and its Subsidiaries**

Financial statements for the year ended
31 December 2024
and
Independent Auditor's report

Independent Auditor's Report

To the Shareholders of Chularat Hospital Public Company Limited

Opinion

I have audited the consolidated and separate financial statements of Chularat Hospital Public Company Limited and its subsidiaries (the “Group”) and of Chularat Hospital Public Company Limited (the “Company”), respectively, which comprise the consolidated and separate statements of financial position as at 31 December 2024 the consolidated and separate statements of comprehensive income, changes in equity and cash flows for the year then ended, and notes, comprising a summary of material accounting policies and other explanatory information.

In my opinion, the accompanying consolidated and separate financial statements present fairly, in all material respects, the financial position of the Group and the Company, respectively, as at 31 December 2024 and their financial performance and cash flows for the year then ended in accordance with Thai Financial Reporting Standards (TFRSs).

Basis for Opinion

I conducted my audit in accordance with Thai Standards on Auditing (TSAs). My responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Consolidated and Separate Financial Statements* section of my report. I am independent of the Group and the Company in accordance with the *Code of Ethics for Professional Accountants including Independence Standards* issued by the Federation of Accounting Professions (Code of Ethics for Professional Accountants) that is relevant to my audit of the consolidated and separate financial statements, and I have fulfilled my other ethical responsibilities in accordance with the Code of Ethics for Professional Accountants. I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my opinion.

Key Audit Matters

Key audit matters are those matters that, in my professional judgment, were of most significance in my audit of the consolidated and separate financial statements of the current period. These matters were addressed in the context of my audit of the consolidated and separate financial statements as a whole, and in forming my opinion thereon, and I do not provide a separate opinion on these matters.

<i>Estimation of accrued income from government welfare program</i>	
Refer to Note 4(q) to the consolidated and separate financial statements	
The key audit matter	How the matter was addressed in the audit
The Group has accrued income under service contracts with the Social Security Office and the National Health Security Office, which are revenues from providing services to patients under the government welfare program. As a result of such accrued income is material and based on criteria, methods, and conditions defined by the government welfare, such as the number of insured persons registered with the hospital and statistical information on hospital services. The Group is exposed to the risk of valuation of accrued income. The criteria, methods, and conditions for estimation of accrued income are complex which required management as professional judgment and analysis of such estimation. Therefore, I determine that matter is a key audit matter.	My audit procedures included: • Understanding the process of revenue recognition and estimation of accrued income from providing services to patients under the government welfare program by making enquiry responsible person and selecting representative samples to test the operation of the designed controls. • Selecting sample to test revenue recognition and accrued income estimation with relevant documents to assess the reasonableness of the information and assumptions used by management in their estimates, including compliance with the criteria, methods, and conditions defined by the government welfare program. • Perform a reasonableness check of management's expectation for recoverability of trade accounts receivable and accrued income by comparing with the historical data, actual amount received during the year, and relevant documents. • Perform subsequent cash receipt after the reporting period with relevant documents. • Assessing the adequacy of Group's disclosures in accordance with Thai Financial Reporting Standards.

Other Matter

The consolidated and separate financial statements of the Group and the Company for the year ended 31 December 2023 were audited by another auditor who expressed an unmodified opinion on those statements on 22 February 2024.

Other Information

Management is responsible for the other information. The other information comprises the information included in the annual report, but does not include the consolidated and separate financial statements and my auditor's report thereon. The annual report is expected to be made available to me after the date of this auditor's report.

My opinion on the consolidated and separate financial statements does not cover the other information and I will not express any form of assurance conclusion thereon.

In connection with my audit of the consolidated and separate financial statements, my responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the consolidated and separate financial statements or my knowledge obtained in the audit, or otherwise appears to be materially misstated.

When I read the annual report, if I conclude that there is a material misstatement therein, I am required to communicate the matter to those charged with governance and request that the correction be made.

Responsibilities of Management and Those Charged with Governance for the Consolidated and Separate Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated and separate financial statements in accordance with TFRSs, and for such internal control as management determines is necessary to enable the preparation of consolidated and separate financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated and separate financial statements, management is responsible for assessing the Group's and the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group and the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's and the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Consolidated and Separate Financial Statements

My objectives are to obtain reasonable assurance about whether the consolidated and separate financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes my opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with TSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated and separate financial statements.

