Specialty

Screening tests, diagnoses, and treatments by surgeons specializing in:

- General Surgery
- Breast Surgery
- Colorectal Surgery
- Vascular Surgery
- Plastic & Reconstruction Surgery
- Oncology Surgery
- Transplant Surgery
- Laparoscopic Surgery

- A wide variety of non-surgical treatment options for varicose veins e.g. endovenous laser ablation treatment, radiofrequency ablation (RFA) and catheter-assisted procedures using radiofrequency or laser energy.
- Diagnosis and advanced treatments of deep vein thrombosis in the legs and feet.
- Comprehensive care and prevention of peripheral arterial disease
- Advanced treatment of peripheral arterial disease by using non-surgical procedure, called endovascular balloon angioplasty.
- Conducting venous C02 angiography which is the novel technique for vascular examinations and interventions without loading contrast media which potentially impairs kidney function.
