Digital Transformation Roadmap | HIS & ERP Update

Strengthening patient care, operational efficiency, and data-driven decision making through digital transformation.

HIS (Hospital Information System)

Enhanced Patient Safety & Experience

Real-time records and drug allergy alerts reduce errors while minimizing patient waiting times.

Operational Efficiency & Cost Control

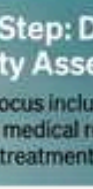

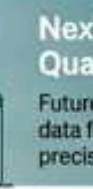

Seamless integration shortens workflows and reduces wasted time across clinical departments.

Next Step: Data-Driven Quality Assessment

Future focus includes extracting data for medical research and precise treatment cost analysis.

ERP (Enterprise Resource Planning)

Optimized Resource & Financial Management

Faster financial reporting enables quicker strategic decisions and optimized inventory efficiency.

Automated Procurement Workflows

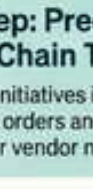

System handles automated replenishment to provide a multi-dimensional perspective on hospital finances.

Next Step: Predictive Supply Chain Tools

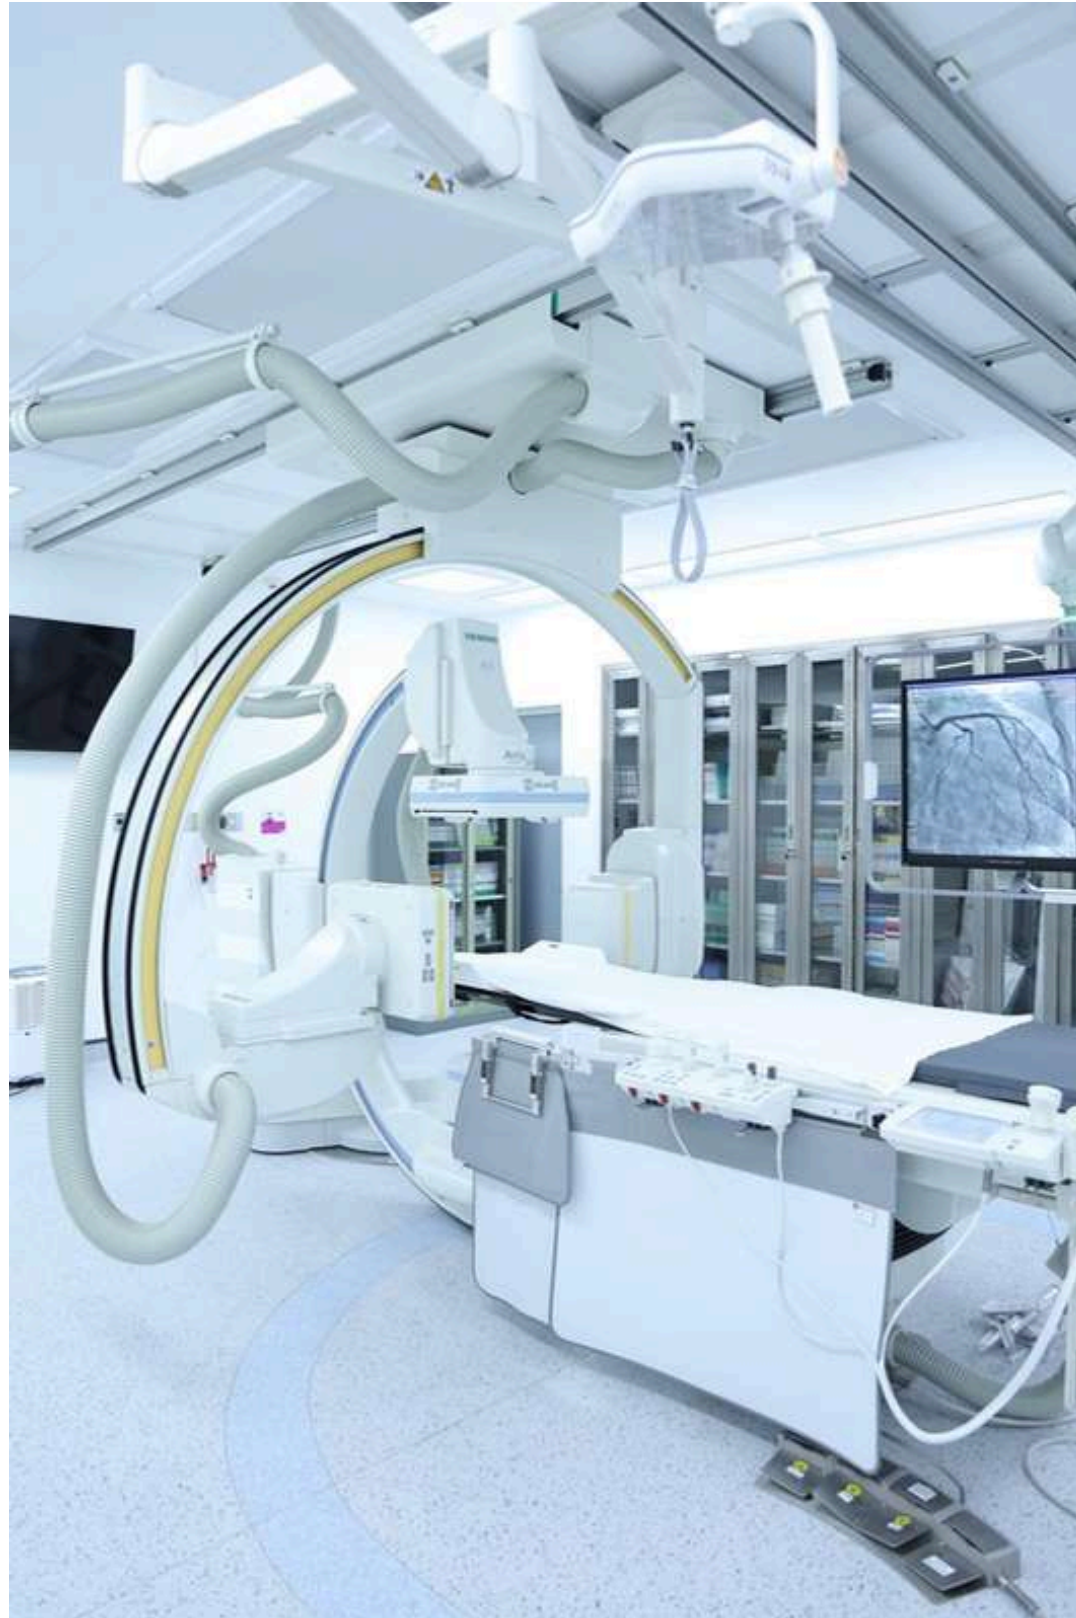

Upcoming initiatives involve forecasting purchasing orders and deep analytics for vendor negotiations.

Biplane Angiography System

- Strengthened advanced imaging capabilities for complex neurovascular and cardiovascular interventions.
- Enhanced precision and safety in minimally invasive procedures.
- Supports long-term growth of PR9's high-acuity specialty services.

New Hyperbaric Oxygen Therapy (HBOT) Center