As part of an audit in accordance with TSAs, I exercise professional judgment and maintain professional skepticism throughout the audit. I also:

- Identify and assess the risks of material misstatement of the consolidated and separate financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for my opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's and the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's and the Company's ability to continue as a going concern. If I conclude that a material uncertainty exists, I am required to draw attention in my auditor's report to the related disclosures in the consolidated and separate financial statements or, if such disclosures are inadequate, to modify my opinion. My conclusions are based on the audit evidence obtained up to the date of my auditor's report. However, future events or conditions may cause the Group and the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated and separate financial statements, including the disclosures, and whether the consolidated and separate financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. I am responsible for the direction, supervision and performance of the group audit. I remain solely responsible for my audit opinion.

I communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that I identify during my audit.

I also provide those charged with governance with a statement that I have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on my independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with those charged with governance, I determine those matters that were of most significance in the audit of the consolidated and separate financial statements of the current period and are therefore the key audit matters. I describe these matters in my auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, I determine that a matter should not be communicated in my report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Notes to financial statements

For the year ended 31 December 2024

These notes form an integral part of the financial statements.

The financial statements issued for Thai statutory and regulatory reporting purposes are prepared in the Thai language. These English language financial statements have been prepared from the Thai language statutory financial statements, and were approved and authorised for issue by the Board of Directors on 27 February 2025.

1 General information

Chularat Hospital Public Company Limited (“the Company”), is incorporated in Thailand and was listed on the Stock Exchange of Thailand on 16 May 2013. The Company’s registered office at 88/8-9, Teparak Km. 15 Road, Tambol Bangpla, Amphur Bangplee, Samutprakarn.

The Company’s major shareholders during the financial year were Plussind group (36.84% shareholding) and Panyapol group (18.29% shareholding).

The principal activities of the Group and the Company are clinics and hospital. Details of the Company’s subsidiaries as at 31 December 2024 and 2023 are given in note 11.

2 Basis of preparation of the financial statements

The financial statements are prepared in accordance with Thai Financial Reporting Standards (“TFRS”), guidelines promulgated by the Federation of Accounting Professions and applicable rule and regulations of the Thai Securities and Exchange Commission. The financial statements are presented in Thai Baht, which is the Company’s functional currency. The accounting policies, described in note 4, have been applied consistently to all periods presented in these financial statements, except for disclosed in note 3.

The consolidated financial statements relate to the Company, its subsidiaries and joint operations (together referred to as the “Group”) and the Group’s interests in associates. The preparation of financial statements in conformity with TFRS requires management to make judgements, estimates and assumptions that affect the application of the Group’s accounting policies. Actual results may differ from these estimates. Estimates and underlying assumptions that are described in each note are reviewed on an ongoing basis. Revisions to accounting estimates are recognised prospectively.

3 Change in material accounting policy

(a) *TAS 12 Income Taxes – Deferred Tax related to Assets and Liabilities arising from a Single Transaction.*

The Group has adopted Deferred Tax related to Assets and Liabilities arising from a Single Transaction – Amendments to TAS 12 since 1 January 2024. The amendments narrow the scope of the initial recognition exemption by excluding transactions that give rise to equal and offsetting temporary differences – e.g. leases and decommissioning liabilities. The Group shall recognise deferred tax assets and liabilities that are relevant to leases and decommissioning liabilities since the beginning of the earliest comparative period presented by adjusting cumulative effects in retained earnings or other components of equity at that date. For all other transactions, the Group applies the amendments to transactions that occur after the beginning of the earliest period presented. Previously, the Group recognised deferred tax for arising from temporary differences on a net basis after the initial recognition.

Following the amendments, the Group has recognised separately the deferred tax asset in relation to its lease liabilities and the deferred tax liability in relation to its right-of-use assets. However, there was no impact on the statement of financial position because the balances qualify for offsetting in accordance with TAS 12. There was also no impact on the opening retained earnings as at 1 January 2023 as a result of the change. The key impact for the Group relates to disclosure of the deferred tax assets and liabilities recognised (see Note 23).

(b) *TAS 1 Presentation of Financial Statements – Disclosure of Accounting Policies*

The Group has adopted Disclosure of Accounting Policies – Amendments to TAS 1 since 1 January 2024. The amendments require the disclosure of ‘material’ rather than ‘significant’, accounting policies. The amendments also provide guidance on the application of materiality to disclosure of accounting policies.

Chularat Hospital Public Company Limited and its subsidiaries

Notes to financial statements

For the year ended 31 December 2024

Following the amendments, the Group has revisited the accounting policy information it has been disclosing and made updates to the information disclosed in note 4.

