differences between economic conditions during the period over which the historical data has been collected, current conditions and the Group's view of economic conditions over the expected lives of the receivables.

Detail of trade receivable are included in note 8.

(b.1.2) Investment in debt securities

The Group considers that all debt investments measured at amortised cost have low credit risk. Then the credit loss allowance assessed during the year was therefore limited to 12 months expected losses or 'low credit risk'. Marketable bonds are considered to be an investment grade credit rating published by external credit rating agencies. The credit risk of other instruments are considered to be low when the risk of default is low and the issuer has a strong capacity to meet its contractual cash flow obligations.

(b.1.3) Cash and cash equivalent

The Group's exposure to credit risk arising from cash and cash equivalents is limited because the counterparties are banks and financial institutions which the Group considers to have low credit risk.

(b.1.4) Guarantees

The Group's policy is to provide financial guarantees only for subsidiaries' liabilities. At 31 December 2024, the Group has issued a guarantee to certain banks in respect of credit facilities granted to a subsidiary.

(b.2) Liquidity risk

The Group monitors its liquidity risk and maintains a level of cash and cash equivalents deemed adequate by management to finance the Group's operations and to mitigate the effects of fluctuations in cash flows.

The following table shows the remaining contractual maturities of financial liabilities at the reporting date. The amounts are gross and undiscounted and include contractual interest payments and exclude the impact of netting agreements.

(b.3) Market risk

The Group is exposed to the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk is as follows:

Managing interest rate benchmark reform

The Group has finished the process of amending contractual terms for all of the THBFIX.

(b.3.1) Foreign currency risk

Management believe that the foreign currency risk for the operation is minimal because revenues and expenses are principally denominated in the Group functional currency.

Bangkok Chain Hospital Public Company Limited and its Subsidiaries
Notes to the financial statements
For the year ended 31 December 2024

Assets and liabilities to foreign currency as at 31 December	Consolidated financial statements

Cash and cash equivalents	2.05	1.39
Total	18.87	12.34

(b.3.2) Interest rate risk

Interest rate risk is the risk that future movements in market interest rates will affect the results of the Group's operations and its cash flows because loan to, debentures and loan from are fixed interest rates except partial loans from bank institutions are variable interest rate. The fluctuation of interest rate are currently low, so the Group has low interest rate risk. The sensitivity impact to the increase or decrease in interest expenses from borrowings, as a result of changes in interest rates is immaterial on financial statements of the Group.

27 Capital management

The Board of Directors' policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business. The Board monitors the return on capital, which the Group defines as result from operating activities divided by total shareholders' equity, excluding non-controlling interests and also monitors the level of dividends to ordinary shareholders.