4 Material accounting policies

(a) Basis of consolidation

The consolidated financial statements relate to the Company and its subsidiaries and joint operations (together referred to as the “Group”) and the Group’s interest in associate.

Subsidiaries are entities controlled by the Group. The Group controls an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. The financial statements of subsidiaries are included in the consolidated financial statements from the date on which control commences until the date on which control ceases.

Associates are those entities in which the Group has significant influence, but not control or joint control, over the financial and operating policies.

The Group recognised investments in associates using the equity method in the consolidated financial statements. They are initially recognised at cost, which includes transaction costs. Subsequent to initial recognition, the consolidated financial statements include the Group’s dividend income and share of the profit or loss and other comprehensive income of equity-accounted investees, until the date on which significant influence ceases.

Intra-group balances and transactions, and any unrealised income or expenses arising from intra-group transactions, are eliminated on consolidation. Unrealised gains arising from transactions with associates are eliminated against the investment to the extent of the Group’s interest in the investee. Unrealised losses are eliminated in the same way as unrealised gains, but only to the extent that there is no evidence of impairment.

Business combinations

The Group applies the acquisition method when the Group assesses that the acquired set of activities and assets meets the definition of a business and control is transferred to the Group.

The consideration transferred in the acquisition is generally measured at fair value, as are the identifiable net assets acquired. Any goodwill that arises is tested annually for impairment (see note 4(n)). Any gain on bargain purchase is recognised in profit or loss immediately. Transaction costs are expensed as incurred, except if related to the issue of debt or equity securities.

Any contingent consideration is measured at fair value at the date of acquisition, and remeasured at fair value at each reporting date. Subsequent changes in the fair value are recognised in profit or loss.

A contingent liability of the acquiree is assumed in a business combination only if such a liability represents a present obligation and arises from a past event, and its fair value can be measured reliably.

(b) Investments in subsidiaries and associates

Investments in subsidiaries and associates in the separate financial statements of the Company are measured at cost less allowance for impairment losses. Dividend income is recognised in profit or loss on the date on which the Company’s right to receive payment is established.

(c) Foreign currencies

Transactions in foreign currencies including non-monetary assets and liabilities denominated in foreign currencies are translated to the respective functional currencies of each entity in the Group at exchange rates at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies are translated at the exchange rate at the reporting date.

Foreign currency differences are generally recognised in profit or loss.

Chularat Hospital Public Company Limited and its subsidiaries
Notes to financial statements
For the year ended 31 December 2024

(d) Financial instruments

(d.1) Classification and measurement

Financial assets and financial liabilities (except trade accounts receivables (see note 4 (f))) are initially recognised when the Group becomes a party to the contractual provisions of the instrument, and measured at fair value plus or minus, for an item not at fair value through profit or loss (FVTPL), transaction costs that are directly attributable to its acquisition or issue.

On initial recognition, a financial asset is classified as measured at: amortised cost; fair value through other comprehensive income (FVOCI); or FVTPL. Financial assets are not reclassified subsequent to their initial recognition unless the Group changes its business model for managing financial assets, in which case all affected financial assets are reclassified prospectively from the reclassification date.

On initial recognition, financial liabilities are classified as measured at amortised cost using the effective interest method or FVTPL. Interest expense, foreign exchange gains and losses and any gain or loss on derecognition are recognised in profit or loss.

Financial assets measured at amortised costs are subsequently measured at amortised cost using the effective interest method. The amortised cost is reduced by expected credit losses. Interest income, foreign exchange gains and losses, expected credit loss and any gain or loss on derecognition are recognised in profit or loss.

(d.2) Derecognition and offset

The Group derecognises a financial asset when the contractual rights to receive the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Group neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

The Group derecognises a financial liability when its contractual obligations are discharged or cancelled, or expire. The Group also derecognises a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognised at fair value.

The difference between the carrying amount extinguished and the consideration received or paid is recognised in profit or loss.

Financial assets and financial liabilities are offset and the net amount presented in the statement of financial position when, and only when, the Group currently has a legally enforceable right to set off the amounts and the Group intends either to settle them on a net basis or to realise the asset and settle the liability simultaneously.

(d.3) Derivatives

Derivative are recognised at fair value and remeasured at fair value at each reporting date. The gain or loss on remeasurement to fair value is recognised immediately in profit or loss.

(d.4) Impairment of financial assets other than trade accounts receivables

The Group recognises ECLs equal to 12-month ECLs unless there has been a significant increase in credit risk of the financial instrument since initial recognition or credit-impaired financial assets, in which case the loss allowance is measured at an amount equal to lifetime ECLs

ECLs are a probability-weighted estimate of credit losses based on forward-looking and historical experience. Credit losses are measured as the present value of all cash shortfalls discounted by the effective interest rate of the financial asset.

Chularat Hospital Public Company Limited and its subsidiaries

Notes to financial statements

For the year ended 31 December 2024

The Group considers a financial asset to have low credit risk when its credit rating is equivalent to the globally understood definition of 'investment grade'. The Group recognises ECLs for low credit risk financial asset as 12-month ECLs

The Group assumes that the credit risk on a financial asset has increased significantly if it is more than 30 days past due, significant deterioration in credit rating, significant deterioration in the operating results of the debtor and existing or forecast changes in the technological, market, economic or legal environment that have a significant adverse effect on the debtor's ability to meet its obligation to the Group.

The Group considers a financial asset to be in default when:

- the debtor is unlikely to pay its credit obligations to the Group in full, without recourse by the Group to actions such as realising security (if any is held); or
- the financial asset is more than 365 days past due.

(d.5) Write offs

The gross carrying amount of a financial asset is written off when the Group has no reasonable expectations of recovering. Subsequent recoveries of an asset that was previously written off, are recognised as a reversal of impairment in profit or loss in the period in which the recovery occurs.

(d.6) Interest

Interest income and expense is recognised in profit or loss using the effective interest method. In calculating interest income and expense, the effective interest rate is applied to the gross carrying amount of the asset (when the asset is not credit-impaired) or to the amortised cost of the liability.

(e) Cash and cash equivalents

Cash and cash equivalents comprise cash balances, call deposits and highly liquid short-term investments which has a maturity of three months or less from the date of acquisition. Bank overdrafts that are repayable on demand are a component of financing activities for the purpose of the statement of cash flows.

(f) Trade accounts receivable and accrued medical treatment income

Trade receivable and accrued medical treatment income are recognised when the Group has an unconditional right to receive consideration. Trade receivable and accrued income are measured at transaction price less allowance for expected credit loss. Bad debts are written off when the Group has no reasonable expectations of recovering.

The Group estimates lifetime expected credit losses (ECLs), using a provision matrix to find ECLs rate. This method groups the debtors based on shared credit risk characteristics and past due status, taking into account historical credit loss data, adjusted for factors that are specific to the debtors and an assessment of both current economic conditions and forward-looking general economic conditions at the reporting date.

(g) Inventories

Inventories are measured at the lower of cost and net realisable value. Cost is calculated using the weighted average cost principle. Cost includes direct costs incurred in acquiring the inventories. Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs to complete and to make the sale.

(h) Investment properties

Investment properties are land held by the Company to benefit from appreciation in value, but not for sale in the ordinary course of business or use in operations.

Investment properties are measured at cost, which includes capitalised borrowing costs.

Differences between the proceeds from disposal and the carrying amount of investment property are recognised in profit or loss.

(i) Property, plant and equipment

Chularat Hospital Public Company Limited and its subsidiaries
Notes to financial statements
For the year ended 31 December 2024

Property, plant and equipment are measured at cost less accumulated depreciation and impairment losses.

Cost includes capitalised borrowing costs, and the costs of dismantling and removing the items and restoring the site on which they are located.

Differences between the proceeds from disposal and the carrying amount of property, plant and equipment are recognised in profit or loss.

Subsequent costs

The cost of replacing a part of an item of property, plant and equipment is recognised in the carrying amount of the item when the future economic benefits embodied within the part will flow to the Group, and its cost can be measured reliably. The carrying amount of the replaced part is derecognised. The costs of the day-to-day servicing of property, plant and equipment are recognised in profit or loss as incurred.

Depreciation

Depreciation is calculated on a straight-line basis over the estimated useful lives of each component of an asset and recognised in profit or loss. No depreciation is provided on freehold land and assets under construction.

The estimated useful lives are as follows:

Land improvement	5 - 20 years
Buildings and buildings improvements	5 - 40 years
Tools and medical instrument	3 - 20 years
Machine and equipment	5 - 20 years
Furniture, fixtures and office equipment	3 - 20 years
Vehicles	5 and 10 years

(j) Goodwill

Goodwill is measured at cost less accumulated impairment losses.

(k) Intangible assets

Intangible assets are measured at cost less accumulated amortisation and accumulated impairment losses. Subsequent expenditure is capitalised only when it will generate the future economic benefits.

Amortisation is calculated on a straight-line basis over the estimated useful lives of intangible assets and recognised in profit or loss. The estimated useful lives for the current period and comparison period are as follows:

Software licenses	3 - 10 years
-------------------	--------------

Amortisation of intangible asset record in administrative expense.

(l) Leases

At inception of a contract, the Group assesses that a contract is, or contains, a lease when it conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Chularat Hospital Public Company Limited and its subsidiaries
Notes to financial statements
For the year ended 31 December 2024

As a lessee

At commencement of a contract, the Group allocates the consideration in the contract to each lease component on the basis of its relative stand-alone prices of each component. For the leases of property, the Group has elected not to separate non-lease components and accounted for the lease and non-lease components wholly as a single lease component.

The Group recognises a right-of-use asset and a lease liability at the lease commencement date, except for leases of low-value assets and short-term leases which is recognised as an expense on a straight-line basis over the lease term.

Right-of-use asset is measured at cost, less any accumulated depreciation and impairment loss, and adjusted for any remeasurements of lease liability. The cost of right-of-use asset includes the initial amount of the lease liability adjusted for any prepaid lease payments, plus any initial direct costs incurred and an estimate of restoration costs, less any lease incentives received. Depreciation is charged to profit or loss on a straight-line method from the commencement date to the end of the lease term, unless the lease transfers ownership of the underlying asset to the Group by the end of the lease term or the Group will exercise a purchase option. In that case the right-of-use asset will be depreciated over the useful life of the underlying asset, which is determined on the same basis as those of property and equipment.

The lease liability is initially measured at the present value of all lease payments that shall be paid under the lease. The Group uses the Group's incremental borrowing rate to discount the lease payments to the present value. The Group determines its incremental borrowing rate by obtaining interest rates from various external financing sources and makes certain adjustments to reflect the terms of the lease and type of the asset leased.

The lease liability is measured at amortised cost using the effective interest method. It is remeasured when there is a lease modification, or a change in the assessment of options specified in the lease. When the lease liability is remeasured, a corresponding adjustment is made to the carrying amount of the right-of-use asset or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

(m) Impairment of non-financial assets

The carrying amounts of the Group's assets are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, the assets' recoverable amounts are estimated. For goodwill, the recoverable amount is estimated each year at the same time.

An impairment loss is recognised in profit or loss if the carrying amount of an asset or its cash-generating unit exceeds its recoverable amount.

Impairment losses of assets recognised in prior periods is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss in respect of goodwill is not reversed. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

(n) Employee benefits

Defined contribution plan

Obligations for contributions to the Group's provident funds are expensed as the related service is provided.

Defined benefit plans

The Group's net obligation in respect of defined benefit plans is calculated by estimating the amount of future benefit that employees have earned in the current and prior periods. The defined benefit obligations is discounted to the present value, which performed annually by a qualified actuary using the projected unit credit method.

Chularat Hospital Public Company Limited and its subsidiaries

Notes to financial statements

For the year ended 31 December 2024

Remeasurements of the net defined benefit liability, actuarial gain or loss are recognised immediately in OCI. The Group determines the interest expense on the net defined benefit liability for the period by applying the discount rate used to measure the defined benefit obligation at the beginning of the annual period, taking into account any changes in the net defined benefit liability during the period as a result of contributions and benefit payments. Net interest expense and other expenses related to defined benefit plans are recognised in profit or loss.

When the benefits of a plan are changed or when a plan is curtailed, the resulting change in benefit that relates to past service or the gain or loss on curtailment is recognised immediately in profit or loss. The Group recognises gains and losses on the settlement of a defined benefit plan when the settlement occurs.

The Group's net obligation in respect of long-term employee benefits is the amount of future benefit that employees have earned in return for their service in the current and prior periods. That benefit is discounted to determine its present value. Remeasurements are recognised in profit or loss in the period in which they arise.

Short-term employee benefits are expensed as the related service is provided. A liability is recognised for the amount expected to be paid if the Group has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

(o) Provisions

Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The unwinding of the discount is recognised as a finance cost.

(p) Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the Group has access at that date. The fair value of a liability reflects its non-performance risk.

When measuring the fair value of an asset or a liability, the Group uses observable market data as far as possible. Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

- Level 1: quoted prices in active markets for identical assets or liabilities.
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly.
- Level 3: inputs for the asset or liability that are based on unobservable input.

If an asset or a liability measured at fair value has a bid price and an ask price, then the Company measures assets and asset positions at a bid price and liabilities and liability positions at an ask price.

The best evidence of the fair value of a financial instrument on initial recognition is normally the transaction price i.e. the fair value of the consideration given or received.

(q) Revenue from contracts with customers

Revenue recognition

Revenue is recognised when a customer obtains control of the goods or services in an amount that reflects the consideration to which the Group expects to be entitled, excluding those amounts collected on behalf of third parties, value added tax and is after deduction of any trade discounts.

Revenue from sales of goods is recognised on the date on which the goods are delivered to the customers.

Revenues from hospital operations, mainly consisting of medical fees, hospital room sales, and medicine sales, are recognised as income when services have been rendered or medicine delivered. The revenue is recognised to the extent that it is highly probable that a significant reversal in the amount of cumulative revenue recognised will not occur. Therefore the amount of revenue recognised is adjusted for estimated returns, which are estimated based on the historical data.

Chularat Hospital Public Company Limited and its subsidiaries

Notes to financial statements

For the year ended 31 December 2024

Income from services provided to patients under the service contract with government welfare program is recognised on the basis, procedures and conditions for reimbursement as stipulated by the aforesaid offices, such as, the number of insured persons registered with the hospital, and statistical information of the services provided by the hospital, etc. In addition, the repayment is depended on the policy and budget of the government welfare schemes. The management is required to make an estimation of such accrued income in accordance with the basis, procedures and conditions as stipulated by the aforesaid offices.

For bundled packages, the Group accounts for individual products and services separately if they are distinct (i.e. if a product or service is separately identifiable from other items and a customer can benefit from it) or the multiple services are rendered in different reporting periods. The consideration received is allocated based on their relative stand-alone selling prices which are determined based on the price list at which the Group sells the products and services in separate transactions.

(r) *Income tax*

Income tax expense for the year comprises current and deferred tax, which is recognised in profit or loss except to the extent that they relate to items recognised directly in equity or in other comprehensive income.

Current tax is recognised in respect of the taxable income or loss for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognised for the temporary differences: the initial recognition of goodwill; the initial recognition of assets or liabilities in a transaction that is not a business combination or at the time of the transaction does not give rise to equal taxable and deductible temporary differences and that affects neither accounting nor taxable profit or loss; and differences relating to investments in subsidiaries and joint ventures to the extent that it is probable that they will not reverse in the foreseeable future.

The measurement of deferred tax reflects the tax consequences that would follow the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities, using tax rates enacted or substantively enacted at the reporting date. Current deferred tax assets and liabilities are offset in the separate financial statements.

A deferred tax asset is recognised to the extent that it is probable that future taxable profits will be available against which the temporary differences can be utilised. Deferred tax assets are reviewed at each reporting date and reduced to the extent that it is no longer probable that the related tax benefit will be realised.

(s) *Earnings per share*

Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the period.

5 Related party transactions

Relationships with subsidiaries, associates and joint ventures are described in notes 10 and 11. Other related parties which the company had significant transactions with during the year were as follows:

Name of entities	Country of incorporation	Nature of relationships
Key management personnel	Thailand	Persons having authority and responsibility for planning, directing and controlling the activities of the entity, directly or indirectly, including any director (whether executive or otherwise) of the company.
Saving Cooperate Chularat Hospital Group	Thailand	Common director

Chularat Hospital Public Company Limited and its subsidiaries

Notes to financial statements

For the year ended 31 December 2024

During the year of 2024, the Group and the Company adjusted the accrued medical treatment income for High Cost Care ($\text{AdjRW} \geq 2$) from the remaining amount which were occurred in 2023, accordance with the reduction of such service rate notification from the Social Security Office, announcement date 30 July 2024. Consequently, the accrued medical treatment income of the Group and the Company were decreased by Baht 52.74 million and Baht 29.6 million, respectively.

Accrued medical income overdue more than 1 year, mostly is accrued medical treatment income from Coronavirus Disease 2019 in amount of Baht 335 million (2023: Baht 496 million). At the present, Such accrued medical treatment income is on process of consideration with the payment criteria as defined by the relevant government welfare.

The receiving payment for the accrued medical treatment income depends on the medical treatment payment policy of the relevant government agency. The Group's management believes that the actual outcome will not be significantly different from the expected amount.

16 Goodwill

	Consolidated financial statement (in thousand Baht)
Cost	
At 1 January 2023	47,284
Additions	57,173
At 31 December 2023 and 1 January 2024	104,457
At 31 December 2024	104,457
Net book value	
At 31 December 2023	104,457
At 31 December 2024	104,457

Impairment testing for CGUs containing goodwill

For the purposes of impairment testing, goodwill has been allocated to the Group's CGUs (operating divisions) as follows.

	Consolidated financial statements	
	2024	2023
	(in thousand Baht)	
Good Estate Company Limited	57,173	57,173
Sattayabutr International Company Limited	27,759	27,759
Cholvaej Hospital Company Limited	19,525	19,525
Total	104,457	104,457

The recoverable amount of these CGU was based on its value in use, determined by discounting the future cash flows to be generated from the continuing use of the Group's.

The key assumptions used in the estimation of the value in use as follows:

	Consolidated financial statements	
	2024	2023
	(%)	
Discount rate	7.4	6.9
Budgeted revenue growth rate (average of next five years)	3	3

The discount rate was measure based on the rate of weighted average of cost of capital (WACC), adjusted for a risk premium to reflect both the increased risk of investing in equities generally and the systematic risk of the specific.

Five years of cash flows were included in the discounted cash flow model. A long-term growth rate into perpetuity has been determined as the lower of the nominal gross domestic product (GDP) rates for the countries and revenue growth was projected taking into account the average growth levels experienced over the past years by management and the estimated patients and price average per head for the next five years.

Chularat Hospital Public Company Limited and its subsidiaries

Notes to financial statements

For the year ended 31 December 2024

Debentures

On 20 April 2017, the Annual General Meeting of the Company's shareholders passed the resolution to issue and offer up to Baht 2,000 million of debentures for sale, with a tenor of not more than 10 years. Further consideration and determination of significant conditions and details of the debentures relating to the financing of each issue of debentures are at the discretion of the Company's Board of Directors or other persons assigned by the Board of Directors. As at 31 December 2024, the Company has not issued and offered up the debenture.

Collateral asset

The credit facilities received from financial institutions was guaranteed by land and structures which has a guaranteed book value of Baht 2,117 million (2023: Baht 1,784 million).

As at 31 December 2024, the Group has no undrawn credit facility (31 December 2023: Baht 50 million).

19 Non-current provisions for employee benefits

Defined benefit plans

The Group and the Company operate a defined benefit plan based on the requirement of Thai Labour Protection Act B.E 2541 (1998) to provide retirement benefits to employees based on pensionable remuneration and length of service. The defined benefit plans expose the Group and Company to actuarial risks, such as longevity risk, interest rate risk and market (investment) risk.

At 31 December 2024, the weighted-average duration of the defined benefit obligation of The Group and the Company was 5 - 17 years and 12 years, respectively (2023: 5 - 17 years and 12 years, respectively).

Sensitivity analysis

Reasonably possible changes at the reporting date to one of the relevant actuarial assumptions, holding other assumptions constant, would have affected the defined benefit obligation by the amounts shown.

Chularat Hospital Public Company Limited and its subsidiaries

20 Share premium and Statutory reserve

Share premium

Section 51 of the Public Companies Act B.E. 2535 requires companies to set aside share subscription monies received in excess of the par value of the shares issued to a reserve account ("share premium"). Share premium is not available for dividend distribution.

Legal reserve

Section 116 of the Public Companies Act B.E. 2535 Section 116 requires that a company shall allocate not less than 5% of its annual net profit, less any accumulated losses brought forward, to a reserve account ("legal reserve"), until this account reaches an amount not less than 10% of the registered authorised capital. The legal reserve is not available for dividend distribution.

21 Segment information

The Group operates private hospital business. The management considers the operations as one business segment. When consideration the business location of the Group, there is only one geographical segment as the business operates only in Thailand. Operating segment information is reported in a manner consistent with the internal reports that are regularly reviewed by the chief operating decision maker in order to make decisions about the allocation of resources to the segment and assess its performance. The chief operating decision maker has been identified as the executive committee.

Each segment's performance is measured based on segment profit before tax, as included in the internal management reports that are reviewed by the Group's CODM. Segment profit before tax is used to measure performance as management believes that such information is the most relevant in evaluating the results of certain segments relative to other entities that operate within these industries.

Major customer

The Group has revenue from two major customers in amount of Baht 2,835 million (2023: 2 customers in amount of Baht 2,702 million), arising from Group's total revenue.

Other financial liabilities:			
Other derivatives liabilities		46,267	46,267

Type	Valuation technique
Derivatives	Derived by using a valuation technique incorporating observable market data which is adjusted with counterparty credit risk (excluding the Group's credit risk) and other risks to reflect true economic value.

The book value of long-term loans to and long-term loans from are approximate to the fair value because of contractual interest rate is taken to approximate the discount rate which measured at fair value by discounted projected cash flows method.

(b) Financial risk management policies

Risk management framework

The Group's board of directors has overall responsibility for the establishment and oversight of the Group's risk management framework. The board of directors has established the risk management committee, which is responsible for developing and monitoring the Group's risk management policies. The committee reports regularly to the board of directors on its activities.

The Group's risk management policies are established to identify and analyse the risks faced by the Group, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Group's activities. The Group, through its training and management standards and procedures, aims to maintain a disciplined and constructive control environment in which all employees understand their roles and obligations.

Chularat Hospital Public Company Limited and its subsidiaries

Notes to financial statements

For the year ended 31 December 2024

The Group audit committee oversees how management monitors compliance with the Group's risk management policies and procedures, and reviews the adequacy of the risk management framework in relation to the risks faced by the Group. The Group audit committee is assisted in its oversight role by internal audit. Internal audit undertakes both regular and ad hoc reviews of risk management controls and procedures, the results of which are reported to the audit committee.

(b.1) Credit risk

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Group's receivables from customers and investments in debt securities.

(b.1.1) Trade accounts receivables

The Group's exposure to credit risk is influenced mainly by the individual characteristics of each customer. However, management also considers the factors that may influence the credit risk of its customer base, including the default risk associated with the industry and country in which customers operate.

The risk management committee has established a credit policy under which each new customer is analysed individually for creditworthiness before the Group's commercial terms and conditions are offered. The Group's review includes external ratings, if they are available, financial statements, credit agency information, industry information and in some cases bank references.

The Group limits its exposure to credit risk from trade accounts receivables by establishing a maximum payment period of 2 months.

Loss rates are based on actual credit loss experience over the past 3-5 years. These rates are multiplied by scalar factors to reflect differences between economic conditions during the period over which the historical data has been collected, current conditions and the Group's view of economic conditions over the expected lives of the receivables.

Information relevant to trade accounts receivables are disclosed in note 7.

(b.1.2) Cash and cash equivalent

The Group's exposure to credit risk arising from cash and cash equivalents is limited because the counterparties are banks and financial institutions which the Group considers to have low credit risk.

(b.1.3) Guarantees

The Group's policy is to provide financial guarantees only for subsidiaries' liabilities. At 31 December 2024, the Group has issued a guarantee to certain banks in respect of credit facilities granted to subsidiaries (*see note 5*).

(b.2) Liquidity risk

The Group monitors its liquidity risk and maintains a level of cash and cash equivalents deemed adequate by management to finance the Group's operations and to mitigate the effects of fluctuations in cash flows.

The following table shows the remaining contractual maturities of financial liabilities at the reporting date. The amounts are gross and undiscounted and include contractual interest payments and exclude the impact of netting agreements.

Chularat Hospital Public Company Limited and its subsidiaries

(b.3) Market risk

The Group is exposed to the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk is as follows:

Chularat Hospital Public Company Limited and its subsidiaries

Notes to financial statements

For the year ended 31 December 2024

(b.3.1) Foreign currency risk

The Group is exposed to foreign currency risk relating to purchases and sales which are denominated in foreign currencies. The Group primarily utilises forward exchange contracts with maturities of less than one year to hedge such financial assets and liabilities denominated in foreign currencies. The forward exchange contracts entered into at the reporting date also relate to anticipated purchases and sales, denominated in foreign currencies, for the subsequent period.

At 31 December, The Group has foreign currency risk from exchange rate of loans from financial institutions as follows:

<i>Exposure to foreign currency At 31 December</i>	Consolidated financial statements					
	2024			2023		
	USD	JPY	Total (in thousand Baht)	USD	JPY	Total
Long-term loans from financial institutions	<u>305,687</u>	<u>88,528</u>	<u>394,215</u>	<u>309,241</u>	<u>131,502</u>	<u>440,743</u>

(b.3.2) Interest rate risk

Interest rate risk is the risk that future movements in market interest rates will affect the results of the Group's operations and its cash flows because loan to, debentures and loan from are fixed interest rates except partial loans from bank institutions are variable interest rate. The fluctuation of interest rate are currently low, so the Group has low interest rate risk. The sensitivity impact to the increase or decrease in interest expenses from borrowings, as a result of changes in interest rates is immaterial on financial statements of the Group.

27 Capital management

The Board of Directors' policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business. The Board regularly monitors the return on capital, by evaluating result from operating activities divided by total shareholders' equity, excluding non-controlling interests and also monitors the level of dividends to ordinary shareholders.
